History Of Knowledge:

The History of Knowledge Johan Östling, David Larsson Heidenblad, 2024-01-18 This Element provides a pedagogical overview of the history of knowledge including its main currents distinguishing ideas and key concepts However it is not primarily a state of the art overview but rather an argumentative contribution that seeks to push the field in a certain direction towards studying knowledge in society and knowledge in people's lives Hence the history of knowledge envisioned by the authors is not a rebranding of the history of science and intellectual history but rather a reinvigoration of social and cultural history This implies that many different forms of knowledge should be objects of study By drawing on ongoing research from all across the world dealing with different time periods and problems the authors demonstrate that the history of knowledge can enrich our understanding of past societies This title is also available as Open Access on Cambridge Core

What is the History of Knowledge? Peter Burke, 2015-12-29 What is the history of knowledge This engaging and accessible introduction explains what is distinctive about the new field of the history of knowledge or as some scholars say knowledges in the plural and how it differs from the history of science intellectual history the sociology of knowledge or from cultural history Leading cultural historian Peter Burke draws upon examples of this new kind of history from different periods and from the history of India East Asia and the Islamic world as well as from Europe and the Americas He discusses some of the main concepts used by scholars working in the field among them order of knowledge situated knowledge and knowledge society This book tells the story of the transformation of relatively raw information into knowledge via processes of classification verification and so on the dissemination of this knowledge and finally its employment for different purposes by governments corporations or private individuals A concluding chapter identifies central problems in the history of knowledge from triumphalism to relativism together with attempts to solve them The only book of its kind yet to be published What is the History of Knowledge will be essential reading for all students of history and the humanities in general as well as the interested general reader

A History of Knowledge Charles Van Doren, 1992-03-17 A one volume reference to the history of ideas that is a compendium of everything that humankind has thought invented created considered and perfected from the beginning of civilization into the twenty first century Massive in its scope and yet totally accessible A HISTORY OF KNOWLEDGE covers not only all the great theories and discoveries of the human race but also explores the social conditions political climates and individual men and women of genius that brought ideas to fruition throughout history Crystal clear and concise Explains how humankind got to know what it knows Clifton Fadiman Selected by the Book of the Month Club and the History Book Club

Social History of Knowledge Peter Burke, 2013-05-31 In this book Peter Burke adopts a socio cultural approach to examine the changes in the organization of knowledge in Europe from the invention of printing to the publication of the French Encyclopédie The book opens with an assessment of different sociologies of knowledge from Mannheim to Foucault and beyond and goes on to discuss intellectuals as a social group and the social institutions especially

universities and academies which encouraged or discouraged intellectual innovation Then in a series of separate chapters Burke explores the geography anthropology politics and economics of knowledge focusing on the role of cities academies states and markets in the process of gathering classifying spreading and sometimes concealing information The final chapters deal with knowledge from the point of view of the individual reader listener viewer or consumer including the problem of the reliability of knowledge discussed so vigorously in the seventeenth century One of the most original features of this book is its discussion of knowledges in the plural It centres on printed knowledge especially academic knowledge but it treats the history of the knowledge explosion which followed the invention of printing and the discovery of the world beyond Europe as a process of exchange or negotiation between different knowledges such as male and female theoretical and practical high status and low status and European and non European Although written primarily as a contribution to social or socio cultural history this book will also be of interest to historians of science sociologists anthropologists geographers and others in another age of information explosion

[Toward a Social History of Knowledge](#) Fritz Ringer, 2001-01-01 One of the foremost historians of intellectual life and education in Germany Fritz Ringer has brought together in this volume several of his articles most of which are not easily available are published here in English for the first time They focus on a whole range of contemporary and historical debates about the relationship between ideas and their context the role of education and middle class consciousness the social role of academics and intellectuals and competing ideals of learning science and history

A Social History of Knowledge II Peter Burke, 2013-04-17 Peter Burke follows up his magisterial Social History of Knowledge picking up where the first volume left off around 1750 at the publication of the French Encyclopédie and following the story through to Wikipedia Like the previous volume it offers a social history or a retrospective sociology of knowledge in the sense that it focuses not on individuals but on groups institutions collective practices and general trends The book is divided into 3 parts The first argues that activities which appear to be timeless gathering knowledge analysing disseminating and employing it are in fact time bound and take different forms in different periods and places The second part tries to counter the tendency to write a triumphalist history of the growth of knowledge by discussing losses of knowledge and the price of specialization The third part offers geographical sociological and chronological overviews contrasting the experience of centres and peripheries and arguing that each of the main trends of the period professionalization secularization nationalization democratization etc coexisted and interacted with its opposite As ever Peter Burke presents a breath taking range of scholarship in prose of exemplary clarity and accessibility This highly anticipated second volume will be essential reading across the humanities and social sciences

