Encyclopedia of Hinduism Denise Cush, Catherine A. Robinson, Michael York, 2012-08-21 The Encyclopedia of Hinduism contains over 900 entries reflecting recent advances in scholarship which have raised new theoretical and methodological issues as well as identifying new areas of study which have not been addressed previously. The debate over the term Hinduism in the light of post Orientalist critiques is just one example of how once standard academic frameworks have been called into question. Entries range from 150 word definitions of terms and concepts to 5 000 word in depth investigations of major topics. The Encyclopedia covers all aspects of Hinduism but departs from other works in including more ethnographic and contemporary material in contrast to an exclusively textual and historical approach. It includes a broad range of subject matter such as historical developments among them nineteenth and twentieth century reform and revival geographical distribution especially the diaspora major and minor movements philosophies and theologies scriptures deities temples and sacred sites pilgrimages festivals rites of passage worship religious arts sculpture architecture music dance etc religious sciences e.g. astrology biographies of leading figures local and regional traditions caste and untouchability feminism and women's religion nationalism and the Hindu radical right and new religious movements. The history of study and the role of important scholars past and present are also discussed. Accessibility to all levels of reader has been a priority and no previous knowledge is assumed. However the in depth larger entries and the design of the work in line with the latest scholarly advances means that the volume will be of considerable interest to specialists. The whole is cross referenced and bibliographies attach to the larger entries. There is a full index.

**Spiritual Atheism** Steve Antinoff, 2010-01-10 Over the last 160 years a great dilemma has been hatching out of Western spiritual consciousness In our modern existence we have lost faith in the traditional routes by which human beings have come to experience the Divine and an acceptance of oneself as having a place in the order of the universe In Spiritual Atheism Steve Antinoff argues that the dilemma burning within the West has been given its most fundamental expression by Kirilov in Dostoyevsky's *The Possessed* God is necessary and so must exist Yet I know that he doesn't exist and can't exist But don't you understand that a man with two such ideas cannot go on living According to Antinoff spiritual atheism begins with three realizations that our experience of ourselves and our world leaves us ultimately dissatisfied that our dissatisfaction is intolerable and so must be broken through and that there is no God Continuing where such writers as Christopher Hitchens and Sam Harris left off Antinoff's unique and prescient take on deity and spirituality makes this book a critical contribution to the understanding of the quest for salvation and enlightenment in a world full of chaos and need
