Great Men And Women Of Computing:

Great Men and Women of Computing Donald D. Spencer,1996-01-01 **Your Computer Is on Fire** Thomas S. Mullaney,Benjamin Peters,Mar Hicks,Kavita Philip,2021-03-09 Technology scholars declare an emergency attention must be paid to the inequality marginalization and biases woven into our technological systems This book sounds an alarm we can no longer afford to be lulled into complacency by narratives of techno utopianism or even techno neutrality We should not be reassured by such soothing generalities as human error virtual reality or the cloud We need to realize that nothing is virtual everything that happens online virtually or autonomously happens offline first and often involves human beings whose labor is deliberately kept invisible Everything is IRL In Your Computer Is on Fire technology scholars train a spotlight on the inequality marginalization and biases woven into our technological systems **A to Z of Computer Scientists** Harry Henderson,2014-05-14 Profiles more than 100 scientists from around the world who made important contributions to the study of computer science including Howard Aiken Steve Case Steve Jobs and Ted Nelson *Grace Hopper* Kathleen Broome Williams,2013-01-15 When Grace Hopper retired as a rear admiral from the U S Navy in 1986 she was the first woman restricted line officer to reach flag rank and at the age of seventy nine the oldest serving officer in the Navy A mathematician by training who became a computer scientist the eccentric and outspoken Hopper helped propel the Navy into the computer age She also was a superb publicist for the Navy appearing frequently on radio and television and quoted regularly in newspapers and magazines Yet in spite of all the attention she received until now Amazing Grace as she was called has never been the subject of a full biography Kathleen Broome Williams looks at Hopper s entire naval career from the time she joined the WAVES and was sent in 1943 to work on the Mark I computer at Harvard where she became one of the country s first computer programmers Thanks to this early Navy introduction to computing the author explains Hopper had a distinguished civilian career in commercial computing after the war gaining fame for her part in the creation of COBOL The admiral s Navy days were far from over however and Williams tells how Hopper already past retirement age was recalled to active duty at the Pentagon in 1967 to standardize computer programming languages for Navy computers Her temporary appointment lasted for nineteen years while she standardized COBOL for the entire department of defense Based on extensive interviews with colleagues and family and on archival material never before examined this biography not only illuminates Hopper s pioneering accomplishments in a field that came to be dominated by men but provides a fascinating overview of computing from its beginnings in World War II to the late 1980s **Programmed Inequality** Mar Hicks,2018-02-23 This sobering tale of the real consequences of gender bias explores how Britain lost its early dominance in computing by systematically discriminating against its most qualified workers women Harvard Magazine In 1944 Britain led the world in electronic computing By 1974 the British computer industry was all but extinct What happened in the intervening thirty years holds lessons for all postindustrial superpowers As Britain struggled to use technology to retain its

global power the nation s inability to manage its technical labor force hobbled its transition into the information age In Programmed Inequality Mar Hicks explores the story of labor feminization and gendered technocracy that undercut British efforts to computerize That failure sprang from the government s systematic neglect of its largest trained technical workforce simply because they were women Women were a hidden engine of growth in high technology from World War II to the 1960s As computing experienced a gender flip becoming male identified in the 1960s and 1970s labor problems grew into structural ones and gender discrimination caused the nation s largest computer user the civil service and sprawling public sector to make decisions that were disastrous for the British computer industry and the nation as a whole Drawing on recently opened government files personal interviews and the archives of major British computer companies Programmed Inequality takes aim at the fiction of technological meritocracy Hicks explains why even today possessing technical skill is not enough to ensure that women will rise to the top in science and technology fields Programmed Inequality shows how the disappearance of women from the field had grave macroeconomic consequences for Britain and why the United States risks repeating those errors in the twenty first century **Women in Computing** Judith A. Morris,2013-10-22 Women in Computing presents how the computing industry delivered the opportunities for women This book identifies the distinct attitudes in companies towards equal opportunities Organized into eight chapters this book begins with an overview of the problems the opportunities the successes and failures and provides some insight into what can be done by women to make use of the massive potential they have in the future industry This text then examines the problem to introduce computing to girls in school which has not been taught properly in schools due to lack of right equipment or lack of training of the teachers Other chapters consider the positive attitude of most major computer manufacturers and software houses to the employment of women This book discusses as well the problems faced by women in the work place including sexual harassment and lack of cooperation from male colleagues The final chapter deals with the need for change in the computing industry This book is a valuable resource for employees and employers *The Machine in Neptune's Garden* Helen M. Rozwadowski,David K. Van Keuren,2004 **Bulletin of the United States Bureau of Labor Statistics** ,1913 New York Magazine ,1994-05-30 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **Connecting Women** Valérie Schafer,Benjamin G. Thierry,2015-10-08 This important volume examines European perspectives on the historical relations that women have maintained with information and communication technologies ICTs since the telegraph Features describes how gendered networks have formed around ICT since the late 19th Century reviews the gendered issues revealed by the conflict between the actress Ms Sylviac and the French telephone administration in 1904 or by feminine

