Historied Thought Constructed World A Conceptual Primer For The Turn Of The Millennium:

The Critical Margolis Joseph Margolis, 2021-06-01 Pragmatism's revival since 1980 can be credited to several thinkers among them the longtime professor of philosophy at Temple University Joseph Margolis. The Critical Margolis collects within one volume more than a dozen of his essential writings allowing readers to become familiar with his important contributions to core areas of philosophy where he has controversially challenged scientific analytic and continental traditions. During a period when sharp divides animate intellectual debates realism or idealism matter or mind causality or freedom machines or persons facts or values cognition or emotion and the like Margolis dissolves false dichotomies and reconstructs philosophy itself. Prominent philosophers of the second half of the twentieth century from Quine Danto and Putnam to Derrida Rorty and Brandom along with a host of similarly significant thinkers are targets of Margolis's critiques. If there could be a comprehensive volume of pragmatism for today and tomorrow The Critical Margolis shall serve.

Cultural Revolutions

Lawrence E. Cahoon, 2007-05-02 In this probing examination of the meaning and function of culture in contemporary society Lawrence Cahoon argues that reason itself is cultural but no less reasonable for it. While recent political and philosophical movements have recognized that cognition the self and politics are embedded in culture most fail to appreciate the deep changes in rationalism and liberal theory this implies others leap directly into relativism and nearly all fail to define culture. Cultural Revolutions systematically defines culture gauges the consequences of the ineradicably cultural nature of cognition and action yet argues that none of this implies relativism. After showing where other new culturalists have gone wrong Cahoon offers his own definition of culture as teleologically organized practices artifacts and narratives and analyzes the notion of cultural membership in relation to race ethnicity and primordialism. He provides a theory of culture's role in how we form our sense of reality and argues that the proper conception of culture dissolves the problem of cultural relativism. Applying this perspective to Islamic fundamentalism Cahoon identifies its conflict with the West as representing the break between two of three historically distinctive forms of reason. Rather than being irrational he shows fundamentalism embodies a rationality only recently devalued but not entirely abandoned by the West. The persistence of plural forms of reason suggests that modernization in various world cultures is compatible with continued even magnified cultural differences.

The Cultural Space of the Arts and the Infelicities of Reductionism Joseph Margolis, 2010-05-07 Joseph Margolis known for his considerable contributions to the philosophy of art and aesthetics pragmatism and American philosophy has focused primarily on the troublesome concepts of culture history language agency art interpretation and the human person or self. For Margolis the signal problem has always been the same how can we distinguish between physical nature and human culture. How do these realms relate. The Cultural Space of the Arts and the Infelicities of Reductionism identifies a conceptual tendency that can be drawn from the work of the twentieth century's best known analytic philosophers of art Arthur Danto Richard Wollheim Kendall Walton Nelson Goodman Monroe Beardsley Noël Carroll and Jerrold Levinson among

others This trend threatens to impoverish our grasp and appreciation of the arts by failing to do justice to the culturally informed nature of the arts themselves Through his analysis Margolis sets out to retrieve an adequate picture of the essential differences between physical nature and human culture particularly through language history meaning significance the emergence of the human self or person and the essential features of human life all to explain how such difference bears on our perception of paintings and literature Clearly argued and provocatively engaging Margolis's work reestablishes what is essential to a productive encounter with art

Jonathan's Loves, David's Laments Dirk von der Horst, 2017-03-24

Jonathan's Loves David's Laments uses early modern musical interpretations of David's Lament over Saul and Jonathan to deepen the historicist foundations of contemporary feminist and gay relational theologies After laying out how gay theologian Gary David Comstock connects the story of David and Jonathan to the theology of lesbian theologian Carter Heyward the argument interrogates both theological and exegetical problems in making those connections which include contradictory theological stances with regard to modernity and history as well as the indeterminacy of the biblical text Early modern musical interpretations of the text allow for a double move of engaging the texts through a sensual medium thus reinforcing queer possibilities for meaning making from the biblical text and staying attuned to the fact that the history of interpretation reinforces the indeterminacy of the text thus keeping queer interpretations aware of the relativizing function of historical difference

Death and Finitude Sami Pihlström, 2016-09-21 Death and Finitude offers an examination and defense of a pragmatic transcendental anthropology applicable to the concepts of limit finitude and mortality that are constitutive of human life as we know it Sami Pihlström develops a special kind of philosophical anthropology a pragmatic yet transcendental examination of the human condition that interprets what is worth preserving in the tradition of transcendental philosophy in such a manner that this unusual combination will crucially enrich our understanding of a human problem we all share mortality In some sense all serious philosophy inevitably reflects on the human condition and is thus philosophical anthropology broadly conceived There can hardly be any more serious problem concerning the human condition than the problem of death Yet mainstream analytic contributions to the philosophy of death usually addresses death in general and it is far from obvious that such contributions are philosophically relevant in the sense of addressing the agony of an individual human being trying to understand their own mortal condition Continental philosophy of death may be frustrating in a different sense as it often fails to be conceptually as clear and argumentatively as rigorous as the analytic literature Claiming to address my being toward death such contributions may also fail to speak to the mortal individual if they end up in endless pseudo philosophical jargon It is against this background of frustration that Death and Finitude contributes to humanity's ongoing reflections on death dying and mortality from a pragmatist yet transcendental perspective seeking to accommodate these topics within a broader philosophical anthropology The book is primarily intended for academic philosophers but the potential readership includes not only scholars but also both graduate students and advanced undergraduates as well as

general educated readers It is relevant to the concerns of philosophers specializing in transcendental philosophy philosophical anthropology pragmatism Wittgenstein and the philosophy of religion As the book may be said to be an attempt to philosophize historically it is in principle of interest to both systematically and historically oriented philosophers and students

