Jenkins, 2012-12-06 Dr W J Jenkins In 1977 when the Sheffield Transfusion Centre took delivery of the first GROUPAMATIC blood grouping machine in the UK it was equipped with a sample identification system involving complicated and expensive disposable punched cards In fact the cards were so expensive that Dr Wagstaff was unable to find the revenue to support the system A year later when Brentwood took delivery of a GROUPAMATIC we were faced with the same problem but by chance we heard that KONTRON was developing a laser scanning system for bar code labels and we were able to have our machine modified Subsequently the Sheffield machine was altered to take the bar code scanner At about the same time the Bristol Centre was helping TECHNICON with the development of the AUTO GROUPEX C 16 and fortunately they decided on a laser reader of the same type for bar code identification Thus there were three centres with the capability for reading bar codes on blood grouping machines and it became necessary to find someone to produce the bar code labels There was only one printer in the UK who could produce
