**Why Minorities Play or Don't Play Soccer** Kausik Bandyopadhyay, 2013-09-13 Soccer the most popular mass spectator sport in the world has always remained a marker of identities of various sorts Behind the facade of its obvious entertainment aspect it has proved to be a perpetuating reflector of nationalism ethnicity community or communal identity and cultural specificity Naturally therefore the game is a complex representative of minorities status especially in countries where minorities play a crucial role in political social cultural or economic life The question is also important since in many nations success in sports like soccer has been used as an instrument for assimilation or to promote an alternative brand of

nationalism Thus Jewish teams in pre Second World War Europe were set up to promote the idea of a muscular Jewish identity Similarly in apartheid South Africa soccer became the game of the black majority since it was excluded from the two principal games of the country rugby and cricket In India on the other hand the Muslim minorities under colonial rule appropriated soccer to assert their community identity The book examines why in certain countries minorities chose to take up the sport while in others they backed away from participating in the game or alternatively set up their own leagues and practised self exclusion The book examines European countries like the Netherlands England and France the USA Africa Australia and the larger countries of Asia particularly India This book was previously published as a special issue of Soccer and Society
