Lasers Albert K. Levine, 1966 **Lasers** Albert K. Levine, 1966 *Lasers* Charles Blain, 2002 Developments in lasers continue to enable progress in many areas such as eye surgery the recording industry and dozens of others This book presents citations from the book literature for the last 25 years and groups them for ease of access which is also provided by subject author and titles indexes *Industrial Applications of Lasers* John Ready, 2012-12-02 Industrial Applications of Lasers focuses on how lasers have been used for practical applications in industry This text aims to stimulate the imagination of the readers who can then evaluate the potential application of lasers to solve their own problems Comprised of 21 chapters this book starts with an overview of the fundamental background of lasers and then discusses the basic principles of how lasers operate Other chapters provide an understanding of how holograms really work This text also discusses several topics relevant to lasers themselves including the types of practical lasers and laser properties This book considers laser safety which is very important for anyone considering a laser application Finally this text explores the various developed laser applications including scribing of ceramics laser welding and cutting of metals as well as applications in surveying alignment and metrology This book is a valuable resource to laser technicians physicists scientists researchers and readers whose interests span a variety of fields **Advances in Precision Laser Spectroscopy** Kelin Gao, Wuming Liu, Jianping Yin, Jin Wang, Mingsheng Zhan, 2022-06-21 Provides extensive and thoroughly exhaustive coverage of precision laser spectroscopy Presents chapters written by recognized experts in their individual fields Topics covered include cold atoms cold molecules methods and techniques for production of cold molecules optical frequency standards based on trapped single ions etc Applicable for researchers and graduate students of optical physics and precision laser spectroscopy **Lasers** Albert K. Levine, 1966 **Advances in Condensed Matter Optics** Liangyao Chen, Ning Dai, Xunya Jiang, Kuijuan Jin, Hui Liu, Haibin Zhao, 2014-12-16 The authors of this book all with a background in condensed matter physics have carried out advanced researches in recent years to study the optical and magneto optical properties of many kinds of new functional materials including metal based metamaterials narrow to wide bandgap semiconductors thin films and magnetic and magneto optical materials by using different types of optical methods and instruments This book describes some of the more recent progresses and developments in the study of condensed matter optics in both theoretic and experimental fields It will help readers especially graduate students and scientists who are studying and working in the nano photonic field to understand more deeply the characteristics of light waves propagated in nano structure based materials with potential applications in the future **Advances in Laser Chemistry** A. H. Zewail, 2012-12-06 The laser as a radiation source with temporal and spatial coherence has made a tremendous impact in the different fields of science As a result new and exciting research has been developing all over the world Laser spectroscopy shares a large fraction of this research and in the last decade numerous books and monographs have been published on this subject Most of these books and monographs contain the work

done in the physics community Very few books represent the advances made in laser chemistry a field that is flourishing and whose future is indeed very exciting It was felt that a meeting that focused on the important questions being asked in the chemistry community and on new and possible directions in laser chemistry was needed This three day conference held at the California Institute of Technology Pasadena California on March 20 22 1978 covered five important areas in laser chemistry Laser induced chemistry picosecond processes and techniques nonlinear optical spectroscopy and dephasing processes multiphoton excitation in molecules and molecular dynamics by molecular beams
