Holocaust Understanding And Remembering:

Remembering the Holocaust in Educational Settings Andy Pearce, 2018-05-30 Remembering the Holocaust in Educational Settings brings together a group of international experts to investigate the relationship between Holocaust remembrance and different types of educational activity through consideration of how education has become charged with preserving and perpetuating Holocaust memory and an examination of the challenges and opportunities this presents. The book is divided into two key parts. The first part considers the issues of and approaches to the remembrance of the Holocaust within an educational setting with essays covering topics such as historical culture, genocide education, familial narratives, the survivor generation and memory spaces in the United States, United Kingdom and Germany. In the second part, contributors explore a wide range of case studies within which education and Holocaust remembrance interact, including young people's understanding of the Holocaust in Germany, Polish identity narratives, Shoah remembrance and education in Israel, the Holocaust and Genocide Centre of Education and Memory in South Africa and teaching at Deakin University Melbourne, Australia. An international and interdisciplinary exploration of how and why the Holocaust is remembered through educational activity, Remembering the Holocaust in Educational Settings is the ideal book for all students, scholars and researchers of the history and memory of the Holocaust as well as those studying and working within Holocaust education.

Just Remembering Michael Warren Tumolo, 2015-10-29 Just Remembering: Rhetorics of Genocide Remembrance and Sociopolitical Judgment analyzes a set of influential discourses of genocide remembrance to explain how public memory discourses inform sociopolitical judgment. Within this explanatory context, Just Remembering additionally asks how we might remember pasts marked by genocidal violence in ways that commit ourselves to a deeper understanding and more humane practice of justice. The chapters are thematically organized, focusing on specific sites of memory to highlight symbolic inducements of memorial discourses. Chapter 2 analyzes U.S. public discourse concerning an Armenian Genocide resolution to elucidate the role of politics in the production, dissemination, and maintenance of memory. Chapter 3 offers a historical account of the shift in public discourse concerning the capture of the Nazi war criminal Adolf Eichmann, demonstrating how and with what consequences the discourses shifted from a focus on law to a focus on morality. Chapter 4 expands this work by analyzing how competing narrative accounts of historical figures and events, Eichmann and the Holocaust, influence what we remember, how we remember, and the ends to which we apply such memories. Chapter 5 analyzes the Report of the President's Commission on the Holocaust that produced the United States' official remembrance of the Holocaust. This chapter argues that the Commission Report provides an exemplary explanation for why we should remember and provokes a complex understanding of what we are to remember. Chapter 6 concludes the book by focusing on the productive capacity of the humanitarian aims of U.S. Holocaust remembrance.

Frames of Remembrance Iwona Irwin-Zarecka, 2017-07-05 What is the symbolic impact of the Vietnam War Memorial? How does television change our engagement with the past? Can the

efforts to wipe out Communist legacies succeed Should victims of the Holocaust be celebrated as heroes or as martyrs These questions have a great deal in common yet they are typically asked separately by people working in distinct research areas in different disciplines Frames of Remembrance shares ideas and concerns across such divides *Remembering Genocide* Nigel Eltringham, Pam Maclean, 2014-06-27 In *Remembering Genocide* an international group of scholars draw on current research from a range of disciplines to explore how communities throughout the world remember genocide Whether coming to terms with atrocities committed in Namibia and Rwanda Australia Canada the Punjab Armenia Cambodia and during the Holocaust those seeking to remember genocide are confronted with numerous challenges Survivors grapple with the possibility or even the desirability of recalling painful memories Societies where genocide has been perpetrated find it difficult to engage with an uncomfortable historical legacy Still to forget genocide as this volume edited by Nigel Eltringham and Pam Maclean shows is not an option To do so reinforces the vulnerability of groups whose very existence remains in jeopardy and denies them the possibility of bringing perpetrators to justice Contributors discuss how genocide is represented in media including literature memorial books film and audiovisual testimony Debates surrounding the role museums and monuments play in constructing and transmitting memory are highlighted Finally authors engage with controversies arising from attempts to mobilise and manipulate memory in the service of reconciliation compensation and transitional justice

Remembering Our Past David C. Rubin, 1999-02-13 This book reviews the latest research in the field of autobiographical memory **Relational Remembering** Sue Campbell, 2003-10-07 Tracing the impact of the memory wars on science and culture *Relational Remembering* offers a vigorous philosophical challenge to the contemporary skepticism about memory that is their legacy Campbell's work provides a close conceptual analysis of the strategies used to challenge women's memories particularly those meant to provoke a general social alarm about suggestibility Sue Campbell argues that we cannot come to an adequate understanding of the nature and value of memory through a distorted view of rememberers The harmful stereotypes of women's passivity and instability that have repopulated discussions of abuse have led many theorists to regard the social dimensions of remembering only negatively as a threat or contaminant to memory integrity Such models of memory cannot help us grasp the nature of harms linked to oppression as these models imply that changed group understandings of the past are incompatible with the integrity of personal memory Campbell uses the false memory debates to defend a feminist reconceptualization of personal memory as relational social and subject to politics Memory is analyzed as a complex of cognitive abilities and social narrative activities where one's success or failure as a rememberer is both affected by one's social location and has profound ramifications for one's cultural status as a moral agent