The Philosophy of Rhythm Peter Cheyne, Andy Hamilton, Max Paddison, 2019 Rhythm is the fundamental pulse that animates poetry music and dance across all cultures And yet the recent explosion of scholarly interest across disciplines in the aural dimensions of aesthetic experience particularly in sociology cultural and media theory and literary studies has yet to explore this fundamental category This book furthers the discussion of rhythm beyond the discrete conceptual domains and technical vocabularies of musicology and prosody With original essays by philosophers psychologists musicians literary theorists and ethno musicologists *The Philosophy of Rhythm* opens up wider and plural perspectives examining formal affinities between the historically interconnected fields of music dance and poetry while addressing key concepts such as embodiment movement pulse and performance Volume editors Peter Cheyne Andy Hamilton and Max Paddison bring together a range of key questions What is the distinction between rhythm and pulse What is the relationship between everyday embodied experience and the specific experience of music dance and poetry Can aesthetics offer an understanding of rhythm that helps inform our responses to visual and other arts as well as music dance and poetry And what is the relation between psychological conceptions of entrainment and the humane concept of rhythm and meter Overall *The Philosophy of Rhythm* appeals across disciplinary boundaries providing a unique overview of a neglected aspect of aesthetic experience

Defending Realism Guido Bonino, Greg Jesson, Javier Cumpa, 2014-12-11 The essays in this volume first presented at an international conference held at the University of Urbino Italy in 2011 explore the different senses of realism arguing both for and against its distinctive theses and considering these senses from a historical point of view The first sense is the metaphysical thesis that whatever exists does so and has the properties it has independently of whether it is the object of a person's thought or perception The second sense of realism is epistemological wherein realism claims that in some cases it is possible to know the world as it exists in and of itself A third sense which has become known as ontological realism states that universals exist as well as individuals The essays collected here make new contributions to these fundamental philosophical issues which have largely defined western analytic philosophy from Plato and Aristotle to the present day

The Empirical and the Transcendental Bina Gupta, 2000 In this work a distinguished international group of philosophers offers critical assessments of eminent philosopher J N Mohanty's work on phenomenology and Indian philosophy The concluding chapter by Mohanty responds to the critics and contains his assessment of his own philosophical position

Historical Information Science Lawrence J. McCrank, 2001 Here is an extensive review and bibliographic essay backed by 5 000 citations about developments in information technology since the advent of personal computing and the convergence of the disciplines Its focus is on the access preservation and analysis of historical information primarily in

electronic form and the relationships between new methodology and instructional media technique and research trends in library special collections digital libraries electronic and data archives and museums **Is Science Value Free?** Hugh Lacey, 2005-06-23 Exploring the role of values in scientific inquiry Hugh Lacey examines the nature and meaning of values and looks at challenges to the view posed by postmodernists feminists radical ecologists Third World advocates and religious fundamentalists that science is value free He also focuses on discussions of development especially in Third World countries This paperback edition includes a new preface Perception, Cognition and Aesthetics Dena Shottenkirk, Manuel Curado, Steven S. Gouveia, 2019-04-29 This volume addresses key questions related to how content in thought is derived from perceptual experience It includes chapters that focus on single issues on perception and cognition as well as others that relate these issues to an important social construct that involves both perceptual experience and cognitive activities aesthetics While the volume includes many diverse views several prominent themes unite the individual essays a challenge to the notion of the discreet and non temporal unit of perception a challenge to the traditional divide between perception and cognition and a challenge to the traditional divide between unconscious and conscious intentionality Additionally the chapters discuss the content of perceptual experience the value of traditional notions of content disjunctivism adverbialism and phenomenal experience The final section of essays dealing with perception and cognition in aesthetics features work in experimental aesthetics and unique perspectives from artists and gallerists working outside of philosophy Perception Cognition and Aesthetics is a timely volume that offers a range of unique perspectives on debates in philosophy of mind surrounding perception and cognition It will also appeal to scholars working in aesthetics and art theory who are interested in the ways these debates influence our understanding of art **The Continuum Companion to Pragmatism** Sami Pihlström, 2011-06-30 The Continuum Companion to Pragmatism offers the definitive guide to a key area of contemporary philosophy The book covers all the fundamental questions asked by pragmatism areas that have continued to attract interest historically as well as topics that have emerged more recently as active areas of research Twelve specially commissioned essays from an international team of experts reveal where important work continues to be done in the area and most valuably the exciting new directions the field is taking The Companion explores issues pertaining to aesthetics economics education ethics history law metaphysics politics race religion science and technology language and social theory Featuring a series of indispensable research tools including an A to Z of key terms and concepts a chronology a detailed list of resources and a fully annotated bibliography this is the essential reference tool for anyone working in contemporary pragmatism or modern American philosophy more generally The Metaphysics of Religion Michael S. Jones, 2006 Lucian Blaga was an early twentieth century European philosopher whose work was suppressed at the height of his career by the creation of the Romanian Socialist Republic Blaga's philosophical writings are rich and creative spanning metaphysics epistemology philosophy of science philosophical anthropology aesthetics philosophy of culture philosophy of history and philosophy of

