Great Contemporary Issues Southeast Asia:

University of Michigan Official Publication ,1957 *Brunei - History, Islam, Society and Contemporary Issues* Ooi Keat Gin,2015-12-14 Brunei although a relatively small state is disproportionately important on account of its rich resource base In addition in recent years the country has endeavoured to play a greater role in regional affairs especially through ASEAN holding the chair of the organisation in 2013 and also beyond the region fostering diplomatic political economic and educational ties with many nations This book presents much new research and new thinking on a wide range of issues concerning Brunei largely drawn from Bruneian academics Subjects covered include Brunei s rich history the sultanate formerly had much more extensive territories and was a key player in regional affairs the country s economy politics society and ethnicities and resource issues and international relations **Catalogue of the University of Michigan** University of Michigan,1964 Announcements for the following year included in some vols *Contemporary Issues of the Law of the Sea* Aleksandr Antonovich Kovalev,2004 Originally published in Russian this book is the first major Russian treatise on the international law of the sea in the post Soviet era The book covers the legal status and legal regime of the sea expanses and follows their classification in the 1982 United Nations Convention In addition a separate section is devoted to the legal status of the Caspian Sea The author analyzes in depth the international legal norms regulating the preservation of the marine environment and concludes that a system of international cooperation is essential both in the sphere of navigation and economic exploitation of oceanic resources Extensive attention is given to Russian practice As Russia plays a central and influential role in world maritime policy a book that specifically deals with Russian approaches in this field cannot fail to be of importance to anyone interested in the law of the sea *The Good Serials Department* Peter Gellatly,2019-12-06 This book first published in 1990 examines in detail 12 serials departments both large and small that experts have selected as representative examples of notable serials departments The departments have in common a general reputation in the serials field as being good operations in the sense of providing optimum services to their users despite the challenges of current day problems in financial planning and collection re evaluation and shaping The examples offered serve mainly to suggest what works well in the serials operation today Despite the lack of space devoted to the good serials department or the often crisis oriented approach to serials problems that is occasionally emphasized in the literature the good serials operation undeniably exists and always has Certain serials departments receive the utmost praise from librarian colleagues and faculty student users alike This authoritative volume shows that good serials librarianship remains what it has always been a means of providing serials and the information in them to an ever widening audience of readers and researchers Economic changes may alter the pattern of serials department services but they do not alter the real and ultimate goals of the serials department **The Cambridge History of Southeast Asia** Nicholas Tarling,1999 Volume 2 discusses Southeast Asia s interaction with foreign countries during the period c 1500 to c 1800 *Congressional Record* United States.

Congress,1996 Contemporary Issues in Globalization Dr. Vidyapati Gautam,2021-09-10 CONTEMPORARY ISSUES IN GLOBALIZATION The world is becoming more globalized there is no doubt about that While that sounds promising the current form of globalization neoliberalism free trade and open markets are coming under much criticism The interests of powerful nations and corporations are shaping the terms of world trade In democratic countries they are shaping and affecting the ability of elected leaders to make decisions in the interests of their people Elsewhere they are promoting narrow political discourse and even supporting dictatorships and the stability that it brings for their interests This is to the detriment of most people in the world while increasingly fewer people in proportion are prospering The modern system of free trade free enterprise and market based economies actually emerged around 200 years ago as one of the main engines of development for the Industrial Revolution In 1776 British economist Adam Smith in his book the Wealth of Nations Suggested that for maximum efficiency all forms of government interventions in economic issues should be removed and that there should be no restrictions or tariffs on manufacturing and commerce within a nation for it to develop The book provides readers with of some of the basic principles of this subject Contents Introduction Globalization Effects in Asia and Beyond Globalization and Local Cultures Globalization and its Fall Out The WTO Globalization and a New World Order Globalization Myth or Reality Globalization and Anti Globalization Globalization A Critical Framework for Understanding Contemporary Social Processes The Impact of Globalization and Liberalisation on Agriculture and Small Farmers Smallholders Globalization and Policy Analysis Globalization in the Fifth Schedule Areas **The Modern Anthropology of India** Peter Berger, Frank Heidemann,2013-06-03 The Modern Anthropology of India is an accessible textbook providing a critical overview of the ethnographic work done in India since 1947 It assesses the history of research in each region and serves as a practical and comprehensive guide to the main themes dealt with by ethnographers It highlights key analytical concepts and paradigms that came to be of relevance in particular regions in the recent history of research in India and which possibly gained a pan Indian or even trans Indian significance Structured according to the states of the Indian union contributors raise several key questions including What themes were ethnographers interested in What are the significant ethnographic contributions How are peoples communities and cultural areas represented How has the ethnographic research in the area developed Filling a significant gap in the literature the book is an invaluable resource to students and researchers in the field of Indian anthropology ethnography regional anthropology and postcolonial studies It is also of interest to students of South Asian studies in general as it provides an extensive and critical overview of regionally based ethnographic activity undertaken in India **South Asia and the Strategic Indian Ocean** Army Library (U.S.),1973 **Good Governance in Asia** Linda Chelan Li,2016-03-22 The international aid community has advocated governance reforms as a necessary complement to economic aid to developing countries The resultant Good Governance Agenda has been criticised for its ahistorical bias The empirical case studies reported in this book further illustrate the limitations by showing the complex logics of governance

