

# Writing Research Paper Introductions

**Purpose of Research Paper Introduction:** The introduction leads the reader from a general research issue or problem to your specific area of research. It puts your research question in context by explaining the significance of the research being conducted. This is usually done by summarizing current understanding (research to date) and background information about the topic. This is followed by a statement of the purpose of your research issue or problem. This is sometimes followed by a hypothesis or a set of questions you attempt to answer in your research. You may also explain your methodology (how you will research this issue) and explain what your study can reveal. It also may contain a summary of the structure of the rest of the paper.

**Questions Answered in the Research Paper Introduction:** Think of the introduction as a mental road map that answers these four questions:

1. What am I studying?
2. Why is this topic important to investigate?
3. What do we already know about this topic or what have other experts discovered about the topic?
4. How will my research advance new knowledge or new ways of understanding?

## Components of the Research Paper Introduction:

**Component #1:** Establish the problem or issue you want to research:

- Highlight the importance of the problem/issue, and/or
- Make general statements about the problem/issue, and/or
- Present an overview on current research on the issue or problem.

**Component #2:** Provide an overview of existing thinking about and/or research into your research problem.

**Component #3:** Identify a gap, problems or unresolved issues in the existing knowledge/research that your research can fill or identify a research focus that will be useful:

- “The previous research has mistakenly assumed that....” or “Although most experts in the field believe ....., they have overlooked ...”
- “None of the previous research has examined .....
- “Despite prior observations of voter behavior in local elections in urban Detroit, it remains unclear why do some single mothers choose to avoid...” and/or

*Writing the History of Mount Lebanon* Mouannes Hojairi,2021-10-05 A meticulous deconstruction of Maronite history writing and the ways in which Lebanese nationalist myths have been invented and perpetuated by historians As a frequently contested territory Mount Lebanon has

an equally contested history one that is produced shaped and revised by as many players as those who molded the Lebanese state since its inception in 1920 The Lebanese Maronite Church has had more at stake in the process of history writing than any other group or institution It is arguably one of the most influential institutions in Lebanese history and definitely the most influential institution in the country at the moment of the state s birth Writing the History of Mount Lebanon traces the genealogy of Maronite identity by examining the historical traditions that shaped its contemporary manifestation It explores the presence of a tradition in Maronite Church historiography that was maintained by the historians of the Church whose claims and hypotheses ultimately defined the communal identity of the Maronites in Mount Lebanon and deeply influenced subsequent Lebanese national identity Rooted in a reexamination of the existing literature and bringing evidence to bear on this particular aspect of history writing in Lebanon it shows how early Maronite ecclesiastic historiography s plea for inclusion as a part of Catholic orthodoxy was transformed and recast in subsequent centuries by lay and secular historians into a demand for exclusion and exclusivity which in turn led to the rise of exclusivist political identities based on sectarian belonging in Mount Lebanon Ultimately Mouannes Hojairi shows how history writing is one of the main instruments in generating and perpetuating nationalist ideologies and how historians are central agents of nationality **Michael**

**Oakeshott and the Cambridge School on the History of Political Thought** Martyn P. Thompson, 2019-05-20 This book is a critique of Cambridge School Historical Contextualism as the currently dominant mode of history of political thought drawing upon Michael Oakeshott s analysis of the logic of historical enquiry While acknowledging that the early Cambridge School work represented a considerable advance towards genuinely historical histories of political thought this work identifies two major historiographical problems that have become increasingly acute The first is general an insufficiently rigorous understanding of the key concept of pastness necessarily presupposed in historical enquiry of all kinds The second is specific to histories of political thought a failure to do justice to the varieties of past political thinking especially differences between ideology and philosophy In addressing these problems the author offers a comprehensive account of the history of political thought that establishes the parameters not just of histories of ideological thinking but also of the much disputed character of histories of political philosophy Since rethinking history of political thought in Oakeshottian terms requires resisting current pressures to turn history into the servant of currently felt needs the book offers a sustained defence of the cultural value of modernist historical enquiry against its opponents An important work for political theorists historians of political thought and those researching intellectual history the philosophy of history and proposed new directions in contemporary historical studies *Careers in Art History* Association of Art Historians, 2013 For prospective undergraduate students of Art History or professionals looking to develop an existing art history career or move into the field *Careers in Art History* groups jobs by theme to show the range of careers available within certain sectors and how they interconnect This edition has also included more potential careers including less obvious roles such as advertising heritage tourism and

museum retail and reflected the changing job market with an extended entry on freelance work This edition also contains new sections with practical information on marketing yourself writing CVs and finding funding as well as updated further information sections accompanying each entry     Historiography Ernst Breisach,2007-12-30 In this pioneering work Ernst Breisach presents an effective well organized and concise account of the development of historiography in Western culture Neither a handbook nor an encyclopedia this up to date third edition narrates and interprets the development of historiography from its origins in Greek poetry to the present with compelling sections on postmodernism deconstructionism African American history women s history microhistory the Historikerstreit cultural history and more The definitive look at the writing of history by a historian Historiography provides key insights into some of the most important issues debates and innovations in modern historiography Praise for the first edition Breisach s comprehensive coverage of the subject and his clear presentation of the issues and the complexity of an evolving discipline easily make his work the best of its kind Lester D Stephens American Historical Review     *Making History* ,1998     *A Short Guide to Writing about History* Melvin E. Page,Brian J. Maxson,2023-03-27 This widely used guide for students has long emphasized the excitement of historical discovery rooted in writing about the past This new edition continues that emphasis while also affirming the contemporary significance of the search for truth in historical writing It includes new and revised sections related to electronic technologies as well as updated examples of recent historical scholarship throughout It maintains the welcoming accessible and inclusive tone of previous editions while walking students through complex ideas and established writing standards As it has since its inception the tenth edition of *A Short Guide to Writing about History* helps students confront and conquer any of the challenges they might face in writing about history     **The American School Board Journal** ,1906     **International Handbook of Research in History, Philosophy and Science Teaching** Michael R. Matthews,2014-07-03 This inaugural handbook documents the distinctive research field that utilizes history and philosophy in investigation of theoretical curricular and pedagogical issues in the teaching of science and mathematics It is contributed to by 130 researchers from 30 countries it provides a logically structured fully referenced guide to the ways in which science and mathematics education is informed by the history and philosophy of these disciplines as well as by the philosophy of education more generally The first handbook to cover the field it lays down a much needed marker of progress to date and provides a platform for informed and coherent future analysis and research of the subject The publication comes at a time of heightened worldwide concern over the standard of science and mathematics education attended by fierce debate over how best to reform curricula and enliven student engagement in the subjects There is a growing recognition among educators and policy makers that the learning of science must dovetail with learning about science this handbook is uniquely positioned as a locus for the discussion The handbook features sections on pedagogical theoretical national and biographical research setting the literature of each tradition in its historical context It reminds readers at a crucial juncture that there has been a long and rich tradition of

historical and philosophical engagements with science and mathematics teaching and that lessons can be learnt from these engagements for the resolution of current theoretical curricular and pedagogical questions that face teachers and administrators Science educators will be grateful for this unique encyclopaedic handbook Gerald Holton Physics Department Harvard University This handbook gathers the fruits of over thirty years research by a growing international and cosmopolitan community Fabio Bevilacqua Physics Department University of Pavia Making Blood White William Cummings, 2002-01-01 Central to his argument is the notion that histories are not just records or representations of the past but are themselves forces or agents capable of transforming the worlds in which humans live Not simply structured by the prevailing social cultural and ideological contexts in which they are made they also shape these contexts BOOK JACKET