religion Mircea Eliade wrote that Blaga was the most gifted and critical original thinker in the history of Romanian philosophy. Because of historical circumstances Blaga's philosophy has not become known outside of his own country although within Romania it continues to be read and discussed. Were it to become known outside of Romania Blaga's philosophy could provide interesting contributions to contemporary philosophical discussions. The thesis of this book is that Blaga's philosophy can make valuable contributions to contemporary Anglo American philosophy. In order to support this thesis Blaga's philosophical system is explained in detail so that the reader may see how it can be applied to a variety of philosophical issues: philosophy of religion in order to demonstrate that it can contribute to contemporary Anglo American discussions. Michael S. Jones is Assistant Professor of Philosophy at Liberty University. Truth David Wood, José Medina, 2008-04-15. Setting the stage with a selection of readings from important nineteenth century philosophers, this reader on truth puts in conversation some of the main philosophical figures from the twentieth century in the analytic, continental, and pragmatist traditions. Focuses on the value or normativity of truth through exposing the dialogues between different schools of thought. Features philosophical figures from the twentieth century in the analytic, continental, and pragmatist traditions. Topics addressed include the normative relation between truth and subjectivity, consensus, art, testimony, power, and critique. Includes essays by Kierkegaard, Nietzsche, James, Heidegger, Merleau-Ponty, Wittgenstein, Levinas, Arendt, Foucault, Rorty, Davidson, Habermas, Derrida, and many others. **Philosophy, Psychology, and Psychologism** Dale Jacquette, 2006-04-11. This book presents a remarkable diversity of contemporary opinions on the prospects of addressing philosophical topics from a psychological perspective. It considers the history and philosophical merits of psychologism and looks systematically at psychologism in phenomenology, cognitive science, epistemology, logic, philosophy of language, philosophical semantics, and artificial intelligence. Painting Borges Jorge J. E. Gracia, 2012-02-01. A provocative examination of the artistic interpretation of twelve of Borges's most famous stories. **Are Cyborgs Persons?** Aleksandra Łukaszewicz Alcaraz, 2020-12-22. This book presents argumentation for an evolutionary continuity between human persons and cyborg persons based on the thought of Joseph Margolis. Relying on concepts of cultural realism and post-Darwinism, Aleksandra Łukaszewicz Alcaraz redefines the notion of the person rather than a human and discusses the various issues of human body enhancement and online implants transforming modes of perception, cognition, and communication. She argues that new kinds of embodiment should not make acquiring the status of the person impossible and different kinds of embodiments may be accepted socially and culturally. She proposes we consider ethical problems of agency and responsibility critically, approaching vitalist, posthuman ethics, and rethinking the metaphysical standing of normativity to create space for possible cyborgian ethics that may be executed in an Extended Republic of Humanity. *The Disordered Body* Suzanne E. Hatty, James Hatty, 1999-11-04. *The Disordered Body* presents a fascinating look at how three epidemics of the medieval and Early Renaissance period in Western Europe shaped and altered conceptions of the human body in ways that continue today.

Authors Suzanne E Hatty and James Hatty show the ways in which concepts of the disordered body relate to constructions of disease In so doing they establish a historical link between the discourses of the disordered body and the constructs of gender The ideas of embodiment contagion and social space are placed in historical context and the authors argue that our current anxieties about bodies and places have important historical precedents They show how the cultural practices of embodied social interaction have been shaped by disease especially epidemics

Relativism and Intentionalism in Interpretation Kalle Puolakka, 2011-08-16 The question of the relativity of interpretations and the relevance of the author's intentions for interpretation has been at the center of controversy for the past century in different philosophical traditions but there has been very little effort to examine the different ways this question has been addressed in contemporary philosophy within the space of a single book *Relativism and Intentionalism in Interpretation* Davidson Hermeneutics and Pragmatism brings diverse philosophical viewpoints to bear on these issues addressing them through analytic philosophy hermeneutics and pragmatism Kalle Puolakka develops a view of interpretation drawing on Donald Davidson's late philosophy of language and mind defending the role of authorial intentions against criticisms intentionalist views have received particularly in hermeneutics and pragmatism In addition to relativism and intentionalism the book discusses such issues as the role of imagination and aesthetic experience in interpretation and it presents a thorough critique of hermeneutic conceptions of interpretation which emphasize the essential historical nature of our understanding *Relativism and Intentionalism in Interpretation* shows how it is possible to combine a pluralistic attitude towards art without resurrecting the role of the author's intentions in interpretation