blogs examines how gender representations age categories and uses of ICT interact and are mutually formed in children s magazines illuminates the participation of women in the early days of computing through a case study on the Rothamsted Statistics Department presents a comparative study of women in computing in France Finland and the UK revealing similar gender divisions within the ICT professions of these countries discusses diversity interventions and the part that history could and should play to ensure women do not take second place in specific occupational sectors *Gender Codes* Thomas J. Misa,2011-09-14 The computing profession faces a serious gender crisis Today fewer women enter computing than anytime in the past 25 years This book provides an unprecedented look at the history of women and men in computing detailing how the computing profession emerged and matured and how the field became male coded Women s experiences working in offices education libraries programming and government are examined for clues on how and where women succeeded and where they struggled It also provides a unique international dimension with studies examining the U S Great Britain Germany Norway and Greece Scholars in history gender women s studies and science and technology studies as well as department chairs and hiring directors will find this volume illuminating **Women, Work and Computing** Ruth Woodfield,2000-12-28 Although few dispute the computer s place as a pivotal twentieth century artefact little agreement has emerged over whether the changes it has precipitated are generally positive or negative in nature or whether we should be contemplating our future association with the computer more with enthusiasm or trepidation Specifically with regard to the relationship between women and computers a diverse body of commentary has embraced the views of those who have found grounds for expressing pessimism about this association and those who have favoured a more optimistic assessment of the current situation and its probable future development This book undertakes a thorough evaluation of the legitimacy and predictive power of the optimistic commentary Using a large body of original qualitative data it interrogates the bases of what it identifies as three waves of optimism and in doing so provides answers to some of the key questions asked in this field today **The Great Man** Kate Christensen,2008-05-13 National Bestseller and Winner of the PEN Faulkner Award for Fiction Oscar Feldman the renowned figurative painter has passed away As his obituary notes Oscar is survived by his wife Abigail their son Ethan and his sister the well known abstract painter Maxine Feldman What the obituary does not note however is that Oscar is also survived by his longtime mistress Teddy St Cloud and their daughters As two biographers interview the women in an attempt to set the record straight the open secret of his affair reaches a boiling point and a devastating skeleton threatens to come to light From the acclaimed author of The Epicure s Lament a scintillating novel of secrets love and legacy in the New York art world Mischievous funny astute As unexpectedly generous as it is entertaining Christensen is a witty observer of the art universe The New York Times **InfoWorld** ,1997-11-03 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **Computing Myths, Class Realities** David Hakken,2019-03-07 This study of computing in an economically