Remembering Violence Nicolas Argenti, Katharina Schramm, 2010 Psychologists have done a great deal of research on the effects of trauma on the individual revealing the paradox that violent experiences are often secreted away beyond easy accessibility becoming impossible to verbalize explicitly However comparatively little research has been done on the

transgenerational effects of trauma and the means by which experiences are transmitted from person to person across time to become intrinsic parts of the social fabric With eight contributions covering Africa Central and South America China Europe and the Middle East this volume sheds new light on the role of memory in constructing popular histories or historiographies of violence in the absence of or in contradistinction to authoritative written histories It brings new ethnographic data to light and presents a truly cross cultural range of case studies that will greatly enhance the discussion of memory and violence across disciplines

A Badge of Injury Sébastien Tremblay, 2023-12-04 A Badge of Injury is a contribution to both the fields of queer and global history It analyses gay and lesbian transregional cultural communication networks from the 1970s to the 2000s focusing on the importance of National Socialism visual culture and memory in the queer Atlantic Provincializing Euro American queer history it illustrates how a history of concepts which encompasses the visual offers a greater depth of analysis of the transfer of ideas across regions than texts alone would offer It also underlines how gay and lesbian history needs to be reframed under a queer lens and understood in a global perspective Following the journey of the Pink Triangle and its many iterations A Badge of Injury pinpoints the roles of cultural memory and power in the creation of gay and lesbian transregional narratives of pride or the construction of the historical queer subject Beyond a success story the book dives into some of the shortcomings of Euro American queer history and the power of the negative writing an emancipatory yet critical story of the era

Remembering the Reformation Alexandra Walsham, Brian Cummings, Ceri Law, Karis Riley, 2020-06-04 This stimulating volume explores how the memory of the Reformation has been remembered forgotten contested and reinvented between the sixteenth and twenty first centuries Remembering the Reformation traces how a complex protracted and unpredictable process came to be perceived recorded and commemorated as a transformative event Exploring both local and global patterns of memory the contributors examine the ways in which the Reformation embedded itself in the historical imagination and analyse the enduring unstable and divided legacies that it engendered The book also underlines how modern scholarship is indebted to processes of memory making initiated in the early modern period and challenges the conventional models of periodisation that the Reformation itself helped to create This collection of essays

offers an expansive examination and theoretically engaged discussion of concepts and practices of memory and Reformation. This volume is ideal for upper level undergraduates and postgraduates studying the Reformation, Early Modern Religious History, Early Modern European History, and Early Modern Literature. **Digital Holocaust Memory, Education and Research** Victoria Grace Walden, 2021-12-03. This book explores the diverse range of practical and theoretical challenges and possibilities that digital technologies and platforms pose for Holocaust memory education and research. From social media to virtual reality, 360 degree imaging to machine learning, there can be no doubt that digital media penetrate practice in these fields. As the Holocaust moves beyond living memory towards solely mediated memory, it is imperative that we pay critical attention to the way digital technologies are shaping public memory and education and research. Bringing together the voices of heritage and educational professionals and academics from the arts and humanities and the social sciences, this interdisciplinary collection explores the practicalities of creating digital Holocaust projects, the educational value of such initiatives, and considers the extent to which digital technologies change the way we remember, learn about, and research the Holocaust, thinking through issues such as ethics, embodiment, agency, community, and immersion. At its core, this volume interrogates the extent to which digital interventions in these fields mark an epochal shift in Holocaust memory education and research, or whether they continue to be shaped by long standing debates and guidelines developed in the broadcast era.

Documents of Life 2 Ken Plummer, Kenneth Plummer, 2001-03-20. This study champions the use of life stories and other personal documents in social research. It considers recent developments in the humanist approach to social research, looking at writing and narrative memory and the auto biographical society. *Towards an Understanding of Kurdistan Memory Culture* Bareez Majid, 2023-12-20. This book presents a thorough analysis of the Kurdistan Region of Iraq's memory culture, focusing particularly on commemorations and representations of the Anfal and Halabja atrocities. The author employs a transdisciplinary approach that draws on Memory Studies, Postcolonial Studies, Heritage Studies, Kurdish Studies, Literary Studies, and Trauma Studies to analyze cultural objects such as Kurdistan literary novels, museums, and school curricula. The book introduces two key concepts: the phantomic museum and the apostrophic museum. The former explores the fragile and politicized nature of memories of missing individuals who disappeared during Saddam Hussein's genocidal campaigns and who have never been found, primarily as they return in the Halabja Monument and Peace Museum. The latter examines how the addressing/apostrophizing of Kurdistan in and by the Amna Suraka museum in the city of Sulaymaniyah institutionalizes official and highly politicized versions of the past. *Knowledge and Acknowledgement in the Politics of Memory of the Armenian Genocide* Vahagn Avedian, 2018-10-08. Is the Armenian Genocide a strictly historical matter? If that is the case, why is it still a topical issue capable of causing diplomatic rows and heated debates? The short answer would be that the century-old Armenian Genocide is much more than a historical question. It emerged as a political dilemma on the international arena at the San Stefano peace conference in 1878 and has remained as such into our days. The disparity between knowledge and

acknowledgement mainly ascribable to Turkey's official denial of the genocide has only heightened the politicization of the Armenian question. Thus the memories of the WWI era refuse to be relegated to the pages of history but are rather perceived as a vivid presence. This is the result of the perpetual process of politics of memory. The politics of memory is an intricate and interdisciplinary negotiation engaging many different actors in the society who have access to a wide range of resources and measures in order to achieve their goals. By following the Armenian question during the past century up to its Centennial Commemoration in 2015, this study aims to explain why and how the politics of memory of the Armenian Genocide has kept it as a topical issue in our days.
