Frontiers of Laser Physics and Quantum Optics Zhizhan Xu, Shengwu Xie, Shi-Yao Zhu, Marlan O. Scully, 2013-11-11 Since the advent of the laser about 40 years ago the fields of laser physics and quantum optics have evolved into a major disciplines The early studies included optical coherence theory and semiclassical and quantum mechanical theories of the laser More recently many new and interesting effects have been predicted These include the role of coherent atomic effects in lasing without inversion and electromagnetically induced transparency atom optics laser cooling and trapping teleportation the single atom micromaser and its role in quantum measurement theory to name a few The International Conference on Laser Physics and Quantum Optics was held in Shanghai China from August 25 to August 28 1999 to discuss these and many other exciting developments in laser physics and quantum optics The international character of the conference was manifested by the fact that scientists from over 13 countries participated and lectured at the conference There were four keynote lectures delivered by Nobel laureate Willis Lamb Jr Profs H Walther A E Siegman and M O Scully In addition there were 34 invited lectures 27 contributed oral presentations and 59 poster papers We are grateful to all the

participants of the conference and the contributors of this volume *Current Research in Medicine and Health Sciences-2024* Serap YALIN,.
