Excerpt from *The History of Hungary and the Magyars* From the Earliest Period to the Close of the Late War Many of the facts detailed in this work will possess no novelty for students of history The writer does not profess to have derived his materials from any extraordinary sources With most if not all of the books he has consulted the literary world is more or less familiar His object has been simply to present in a popular form the history of a great people concerning whom the mass of English readers have no information except what can be gleaned from the stray and scanty allusions contained in the various accounts of the wars and revolutions of the German empire He has dwelt at considerable length upon the relations existing between Hungary and the House of Hapsburg because it is mainly upon the peculiar nature of these that her claims to the sympathy of Europe are founded He has endeavoured throughout to make the narrative as plain and succinct as possible and for the attainment of this object has in many places sacrificed a great number of collateral details Foreign wars as the least interesting episodes in a nation's life when they leave behind no marked results he has in many instances passed over with a mere mention His great aim has been to convey a clear idea of the nature and the origin of the late revolution to the minds of those who have hitherto given but little attention to European politics For information regarding the war of independence he has consulted most of the works which have since appeared on the subject To that of General Klapka as the most trustworthy perhaps he is under greater obligations than any The interest which the Magyars excited in 1849 is kept alive by the certainty which every one who pays any attention to the state of affairs on the continent must feel that in the next great European convulsion they will play if possible a still more important part than in the last A history of Hungary which will satisfy all the requirements of criticism can never be written until her archives are in the hands of the rightful owners and until the restoration of her liberties shall have enabled foreigners to study her institutions with the attention they merit To such a character therefore this one lays no claim About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *A History of Hungary* László Kontler, 2002-10-02 *A History of Hungary* Millennium in Central Europe provides a comprehensive yet approachable survey of Hungarian history from the prehistoric age to the present day Politics and culture economic social and intellectual developments and the wider European context are integrated in a single narrative László Kontler adeptly steers the reader through ancient times the great migration of peoples and the creation and troubles of a Christian monarchy

that arose in the region wedged between the Baltic and the Balkans and the Germanic and Russian lands He then explores factors such as socio economic backwardness and foreign rule which put Hungary at a disadvantage in coping with the challenges of modernity a process marked by revolutions wars of independence historic compromises and territorial losses The book includes a detailed discussion of the socialist period while a brief Epilogue assesses the achievements and the difficulties of the present process of transition to democracy
