Last Three Minutes:

The Last Three Minutes Paul Davies, 2008-08-05 Ragnarok Armageddon Doomsday Since the dawn of time man has wondered how the world would end In The Last Three Minutes Paul Davies reveals the latest theories It might end in a whimper slowly scattering into the infinite void Then again it might be yanked back by its own gravity and end in a catastrophic Big Crunch There are other more frightening possibilities We may be seconds away from doom at this very moment Written in clear language that makes the cutting edge science of quarks neutrinos wormholes and metaverses accessible to the layman The Last Three Minutes treats readers to a wide range of conjectures about the ultimate fate of the universe Along the way it takes the occasional divergent path to discuss some slightly less cataclysmic topics such as galactic colonization what would happen if the Earth were struck by the comet Swift Tuttle a distinct possibility the effects of falling in a black hole and how to create a baby universe Wonderfully morbid to the core this is one of the most original science books to come along in years