[How to Write the Global History of Knowledge-Making](#) Johannes Feichtinger, Anil Bhatti, Cornelia Hülmbauer, 2020-03-02 This multidisciplinary collection of essays provides a critical and comprehensive understanding of how knowledge has been made moved and used by whom and for what purpose To explain how new knowledge emerges this volume offers a two fold conceptual move

challenging both the premise of insurmountable differences between confined autarkic cultures and the linear nation centered approach to the spread of immutable stocks of knowledge Rather the conceptual focus of the book is on the circulation amalgamation and reconfiguration of locally shaped bodies of knowledge on a broader global scale The authors emphasize that the histories of interaction have been made less transparent through the study of cultural representations thus distorting the view of how knowledge is actually produced Leading scholars from a range of fields including history philosophy social anthropology and comparative culture research have contributed chapters which cover the period from the early modern age to the present day and investigate settings in Africa Asia and Europe Their particular focus is on areas that have largely been neglected until now In this work readers from many disciplines will find new approaches to writing the global history of knowledge making especially historians scholars of the history and philosophy of science and those in culture studies

Ancient Jewish Sciences and the History of Knowledge in Second Temple Literature Jonathan Ben-Dov, Seth L. Sanders, 2014 This work explores the tension between the hegemony of central scientific traditions and local scientific enterprises showing the relevance of ancient data to contemporary postcolonial historiography of science

Exiles and Expatriates in the History of Knowledge, 1500-2000 Peter Burke, 2017-03-07 In this wide ranging consideration of intellectual diasporas historian Peter Burke questions what distinctive contribution to knowledge exiles and expatriates have made The answer may be summed up in one word deprovincialization Historically the encounter between scholars from different cultures was an education for both parties exposing them to research opportunities and alternative ways of thinking Deprovincialization was in part the result of mediation as many migrants informed people in their hostland about the culture of the native land and vice versa The detachment of the exiles who sometimes viewed both homeland and hostland through foreign eyes allowed them to notice what scholars in both countries had missed Yet at the same time the engagement between two styles of thought one associated with the exiles and the other with their hosts sometimes resulted in creative hybridization for example between German theory and Anglo American empiricism This timely appraisal is brimming with anecdotes and fascinating findings about the intellectual assets that exiles and immigrants bring to their new country even in the shadow of personal loss

A Brief History of Knowledge for Social Science Researchers Deborah

Court, 2020-02-05 A Brief History of Knowledge for Social Science Researchers outlines a history of knowledge from Ancient Greece to present day in Europe and the Western world This outline provides the basis for understanding where various research methods originate and their epistemological historical political and social roots This book provides social science researchers with an understanding of how research methods developed and how their truth criteria and what is accepted as knowledge spring from human history Research is often reduced to data collection results and publication in the stressful results oriented academic environment But research is a human enterprise a product of both individual creativity and historical political and social conditions This book will focus on how shared research criteria as we know them today were

developed through the work and thought of philosophers social activists and researchers This book will be useful for graduate and post graduate students particularly those studying Research Methods and Philosophy of Science courses and for experienced social science researchers who wish to understand how research methods have developed in human history

of Knowledge Production Rajan Gurukkal,2018-10-16 Who decides what should be recognized as knowledge What forces engender knowledge How do certain forms of it acquire precedence over the rest and why Exploring these fundamental questions this book provides an introductory outline of the vast history of knowledge systems under the broad categories of European and non European specifically Indian It not only traces ontology and epistemology in spatio temporal terms but also contextualizes methodological development by comparing Indian and European systems of knowledge and their methods of production as well as techniques ensuring reliability Knowledge cannot have a history of its own independent of social history Therefore using a vast array of sources including Greek Prakrit Chinese and Arab texts the book situates the history of knowledge production within the matrix of multiple socio economic and politico cultural systems Further the volume also analyses the process of the rise of science and new science and reviews speculative thoughts about the dynamics of the subatomic micro universe as well as the mechanics of the galactic macro universe Circulation of Knowledge Johan

