than half a century broadcast recordings have reflected an important aspect of our culture and history. An increasing number of archivists and private collectors have restored and exchanged radio and television materials. However, despite the awareness of these primary resource materials, there is still some reluctance to utilize this aural and visual history resource. A part of this reluctance is due to the fact that little is known about the existence of many collections throughout the nation. This volume provides a comprehensive directory of electronic media archives in the United States and Canada. It describes each collection, focusing on its speciality, providing the serious researcher with ready access information to these electronic media program resources. Focusing on both private and institutional collections, it is organized by state and city with indexes to provide the scholar with subject and location of specific topics of interest.

*On the Evolution of Media* Carlos A. Scolari, 2023-06-23 This book describes the lifecycle of media in the context of the media ecology, presenting a general theoretical framework and a series of methodological procedures to support the construction of an eco-evolutionary approach to media change. Focusing on a series of processes: emergence, competition, dominance, hybridization, adaptation, extinction, this book goes beyond a chronological approach to propose a reticulated and multi-layered conception of media evolution. If media evolution is a network, what are the relationships between media species like? What happens when a new media emerges into the media ecology? How do new media influence the old ones? Can media become extinct? How do media adapt when the social and economic context changes? How can media evolution be analysed? What kinds of quantitative and qualitative techniques can be applied in media evolution research? By presenting an innovative research approach and theoretical framework to media studies, this book will be of keen interest to scholars and graduate students of new media, media history and theory, philosophy of technology, mass communication and organisational studies.

*Mass Communication and Journalism* Gail Robinson, 2019-09-06 The study of mass communication is often associated with the practical applications of journalism: Print media, television and radio broadcasting, film, public relations or advertising. With the diversification of media options, the study of communication has extended to include social media and new media, which have stronger feedback models than traditional media sources. While the field of mass communication is continually evolving, the following four fields are generally considered the major areas of study within mass communication. They exist in different forms and configurations at different schools or universities but are in some form practiced at most institutions that study mass communication. Advertising in relation to mass communication refers to marketing a product or service in a persuasive manner that encourages the audience to buy the product or use the service. The presented book has been written in view of tremendous changes being marked in almost each and every sphere of life in 21st century, and the role of media has also made a significant change. Its changing role and its perception are being deliberately marked. The book carries out comprehensive analysis of above mentioned facts.
