Megalodon Mark Renz, 2002 **Seventy Years of Birdwatching** H.G Alexander, 2010-10-30 This is a book about

birdwatching birdwatchers and above all birds It is in some measure also a history of the development of modern ornithology in Britain although the author's birdwatching extended over parts of three continents Europe India and North America Seventy Years of Birdwatching is not truly an autobiography there is too little about the author in it though the personality of this exceptional shy and gentle man comes through H G Alexander began birdwatching in earnest in 1898 and has never stopped He has met or corresponded with most of the leading ornithologists of this century his first article in British Birds appeared in 1909 and it may surprise many to discover how much of practical ornithology that is deliberated today was debated and practised so many years ago During more than seventy years the author has witnessed important changes in resident and migrant bird populations in Britain Dungeness for example was almost as uninhabited as the moon when he first knew it and Kentish Plovers bred there by the score but Carrion Crows were a rarity Over the years he saw the gradual decline of the Red backed Shrike Corncrake and Wryneck but he was instrumental in bringing one bird to Britain the hitherto undiscovered Willow Tit which he with others helped to identify Fifty years ago H G Alexander had already covered scores of six inch Ordnance Survey maps with his mapping records and these together with his notebooks and correspondence with contemporaries supply an absorbing glimpse of a birdwatching era that was fascinatingly like and yet unlike our own Perhaps this is why today's birdwatcher has only to turn the pages to be enthralled
