public imagination and why the self promotion that drove Loewy to the top of his profession began to work against him at the end of his career Streamliner is an important and engaging work on one of the longest lived careers in industrial design

Origins of Form Christopher Williams, 2013-05-10 Origins of Form is about the shape of things What limits the height of a tree Why is a large ship or office building more efficient than a small one What is the similarity between a human rib cage and an airplane or a bison and a cantilevered bridge How might we plan for things to improve as they are used instead of wearing out The author has chosen eight criteria that constitute the major influences on three dimensional form These criteria comprise the eight chapters of the book each looks at form from entirely different viewpoints The products of both nature and man are examined and compared This book will make readers especially those who design and build aware of their physical environment and how to break away from previously held assumptions and indifference about the ways forms in our human environment have evolved It shows better ways to do things The author's practical no nonsense approach and his exquisite drawings done especially for this volume provide a clear understanding of what can and cannot be how big or small an object should be of what material it will be made how its function will relate to its design how its use will change it and what laws will influence its development The facts and information were gathered from many sources the areas of mechanics structure and materials geology biology anthropology paleobiology morphology and others These are standard facts in these areas of specialization but they are also essential to the designer's overall knowledge and understanding of form The result is an invaluable work for students designers architects and planners and an informed introduction to a fascinating subject for laymen *Furniture-Makers and Consumers in England, 1754-1851* Akiko Shimbo, 2016-04-15

Covering the period from the publication of Thomas Chippendale's *The Gentleman and Cabinet Makers Director* 1754 to the Great Exhibition 1851 this book analyses the relationships between producer retailers and consumers of furniture and interior design and explores what effect dialogues surrounding these transactions had on the standardisation of furniture production during this period This was an era before mass production when domestic furniture was made both to order and from standard patterns and negotiations between producers and consumers formed a crucial part of the design and production process This study narrows in on three main areas of this process the role of pattern books and their readers the construction of taste and style through negotiation and daily interactions through showrooms and other services to reveal the complexities of English material culture in a period of industrialisation
