Halperin, 2021-08-31 Tsar Ivan the Terrible Ivan IV 1533 1584 is one of the most controversial rulers in Russian history infamous for his cruelty He was the first Russian ruler to use mass terror as a political instrument and the only Russian ruler to do so before Stalin Comparisons of Ivan to Stalin only exacerbated the politicization of his image Russians have never agreed on his role in Russian history but his reign is too important to ignore Since the abolition of censorship in 1991 professional historians and amateurs have grappled with this problem Some authors have manipulated that image to serve political and cultural agendas This book explores Russia s contradictory historical memory of Ivan in scholarly pedagogical and political publications

The True Story of Human Evolutionary Genesis Elvis Newman, 2015-01-20 No doubt history is littered with theories and beliefs that not only proved to be wrong in the end but also costly as far as the human search for truth and development is concerned The view that the Earth was the physical and the biological center of the Universe was one such failed theory one that cost many famous scientists most of their lives and held back societies everywhere for decades or hundreds of years behind what is now considered a given truth In the current work under consideration religion and evolution theories come under scrutiny in light of recent scientific facts that dispute their most important claims about the origins of the species In *The True Story of Human Evolutionary Genesis* Elvis Newman presents both astounding facts and findings about the human genome as well as paradigm shifting theories emanating from Zecharia Sitchin s work around the Sumerian clay tablets

and apparent necessity of such narrative strategies The essays address a variety of issues revolving around the study of cryptic aspects of discourses ranging from theoretical approaches to secretive narratives of history cultural encoding and decoding of cryptohistories microhistories focusing on historical mysteries and mythicised pasts and processes of mythicization of the past as well as histories and theories of chance and manipulation Among its specific subjects Cryptohistories features discussions on the reasons why certain quasi historical narratives do not reach the status of history on conspiracy theories analysed from the perspective of contemporary video games on the paradoxes of truth and falsehood in history on parasitology as a cryptohistorical discourse on the codes of Victorian floriography on cases of cross dressing and sartorial camouflage on the Vietnam War MIAs on manipulations lying at the core of contemporary Bulgarian identity on the search for a racial utopia in the American South and on the fiction of Beryl Bainbridge as a form of cryptohistorical literature

Gleb Nosovskiy, Anatoly Fomenko, 2018-10-25 History Fiction frees Western Europe By the middle of XVIth century the prime political agenda of Western Europe that has reached superiority in Sciences and Technologies but was still inferior militarily was to free itself from the control of the Great Horde The Great Horde Empire was expanding in XIV XVI centuries all over Eurasia building roads and castles collecting taxes and tributes to erect Pyramids of Gizeh Temples of Imperial graveyards in Egypt building palaces in Persia and India and guilting the domes of Cathedrals in Russia To survive in the Little Ice Age of 1350 1820 the impoverished West European provinces of Empire simply had to invent the compass telescope clocks printing They turned step by step religion into a culture alchemy into chemistry astrology into astronomy and rewrote history in their favour nearly wiping out the memory of Evil Empire The concerted effort of the Aristocracy black and white Catholic clergy Protestants Humanists and Scientists in the creation and dissemination of the ideas of the fictional Ancient World and Dark Ages during the XV XVII centuries served this agenda perfectly The primary corollaries related in the present book are a new interpretation of Western European history a new interpretation of Chinese history a new interpretation of Egyptian history a solution of one of the hardest historical riddles the identity of the Etruscans Facts are stubborn things English proverb **Tartaria - Jerusalem is in Europe** David Ewing Jr, 2023-03-26 Where is Jerusalem Is it really in the Middle East Or Is Jerusalem in Europe This book will show that the Jerusalem in the Bible is not in the Middle East but is actually in Europe The Jerusalem in the Middle East is nothing but a fake and a scam created by politicians and businessmen The history of Jerusalem is about money and power and is full of lies

