GRAPES Language Description Gerhard Held,1991 The GRAPES modeling language is a tool for formally describing all components of a system GRAPES allows system developers to employ object oriented modeling techniques where systems are regarded as objects which communicate with each other The abstract syntax of GRAPES provides the terms and concepts required to describe models of this sort The concrete graphical syntax provides the mechanisms required for visual representation of the models The book constitutes the first precise definition of GRAPES and forms the basis for all GRAPES tools *Systems Development Methods for the Next Century* W.