Östling,Anna Nilsson Hammar,David Larsson Heidenblad,Kari H. Nordberg,2018 Historians have long been interested in

knowledge its nature and origin and the circumstances under which it was created but it has only been in recent decades that the history of knowledge has emerged as an academic field in its own right In *Circulation of Knowledge* a group of Nordic researchers address the burning issue of the day the circulation of knowledge in social or scientific circles and what happens to it when it is in motion *History of Knowledge*, 2020 *Archaeology of Knowledge* Michel Foucault, 2002 Foucault's classic methodological statement **Forms of Knowledge** David Larsson Heidenblad, Anna Nilsson Hammar, Johan Östling, 2020-01-05 The history of knowledge is a dynamic field of research with bright prospects In recent years it has been established as an exciting forward looking field internationally with a strong presence in the Nordic countries *Forms of Knowledge* is the first publication by the Lund Centre for the History of Knowledge LUCK The volume brings together some twenty historians from different scholarly traditions to develop the history of knowledge The knowledge under scrutiny here is the sort which people have regarded and valued as knowledge in various historical settings The authors apply different perspectives to this knowledge maintaining the historicity and situatedness of the production and circulation of knowledge The book presents the history of knowledge in all its rich diversity The role of knowledge in public life is the focus of some chapters while others concentrate on the importance of knowledge for individuals or local communities some chart the realities of academic or systematic knowledge while others consider its existential or mundane dimensions Taken together they make a significant contribution to the theoretical conceptual and methodological advances in the field **Higher Education and the Growth of Knowledge** Michael Segre, 2015-07-24 This book sketches the history of higher education in parallel with the development of science Its goal is to draw attention to the historical tensions between the aims of higher education and those of science in the hope of contributing to improving the contemporary university A helpful tool in analyzing these intellectual and social tensions is Karl Popper's philosophy of science demarcating science and its social context Popper defines a society that encourages criticism as open and argues convincingly that an open society is the most appropriate one for the growth of science A closed society on the other hand is a tribal and dogmatic society Despite being the universal home of science today the university as an institution that is thousands of years old carries traces of different past cultural social and educational traditions The book argues that by and large the university was and still is a closed society and does not serve the best interests of the development of science and of students education *The Circle of Knowledge: A Classified, Simplified, Visualized Book of Answers* Various, 2022-06-02 The Circle of Knowledge is an informative book that was designed in 1917 to be both inspiring and entertaining The book represents the modern progressive spirit which fits that time in its forms of expression and its editorship The purpose of this work is to answer the why who what when where how of the wide majority of curious minds both young and adult and encourage them to raise further questions Special measures were taken in creating this work to isolate essentials from non essentials to differentiate human interest subjects of universal significance from those of little concern to deliver living truths instead of dead

vocabulary and finally to bring the whole within the knowledge of the intermediate reader without regard to age in an acceptable and exciting form The use of visual outlines and tables maps drawings and diagrams the illustrated works of great painters sculptors and architects all are used to give the reader the valuable and cultural knowledge of past and present

Republics of Knowledge Nicola Miller, 2020-10-20 Republics of Knowledge tells the story of how the circulation of knowledge shaped the formation of nation states in Latin America and particularly in Argentina Peru and Chile during the century after Iberian rule was defeated in the 1820s Most immediately the author has sought to provide a cross disciplinary approach to the history of knowledge combining the methods of global intellectual history with a new way of thinking about nations as experienced and enacted as well as how they are imagined and in so doing offer a new interpretation of the history of independent Latin America to illustrate its wider significance in the making of the modern world By bringing these lines of inquiry together within a transnational framework Nicola Miller shows how evidence from the pioneering nations of Latin America can invite historians to rethink many of their general theories about how knowledge travels and how a sense of nationhood is created The book is designed to stimulate debate about the significance of knowledge not only in Latin America but in all modern societies As Miller explains Latin America is usually regarded as an exception to general theories notably of colonialism nationalism and liberalism and yet it was in that part of the world not in Europe that the Age of Revolution brought the founding of a second wave of modern republics and it was in Latin America that pioneering attempts were made to apply liberal principles in societies with inherited caste divisions and corporate institutions It was there that some of the richest debates about the vexed relationship between collective identities and individualism took place