Chrysalis II Jozef Borovský, 2019-10-29 This book does not claim absolute truths but it speaks for those who can no longer speak for themselves by the histories they witnessed wrote about and which defined their ancestors and descendants including the most powerful woman that ever lived Countess Elizabeth Bathory She tried to change the world she paradoxically succeeded and failed But what drove her What did she know we do not What is her history To begin to understand all this one must travel back in time to when it began when truth first became obscured and when European society Western culture went horribly wrong It is why her world was the way it was Today historiological truths of European Medieval Dark Ages at best exist as dim flashes of information in ancient manuscripts A very interconnected European medieval history has much more but inconvenient historiological information to inform us of events names places and dates but like a giant complicated jigsaw puzzle Unfortunately many pieces are still missing none more so than that of Carpathia Consequently an incomplete theoretical picture of historical reality remains There's a reason for it Throughout history Europeans struggled for Humility Humanity and Liberty but only Carpathian Ungars maintained and struggled to keep it for more than a millennium from about 600 to 1711 Their history has gone missing supplanted by myths Their greatest leaders are caricatures of Gothic horror literature and their greatest traitors are their heroes Their monuments are everywhere Carpathia's history does not exist in Western consciousness What is it about Carpathia we are not supposed to know Its missing medieval jigsaw puzzle pieces when liberated from obscure archives then reassembled and inserted into the macro context of centuries however allows us to understand why This book is a sequel to Chrysalis I Metamorphosis of Odium The time period covered is roughly from the early eleventh to late fourteenth centuries The book explores the complexity of the Late Medieval period from a Carpathian Slavic Turkic perspective An extremist elitist European world sunk deeper into human depravity of European and Middle Eastern genocides and of material greed These depravities gave the rise to Hohenstaufen Arpad Bathory and Osman dynasties Together they kindled a period of philosophical awakening a fundamental reformation of the feudal order Thanks to them the supreme Vatican lost control over its Holy Roman Empire for the first time Such heresies had responses too the Apostolic Inquisition Avignon Papacy Mongol Invasions of Europe and the Middle East and the extermination of non compliant ruling European dynasties namely Hohenstaufen and Arpad Only the Bathorys survived but they had to endure a debilitating war to do so One dynasty Habsburg sought to profit from the chaos Indeed they did Their arrival marks the end of the first great pendulum swing of European cultural metamorphosis Soon it would be Elizabeth Bathory's duty to change the world This is a story of us

The Lost Millennium Florin Diacu, 2010-07-23 Have you ever wondered how we really know what year it is Part detective story part conspiracy theory part scientific history The Lost Millennium explores the astonishing possibility that our calendar is out by a thousand years A chance conversation at a

conference in Mexico started mathematician Florin Diacu on an amazing journey to make sense of one of the strangest and if true most revolutionary theories you'll ever encounter To understand how scientists could be sceptical about what year it is Florin Diacu explores the fascinating history of chronology from Egyptian horoscopes to the work of Isaac Newton with cameos by Voltaire and Edmund Halley making the startling discovery that our calendar is far from ironclad It all depends rather on the dating of ancient events about which there is real controversy At once accessible and profound *The Lost Millennium* examines the arguments of present day chronological revisionists such as the Russian scholar Anatoli Fomenko who claims that our system of dating is horribly askew Fomenko cites evidence from ancient astronomy linguistics and cartography and a crucial manuscript by Ptolemy staking his scientific prestige on a theory so controversial that it will change the way you think about time history and the calendar on your wall The field has also inspired its share of now discredited cranks such as Immanuel Velikovsky a media celebrity of the 1950s His notorious book *Worlds in Collision* argued that biblical events are incorrectly dated Beautifully written and peopled with fascinating characters from past and present *The Lost Millennium* is essential reading for anyone who believes they're living in the year 2005 Mind and Matter Günther Friesinger, Johannes Grenzfurthner, Thomas Ballhausen, 2014-03-15 The terms mind and matter appear to signify two concepts irreplaceable and permanent in nature The increasing challenges and modes of reflection of digital life and cultural creation have contributed to a productive doubting of said dichotomy Net culture has exposed the causality of the two only superficially contradictory systems and translated these into new technological realities This publication using an interdisciplinary approach strives to investigate the entanglement of cultural artistic and technical praxis to document the developments to clarify the status quo of the scientific community in a practical and exemplary fashion and to enable glimpses of potential future developments *Deception and Detection in Eighteenth-century Britain* John T. Lynch, 2008 In the first extended treatment of the debates surrounding public deception in eighteenth century Britain Jack Lynch contends that forgery and fraud make explicit the usually unspoken grounds on which Britons made sense of their world While taking up the critical philosophical questions surrounding fraud Lynch shows that fakery takes us to the heart of eighteenth century values as they relate to evidence perception and memory the relationship between art and life historicism and human motivation **The Nerthus Claim** Gardenstone, 2012 Hardly any other scripture from the time of the Roman Empire of about two thousand years ago has stirred up so much excited attention as the *Germania* of Tacitus Only from this ethnographic essay do we know the name Nerthus a goddess who should have been venerated by seven smaller Germanic tribes Much of what the *Germania* tells us is meanwhile highly doubted The 1st century original no longer exists the intact copies were on their part copied from older *Germania* texts which were also just copies The existing copies are not identical to each other That causes many question marks which also concern this goddess Nerthus This book is an attempt to place some exclamation marks in front of that and is sometimes deliberately provocative *Deception and Detection in*

