Anderson, 1976-01-01 Describes some of the world's most famous fires including the Ringling Brothers Circus fire in 1944 the great fire of London in 1666 and the disaster of the dirigible Hindenburg in 1936 Historical Disaster Experiences Gerrit Jasper Schenk, 2017-03-20 Historical disaster

research is still a young field This book discusses the experiences of natural disasters in different cultures from Europe across the Near East to Asia It focuses on the pre industrial era and on the question of similarities differences and transcultural dynamics in the cultural handling of natural disasters Which long lasting cultural patterns of perception interpretation and handling of disasters can be determined Have specific types of disasters changed the affected societies What have people learned from disasters and what not What adaptation and coping strategies existed Which natural societal and economic parameters play a part The book not only reveals the historical depth of present practices but also reveals possible comparisons that show globalization processes entanglements and exchanges of ideas and practices in pre modern times **Historical Disasters in Context** Andrea JANKU, Gerrit Schenk, Franz Mauelshagen, 2011-12-21 Growing concerns

about climate change and the increasing occurrence of ever more devastating natural disasters in some parts of the world and their consequences for human life not only in the immediately affected regions but for all of us have increased our desire to learn more about disaster experiences in the past How did disaster experiences impact on the development of modern sciences in the early modern era Why did religion continue to play such an important role in the encounter with disasters despite the strong trend towards secularization in the modern world What was the political role of disasters Historical Disasters in Context illustrates how past societies coped with a threatening environment how societies changed in response to disaster experiences and how disaster experiences were processed and communicated both locally and globally Particular emphasis is put on the realms of science religion and politics International case studies demonstrate that while there are huge differences across cultures in the way people and societies responded to disasters there are also many commonalities and interactions between different cultures that have the potential to alter the ways people prepare for and react to disasters in future To explain these relationships and highlight their significance is the purpose of this volume *History of the*

*World's Greatest Fires* George Consider Hale, 1905 Between Two Fires Stephen J. Pyne, 2015-10-15 From a fire policy of prevention at all costs to today's restored burning Between Two Fires is America's history channeled through the story of wildland fire management Stephen J Pyne tells of a fire revolution that began in the 1960s as a reaction to simple suppression and single agency hegemony and then matured into more enlightened programs of fire management It describes the counterrevolution of the 1980s that stalled the movement the revival of reform after 1994 and the fire scene that has evolved since then Pyne is uniquely qualified to tell America's fire story The author of more than a score of books he has told fire's history in the United States Australia Canada Europe and the Earth overall In his earlier life he spent fifteen seasons

with the North Rim Longshots at Grand Canyon National Park In *Between Two Fires* Pyne recounts how after the Great Fires of 1910 a policy of fire suppression spread from America's founding corps of foresters into a national policy that manifested itself as a costly all out war on fire After fifty years of attempted fire suppression a revolution in thinking led to a more pluralistic strategy for fire's restoration The revolution succeeded in displacing suppression as a sole strategy but it has failed to fully integrate fire and land management and has fallen short of its goals Today the nation's backcountry and increasingly its exurban fringe are threatened by larger and more damaging burns fire agencies are scrambling for funds firefighters continue to die and the country seems unable to come to grips with the fundamentals behind a rising tide of megafires Pyne has once again constructed a history of record that will shape our next century of fire management *Between Two Fires* is a story of ideas institutions and fires It's America's story told through the nation's flames Proceedings of the ...
