Lasswell,Lung-chu Chen,2019 As a classic text of the New Haven School of International Law this book explores human  
rights and international law in the broadest sense taking into account social sciences research while embracing all values  
secured or consequently fulfilled or needed to thus be achieved The re issuance of this venerable title unveils this work to a  
new generation of scholars students and practitioners of international law and human rights      The Ultimate Resource  
Julian Lincoln Simon,2023-11-14 A lively answer to those who sound alarms about population growth and resource use The  
Ultimate Resource challenges conventional beliefs about the scarcity of energy and natural resources the pollution of the  
environment and the perils of overpopulation for our standard of living In this provocative book Julian Lincoln Simon argues  
that natural resources are not finite in any meaningful way and that using such resources now will not slow the rate of future  
economic growth In the short run all resources are limited A greater use of any resource means pressure on its supply and  
hence an increased price In the long run however history shows that human creativity overcomes natural obstacles to  
economic growth and leads to a lower cost and price than before The ultimate resource Simon contends is the human  
imagination coupled to the human spirit This timely book will fundamentally change how you think about a host of issues  
from immigration and human fertility to forecasts of population change and the use of taxpayer dollars for population control  
The Ultimate Resource demonstrates that the primary constraint on our national and world economic growth is our capacity  
for the creation of new ideas The more people who can be trained to help solve the problems that confront us the faster we  
might remove the obstacles and the greater the economic inheritance we can bequeath to our descendants      **National**

**The Third Wave** Alvin Toffler,2022-01-04 From the author of Future Shock a striking way out of today s despair a  
bracing optimistic look at our new potentials The Third Wave makes startling sense of the violent changes now battering our  
world Its sweeping synthesis casts fresh light on our new forms of marriage and family on today s dramatic changes in  
business and economics It explains the role of cults the new definitions of work play love and success It points toward new  
forms of twenty first century democracy Praise for The Third Wave Magnificent an astonishing array of information The  
Washington Post Imperishably fresh Business Week Will mesmerize readers and rightly so Vogue Alvin Toffler has written  
another blockbuster a powerful book The Guardian Fresh ideas clearly explained Toffler has proven again that he is a master  
United Press International Toffler has imagination and an ability to think of various future possibilities by transcending

prevailing values assumptions and myths Associated Press Once you have walked into his version of the future you may decide never again to whitewash some of the built in frailties of the real present Financial Post Rich stimulating and basically optimistic will unquestionably aid many to a greater understanding of today s puzzling social changes The Globe Mail A detailed breathtakingly bold projection of the social changes required if we are to survive Toffler s vision of a democratic self sustaining utopia is a brave alternative to recent grim warnings Cosmopolitan

Global Environmental Change and Innovation in International Law Neil Craik, Cameron S. G. Jefferies, Sara L. Seck, Tim Stephens, 2018-06-28 The challenges to global order posed by rapid environmental change are increasingly recognized as defining features of our time In this groundbreaking work the concept of innovation is deployed to explore normative and institutional responses in international law to such environmental change by addressing two fundamental themes first whether law can foresee prevent and adapt to environmental transformations and second whether international legal responses to social economic and technological innovation can appropriately reflect the evolving needs of contemporary societies at national and international scales Using a range of case studies the contributions to this collection track innovation descriptively normatively and as a process in and of itself to explain international environmental law s functionality in the Anthropocene This book should be read by anyone interested in the critical intersection of environmental and international law

The Role of Government and the Private Sector in Fighting Poverty George Psacharopoulos, Xuan Nguyen Nguyen, 1997-01-01 Annotation World Bank Technical Paper No 346 Although private sector expansion may relieve governments from certain tasks it also imposes new responsibilities This paper examines the relative roles of the private and public sectors in the implementation of a two track strategy for poverty reduction The first track requires sustained broad based economic growth that makes efficient use of labor the main asset owned by the poor The second promotes investment in people or human resources by ensuring basic social services that are accessible to the poor Individual chapters examine social safety nets and issues in education health population and nutrition