reforms and their relations with development in the Asian context The analysis highlights the importance of taking full notice of the Asian reform experiences in the ongoing reflection over the global institutional and development agenda The message is not to deny the need for governance reforms or the utility of international learning and sharing of experiences Global development will benefit however from a better understanding of the linkages between governance reforms and the diverse historical conditions they are embedded in both developing or the advanced economies This book was published as a special issue of Journal of Contemporary Asia Current Issues in Shipping, Ports and Logistics Theo Notteboom, 2011 Bringing together an international network of leading scholars this multidisciplinary book unravels some of the most pressing challenges to shipping ports and logistics Divided into five parts shipping the analysis of flows and networks terminal operations and performance logistics and port development and governance this record is an essential read for practitioners in the maritime and logistics world postgraduate students policy makers and professional organizations As market players expand and improve their services in line with increased requirements on rates reliability environmental footprint and safety and security this compendium encourages further systematic thinking Announcement University of Michigan--Dearborn, 1975 **COVID-19 in Southeast Asia** Hyun Bang Shin, Murray McKenzie, Do Young Oh, 2022-01-06 COVID 19 has presented huge challenges to governments businesses civil societies and people from all walks of life but its impact has been highly variegated affecting society in multiple negative ways with uneven geographical and socioeconomic patterns The crisis revealed existing contradictions and inequalities in society compelling us to question what it means to return to normal and what insights can be gleaned from Southeast Asia for thinking about a post pandemic world In this regard this edited volume collects the informed views of an ensemble of social scientists area studies development studies and legal scholars anthropologists architects economists geographers planners sociologists and urbanists representing academic institutions activist and charitable organisations policy and research institutes and areas of professional practice who recognise the necessity of critical commentary and engaged scholarship These contributions represent a wide ranging set of views collectively producing a compilation of reflections on the following three themes in particular 1 Urbanisation digital infrastructures economies and the environment 2 Migrants im mobilities and borders and 3 Collective action communities and mutual action Overall this edited volume first aims to speak from a situated position in relevant debates to challenge knowledge about the pandemic that has assigned selective and inequitable visibility to issues people or places or which through its inferential or interpretive capacity has worked to set social expectations or assign validity to certain interventions with a bearing on the pandemic s course and the future it has foretold Second it aims to advance or renew understandings of social challenges risks or inequities that were already in place and which without further or better action are to be features of our post pandemic world as well This volume also contributes to the ongoing efforts to de centre and decolonise knowledge production It endeavours to help secure a place within these debates for a region that was among the

The Ecotourism-Extraction Nexus Bram Büscher, Veronica Davidov, 2013-08-15 Ecotourism and natural resource extraction may be seen as contradictory pursuits yet in reality they often take place side by side sometimes even supported by the same institutions Existing academic and policy literatures generally overlook the phenomenon of ecotourism in areas concurrently affected by extraction industries but such a scenario is in fact increasingly common in resource rich developing nations This edited volume conceptualises and empirically analyses the ecotourism extraction nexus within the context of broader rural and livelihood changes in the places where these activities occur The volume s central premise is that these seemingly contradictory activities are empirically and conceptually more alike than often imagined and that they share common ground in ethnographic lived experiences in rural settings and broader political economic structures of power and control The book offers theoretical reflections on why ecotourism and natural resource extraction are systematically decoupled and epistemologically and analytically re links them through ethnographic case studies drawing on research from around the world It should be of interest to students and professionals engaged in the disciplines of geography anthropology and development studies
