as a new technology and an art form Likewise photography was instrumental in cultivating and maintaining Europe's distinctively Orientalist vision of the Middle East As new advances enhanced the versatility of the medium nineteenth century photographers were able to mass produce images to incite and satisfy the demands of the region's burgeoning tourist industry and the appetites of armchair travelers in Europe In this way the evolution of modern photography fueled an interest in visual contact with the rest of the world Photography's Orientalism offers the first in depth cultural study of the works of European and non European photographers active in the Middle East and India focusing on the relationship between photographic literary and historical representations of this region and beyond The essays explore the relationship between art and politics by considering the connection between the European presence there and aesthetic representations produced by traveling and resident photographers thereby contributing to how the history of photography is understood

The Indigenous Lens? Markus Ritter, Staci G. Scheiwiller, 2017-12-18 The historiography of early photography has scarcely examined Islamic countries in the Near and Middle East although the new technique was adopted very quickly there by the 1840s Which regional local and global aspects can be made evident What role did autochthonous image and art traditions have and which specific functions did photography meet since its introduction This collective volume deals with examples from Iran the Ottoman Empire and the Arab lands and with the question of local specifics or an indigenous lens The contributions broach the issues of regional histories of photography local photographers specific themes and practices and historical collections in these countries They offer for the first time in book form a cross section through a developing field of the history of photography

Photography, History, Difference Tanya Sheehan, 2014-12-02 Over the past decade historical studies of photography have embraced a variety of cultural and disciplinary approaches to the medium while shedding light on non Western vernacular and other photographic practices outside the Euro American canon Photography History Difference brings together an international group of scholars to reflect on contemporary efforts to take a different approach to photography and its histories What are the benefits and challenges of writing a consolidated global history of photography How do they compare with those of producing more circumscribed regional or thematic histories In what ways does the recent emphasis on geographic and national specificity encourage or exclude attention to other forms of difference such as race class gender and sexuality Do studies of other photographs ultimately necessitate the adoption of nontraditional methodologies or are there contexts in which such differentiation can be intellectually unproductive and politically suspect The contributors to the volume explore these and other questions through historical case studies interpretive surveys of recent historiography criticism and museum practices and creative proposals to rethink the connections between photography history and difference A thought provoking collection of essays that represents new ways of thinking about photography and its histories It will appeal to a broad readership among those interested in art history visual culture media studies and social history
