Angels of Reality David Michael Hertz, 1993 In this exciting new book David Michael Hertz demonstrates how three major artists Frank Lloyd Wright Wallace Stevens and Charles Ives were influenced by Emerson's nineteenth century transcendentalism By focusing on the relative statements of the artists themselves Hertz shows that Emerson's belief that all things are in flux including matter and spirit had direct bearing on the form and content of their works Hertz writes the book as a meditation on the condition of the artist in America including biographical and historical information as well as his own interpretations of the three artists' works In Part 1 he examines the emerging creative mind of the architect poet and composer citing Emerson as the central figure who through his essays influenced each of them By tracing their development as powerful and original thinkers Hertz examines the processes that enabled them to become unique In Part 2 he connects Emerson Wright Stevens and Ives through a shared ideology evident both in their critical statements and in their creative work He shows how all three artists had specific documented knowledge of Emerson's major works Their pragmatism their preoccupation with the primacy of the senses their predilection for analogy and loose metaphor their dedication to individuality and self reliance and their eclecticism and conception of originality were shared traits and beliefs gleaned from Emerson Hertz is the first writer to bring these four major American figures together in a single work He makes it clear that Emersonianism reaches far into twentieth century American culture and into the realms of art and music as well as literature This book will interest not only Emerson Wright Stevens and Ives scholars but other individuals involved in the arts the humanities and interdisciplinary studies as well

*The Simple Life* David E. Shi, 2001 Looking across three centuries of want and prosperity war and peace this work introduces a cast of practitioners and proponents of the simple life among them Thomas Jefferson Scott and Helen Nearing Jimmy Carter and Jane Addams It finds that nothing is simple about our mercurial devotion to the ideal of plain living and high thinking Though we may hedge a bit in practice and are now and then driven by motives no deeper than nostalgia this work stresses that the diverse efforts to avoid anxious social striving and compulsive materialism have been essential to the nation's spiritual health

American Architects and the Mechanics of Fame Roxanne Kuter Williamson, 2014-03-07 Why does one talented individual win lasting recognition in a particular field while another equally talented person does not While there are many possible reasons one obvious answer is that something more than talent is requisite to produce fame The something more in the field of architecture asserts Roxanne Williamson is the

association with a famous architect at the moment he or she first receives major publicity or designs the building for which he or she will eventually be celebrated In this study of more than six hundred American architects who have achieved a place in architectural histories Williamson finds that only a small minority do not fit the right person right time pattern She traces the apprenticeship connection in case studies of Louis Sullivan Frank Lloyd Wright Henry Hobson Richardson the firm of McKim Mead White Latrobe and his descendants the Bulfinch and Renwick Lines the European immigrant masters and Louis Kahn Although she acknowledges and discusses the importance of family connections the right schools self promotion scholarships design competition awards and promotion by important journals Williamson maintains that the apprenticeship connection is the single most important predictor of architectural fame She offers the intriguing hypothesis that what is transferred in the relationship is not a particular style or approach but rather the courage and self confidence to be true to one s own vision Perhaps she says this is the case in all the arts American Architects and the Mechanics of Fame is sure to provoke thought and comment in architecture and other creative fields
