Whaley,Wendy Samter,2007 Offering a direct sightline into communication theory Explaining Communication provides in depth discussions of communication theories by some of the foremost scholars working in communication today With contributions from the original theorists and scholars known for their work in specific theoretical perspectives this distinctive

text breaks new ground in giving these scholars the opportunity to address students firsthand speaking directly to the coming generations of communication scholars. Covering a wide range of interpersonal communication theories, the scope of this exceptional volume includes the nature of theory and fundamental concepts in interpersonal communication theories accounting for individual differences in message production, explanations of human communication from dyadic, relational and/or cultural levels, and a history of communication theory. Chapter authors offer their own views of the core ideas and findings of specific theoretical perspectives, discussing the phenomena those perspectives are best positioned to explain, how the theories fit into the field, and where future research efforts are best placed. While by no means comprehensive, *Explaining Communication* includes those theories that rank among those most often used in today's work that have generated a substantial body of knowledge over time and that have not been articulated in detail in other publications. With detailed explorations and first-hand discussions of major communication theories, this volume is essential for students in communication studies, interpersonal communication, and advanced theory courses, as well as for scholars needing a thorough reference to some of the most salient theories in communication today.

Principles of Counseling and Psychotherapy Paul R. Peluso, Gerald J. Mozdierz, Joseph Lisiecki, 2013-12-17 Research has shown that the most effective way to prepare students for practice with real clients is to learn to think in a new way rather than simply learning and using a set of steps. While there is much to be learned from what master practitioners do in their sessions, there is even more knowledge to gain from learning how they think. The second edition of *Principles of Counseling and Psychotherapy* offers students and practitioners a way to understand the processes behind effective outcomes with a wide variety of clients. The second edition is infused with real-world clinical case examples and opportunities for readers to apply the material to the cases being presented. New thought exercise sections are specifically designed to engage the reader's natural non-linear thinking, and transcript material both from cases and from master therapists themselves are interwoven in the text. Accompanying videos available through Alexander Street Press bring the text to life, and instructors will find testbanks, transition notes, and narrated PowerPoints available for free download from the book's website at www.routledge-mentalhealth.com.

Emotional Awareness The Dalai Lama, Paul Ekman, 2008-09-16 Two leading thinkers engage in a landmark conversation about human emotions and the pursuit of psychological fulfillment. At their first meeting, a remarkable bond was sparked between His Holiness the Dalai Lama, one of the world's most revered spiritual leaders, and the psychologist Paul Ekman, whose groundbreaking work helped to define the science of emotions. Now these two luminaries share their thinking about science and spirituality, the bonds between East and West, and the nature and quality of our emotional lives. In this unparalleled series of conversations, the Dalai Lama and Ekman prod and push toward answers to the central questions of emotional experience: What are the sources of hate and compassion? Should a person extend her compassion to a torturer, and would that even be biologically possible? What does science reveal about the benefits of Buddhist meditation, and can
