*Americans Against the City* Steven Conn, 2014-06-27 It is a paradox of American life that we are a highly urbanized nation filled with people deeply ambivalent about urban life An aversion to urban density and all that it contributes to urban life and a perception that the city was the place where big government first took root in America fostered what historian Steven Conn terms the anti urban impulse In response anti urbanists called for the decentralization of the city and rejected the role of government in American life in favor of a return to the pioneer virtues of independence and self sufficiency In this provocative and sweeping book Conn explores the anti urban impulse across the 20th century examining how the ideas born of it have shaped both the places in which Americans live and work and the anti government politics so strong today Beginning in the booming industrial cities of the Progressive era at the turn of the 20th century where debate surrounding these questions first arose Conn examines the progression of anti urban movements He describes the decentralist movement of the 1930s the attempt to revive the American small town in the mid century the anti urban basis of urban renewal in the 1950s and 60s and the Nixon administration s program of building new towns as a response to the urban crisis illustrating how by the middle of the 20th century anti urbanism was at the center of the politics of the New Right Concluding with an exploration of the New Urbanist experiments at the turn of the 21st century Conn demonstrates the full breadth of the anti urban impulse from its inception to the present day Engagingly written thoroughly researched and forcefully argued *Americans Against the City* is important reading for anyone who cares not just about the history of our cities but about their future as well

*Nature's Altars* Susan R. Schrepfer, 2005-05-02 From the ancient Appalachians to the high Sierra mountains have always symbolized wilderness for Americans Susan Schrepfer unfolds the history of our fascination with high peaks and rugged terrain to tell how mountains have played a dramatic role in shaping American ideas about wilderness and its regulation Delving into memoirs and histories letters and diaries early photos and

old maps Schrepfer especially compares male and female mountaineering narratives to show the ways in which gender affected what men and women found to value in rocky heights and how their different perceptions together defined the wilderness preservation movement for the nation The Sierra Club in particular popularized the mystique of America's mountains and Schrepfer uses its history to develop a sweeping interpretation of twentieth century wilderness perceptions and national conservation politics Schrepfer follows men like John Muir Wilderness Society cofounder Robert Marshall and the Sierra Club's own David Brower into the mountains and finds them frequently in the company of women She tells how mountaineering women shaped their lives through high adventure well before the twentieth century participating in Appalachian mountain clubs and joining men as Mazamas mountain goats scaling Oregon's Mount Hood From these expeditions Schrepfer examines how women's ideas language and activism helped shape American environmentalism just as much as men's parsing the Romantic sublime into its respective masculine and feminine components Tracing this history to the 1964 Wilderness Act she also shows how the feminine sublimines continue to flourish in the form of ecofeminism and in exploits like the all woman climb of Annapurna in 1978 By explaining why both women and men risked their lives in these landscapes how they perceived them and why they wanted to save them Schrepfer also reveals the ways in which religion social class ethnicity and nationality shaped the experience of the natural world Full of engaging stories that shed new light on a history many believe they already know her book adds subtlety and nuance to the oft told annals of the wild and gives readers a new perspective on the wilderness movement and mountaineering