transforming city in the north of England looks at how new information technologies effect and are affected by a historically vibrant working class culture Stressing the complex interplay between technology and culture especially notions about work and labor the authors examine how this dynamic is manifest in computer related jobs in social relationships and in the reproduction of local culture They analyze the structure of computing in Sheffield placing it in the contexts of national state policy world political economy and the regional labor market and they explore the processes of computing in relation to the reproduction of gendering the rise of labor freedom and local attempts to influence the course of computerization The experiences of the people in Sheffield and South Yorkshire have much to teach us about what technology does and what we can do to control it Computing Myths Class Realities will be of interest not only to anthropologists and sociologists but to all scholars interested in the social correlates of computing *Readings In Popular Culture* Gary Day,1990-07-13 This is the first book since Roland Barthes Mythologies to take a comprehensive look at popular culture The twenty six essays in this volume all written by specialists cover a range of topics from t shirts to computers While each essay reflects some aspect of contemporary cultural theory a number also develop original approaches to questions of whether popular culture is a condition or a representation of experience and how it manages to both resist and reproduce consumer capitalism Together these essays present an exciting reinterpretation of popular culture which will appeal to anyone interested in this important subject *Profiles--computer Sciences* Melissa J. Lane,1988 *Proceedings of the 2012 International Conference of Modern Computer Science and Applications* Zhenyu Du,2012-08-22 This volume contains the proceedings of the 2012 International Conference of Modern Computer Science and Applications MCSA 2012 which was held on September 8 2012 in Wuhan China The MCSA 2012 provides an excellent international forum for sharing knowledge and results in theory methodology and applications of modern computer science and applications in theoretical and practical aspects

Good-Vs-Evil Anastacia Burrell,2018-12-29 God is there to save you from harm The devil can t take no more then you can t ever have in life on what you can have is yours in life who stands by the great waterfalls of life stands for ups and downs everything is meant for a reason because you wonder why your life is so block from others because something maybe missing in order to put common sense together which was unsaid and done that needs to be done so you cherish the memory of that day of your life every stone you can ever take and every breath in your body give it to god and glory and take a deep breath and praise God Trials must be mistaken because whatever you do or whatever you did it must be something or what you did needs to be fixed and prepared of a dislike compare to or a distance A distance is a challenge of course or a state of mind What people do for a living is the unit of life It s the bad things that you do that makes trials go wrong and bad rather then right One way it is or another and one way it doesn t What you do or what you don t do you pick up the pieces of the puzzles and get it right on time on the dot and line and you take a piece of the pie what you like and dislike and show and prove the way you want it You talk about the good old times and sometimes it s about the wrong times of your life and the things you

did in the past whether it be good or bad in your wildest dream life You take that and swipe your shoulders off The greater it is the badder it maybe It can be fixable that same day or a couple of days a head Trouble don t last always and not for long That s how it works and what should be done and you take it and fix everything that has been broken You stand forward to that and be strong and have strength and whatever that needs to be done and whatever that it is you can t do you don t have to do it or put up with it Be yourself and do all that you can do as possible and that s all you can do You cannot please everyone because it s gonna have a passing moment when you can do something or not and you will be tired of it It also includes fatal attraction breaking relationships tragedies boo thangs lover and friends blessings curses magic spells cast of spells Buddhism voodoo and many more *Disparate Measures* Mary A. Armstrong,Susan L. Averett,2024-04-09 An exploration of workplace participation and earnings patterns for diverse women in US STEM professions that upends the myth that STEM work benefits women economically Seen as part economic driver part social remedy STEM work is commonly understood to benefit both the US economy and people particularly women from underrepresented groups But what do diverse women find when they work in US STEM occupations What do STEM jobs really deliver and for whom In Disparate Measures Mary Armstrong and Susan Averett challenge the conventional wisdom that a diverse US STEM workforce will bring about economic abundance for the women who participate in it Combining intersectionality theory and critical data theory with a feminist economic analysis the authors explore how different groups of diverse women truly fare in US STEM professions Disparate Measures is centered on eight unique in depth case studies each of which provides an intersectional economic analysis a term coined by the authors of diverse women working in STEM occupations Four case studies prioritize women of color and examine the STEM participation and earnings of Black women American Indian and Alaska Native women Asian and Pacific Islander women and Hispanic women Latinas four additional case studies illuminate intersections that are frequently neglected by the STEM inclusivity literature foreign born women women with disabilities Queer women and mothers What the authors find in their groundbreaking detailed analysis is that the promises of STEM are only partly true when compared to women not working in STEM most women are indeed economically elevated by STEM occupations yet when compared to white men in the same STEM occupations women s second class status is usually reaffirmed The authors conclude by offering seven big picture recommendations for rethinking STEM equity showing just how we can successfully confront the entrenched patterns of economic disadvantage faced by diverse women in STEM jobs