Eighteenth-Century Britain Jack Lynch, 2016-12-05 In the first extended treatment of the debates surrounding public deception in eighteenth century Britain Jack Lynch contends that forgery fakery and fraud make explicit the usually unspoken grounds on which Britons made sense of their world Confrontations with inauthenticity in other words bring tacitly understood conceptions of reality to the surface Drawing on a wide range of contemporary print and manuscript sources not only books and pamphlets but ballads comic prints legal proceedings letters and diaries Lynch focuses on the debates they provoked rather than the forgers themselves He offers a comprehensive treatment of the criticism surrounding fraud in most of the noteworthy controversies of the long eighteenth century To this end his study is structured around topics related to the arguments over deception in Britain whether they concerned George Psalmanazar's Formosan hoax at the beginning of the eighteenth century or William Henry Ireland's Shakespearean imposture at the end Beginning with the question of what constitutes deception and ending with an illuminating chapter on what was at stake in these debates for eighteenth century British thinkers Lynch's accessibly written study takes the reader through the means whether simple sophisticated or tortuously argued by which partisans on both sides struggled to define which of the apparent contradictions were sufficient to disqualify a claim to authenticity Fakery Lynch persuasively argues transports us to the heart of eighteenth century notions of the value of evidence of the mechanisms of perception and memory of the relationship between art and life of historicism and of human motivation

The Issue With Chronology Anatoly Fomenko, 2017-08-20 NASA research of earth moon mechanics of late astrophysicist Robert Newton leads Russian mathematicians to a breakthrough in the chronology of the world history that crowns 30 years of meticulous and extensive research This research was actually an anecdotal byproduct of Russian American competition in Moon exploration The *The Issue with Chronology* is the first volume in *History Fiction or Science* e series the fundamental oeuvre that exposes and expounds the numerous in veracities of the traditional version of history The E series *History Fiction or Science* contains data and conclusions that aren't anything short of revolutionary The alternatives offered to classical history are stunning unorthodox to the extent of being labeled heretical by virtually every scholar of history In *The Issue with Chronology* we are reminded of when the contemporary chronological scale was created and by whom with the culprits named as the XVI XVII century clergy that was in charge of all matters historical in that age We also learn that the consensual model of history had prominent critics ever since its creation among them such names as Sir Isaac Newton and Jean Hardouin chief librarian of Louis XIV the Sun King of France and collector of Louvre museum The author dissects every historical age and analyzed the data from every source imaginable Roman and Egyptian chronology take a good beating and it goes rapidly downhill from there Poggio Bracciolini and Petrarch take the blame for creating the legend of a mythical Classical age that never was The Biblical events are moved a lot closer to us historically as well as geographically the Biblical Jerusalem being identified with the mediaeval Constantinople for instance The New and the Old Testament swap their positions on the chronological scale both exposed as referring to mediaeval

events Our perception of history begins to change dramatically even before we re through with The Issue with Chronology On one hand Dr Fomenko et al call everybody historians including to apply the Occam s razor to the world history On the other the scientists Dr Fomenko et al are ready to recognize their alleged mistakes of New Chronology theory to repent and to retract if and only if radiocarbon dating methods or dendrochronology pass a rigorous anonymous black box tests verifiable astronomic data refutes their results on solar eclipses it is proven irrefutably that Robert Newton NASA astrophysicist was wrong calling ancient Ptolemy the greatest con man in history in his Crime of Claudius Ptolemy The radiocarbon dating labs run their very costly tests only if the sample to be dated is accompanied with an idea of age pronounced by historians on basis of subjective mmm gutfeeling Radiocarbon labs happily bill for their fiddling and fine tuning with C14 hardware to get the dates to order of historians The first circular calibration curve was made by mid fifties by Radiolab of Arizona Univesity with samples from Ancient Egypt provided by the expedition of the same University Circulus Vicious is perfect Connect the dots PS Prescient Saint Augustine warned be wary of mathematicians particularly when they speak the truth That s why Jesuits took over control of Chronology in XVI cy when it was a part of mathematics Now the mathematicians take it back The New Chronology theory based on exact sciences says that all events that took place allegedly over 1300 years ago as well as real persons who took part in them are simply unknown to us Dr Anatoly Fomenko is a Full Member Academician of the Russian Academy of Sciences Full Member of the Russian Academy of Natural Sciences Full Member of the International Higher Education Academy of Sciences Doctor of Physics and Mathematics Professor Head of the Moscow State University Department of Mathematics and Mechanics
