In the Margins Allison Moore, 1995-11-01 **The Routledge International Handbook of Disability Human Rights Hierarchies** Stephen Meyers, Megan McCloskey, Gabor Petri, 2023-10-31

Disability is defined by hierarchy. Regardless of culture or context, persons with disabilities are almost always pushed to the bottom of the social hierarchy. With the advent of the Convention on the Rights of Persons with Disabilities 2006, disability human rights seemingly provided a path forward for tearing down ableist social hierarchies and ensuring that all persons with disabilities everywhere were treated equally. Despite important progress, the disability human rights project not only remains incomplete but has often created new hierarchies among persons with disabilities themselves or across the human rights it promotes. Certain groups of persons with disabilities have gained new voices while others remain silenced and certain rights are prioritized over others depending on what states, international organizations or advocates want rather than what those on the ground need most. This volume was inspired both by the continued need to expose human rights violations against persons with disabilities but to also explore the nuanced role that hierarchies play in the spread, implementation and protection of disability human rights. The enjoyment of human rights is not equal nor is the recognition of specific individuals and groups' rights. In order to change this situation, inequalities across the disability human rights movement must be explored. Divided into five parts: Who counts as disabled, Political, social and cultural context, Which rights on top, whose rights on bottom, Pushed to the periphery in the disability rights movement, Representations of disability and comprised of 34 newly written chapters including case studies from the Anglophone Caribbean, Bangladesh, Bosnia Herzegovina, China, Ghana, Haiti, Hungary, India, Israel, Kenya, Latin America, Poland, Russia, Scotland, Serbia and South Africa and other countries, this book will be of interest to all scholars and students of disability studies, sociology, human rights, law and social policy.

Adjusted Margin Kate Eichhorn, 2016-09-16

How xerography became a creative medium and political tool arming artists and activists on the margins with an accessible means of making their messages public. This is the story of how the xerographic copier or Xerox machine became a creative medium for artists and activists during the last few decades of the twentieth century. Paper jams, mangled pages and even fires made early versions of this clunky office machine a source of fear, rage, dread and disappointment. But eventually xerography democratized print culture by making it convenient and affordable for renegade publishers, zinesters, artists, punks, anarchists, queers, feminists, street activists and others to publish their work and to get their messages out on the street. The xerographic copier adjusted the lived and imagined margins of society, Eichhorn argues by supporting artistic and political expression and mobilizing subcultural movements. Eichhorn describes early efforts to use xerography to create art and the occasional scapegoating of urban copy shops and xerographic technologies following political panics, using the post 9/11 raid on a Toronto copy shop as her central example. She examines New York's downtown art and punk scenes of the 1970s to 1990s, arguing that xerography, including photocopied posters, mail art and zines, changed what cities looked like and how

we experienced them And she looks at how a generation of activists and artists deployed the copy machine in AIDS and queer activism while simultaneously introducing the copy machine s gritty DIY aesthetics into international art markets Xerographic copy machines are now defunct Office copiers are digital and activists rely on social media more than photocopied posters And yet Eichhorn argues even though we now live in a post xerographic era the grassroots aesthetics and political legacy of xerography persists The Salmon P. Chase Papers Salmon Portland Chase,1993 *The Weavers of Trautenau* Janine Holc,2023-10-16 A sympathetic history that focuses on the experiences of women and girls during the Holocaust and draws on new archival sources Beginning in late 1940 over three thousand Jewish girls and young women were forced from their family homes in Sosnowiec Poland and its surrounding towns to worksites in Germany Believing that they were helping their families to survive these young people were thrust into a world where they labored at textile work for twelve hours a day lived in barracks with little food and received only periodic news of events back home By late 1943 their barracks had been transformed into concentration camps where they were held until liberation in 1945 Using a fresh approach to testimony collections Janine P Holc reconstructs the forced labor experiences of young Jewish females as told by the women who survived and shared their testimony Incorporating new source material the book carefully constructs survivors stories while also taking a theoretical approach one alert to socially constructed intersectional systems of exploitation and harm *The Weavers of Trautenau* elucidates the limits and possibilities of social relations inside camps and the challenges of moral and emotional repair in the face of indescribable loss during the Holocaust **When Blame Backfires** Anne Marie Baylouny,2020-09-15 The recent influx of Syrian refugees into Jordan and Lebanon has stimulated domestic political action against these countries governments This is the dramatic argument at the heart of Anne Marie Baylouny s *When Blame Backfires* Baylouny examines the effects on Jordan and Lebanon of hosting huge numbers of Syrian refugees How has the populace reacted to the real and perceived negative effects of the refugees In thought provoking analysis Baylouny shows how the demographic changes that result from mass immigration put stress on existing problems in these two countries worsening them to the point of affecting daily lives One might expect that as a result refugees and minorities would become the focus of citizen anger But as *When Blame Backfires* demonstrates this is not always the case What Baylouny exposes instead is that many of the problems that might be associated with refugees are in fact endemic to the normal routine of citizens lives The refugee crisis exacerbated an already dire situation rather than created it and Jordanians and Lebanese started to protest not only against the presence of refugees but against the incompetence and corruption of their own governments as well From small scale protests about goods and public services citizens progressed to organized and formal national movements calling for economic change and rights to public services not previously provided This dramatic shift in protest and political discontent was Baylouny shows the direct result of the arrival of Syrian refugees *For All Practical Purposes* Consortium for Mathematics and Its Applications (U.S.),2003 The sixth edition of the

Spoils of War in the Arab East Aziz Al-Azmeh, Harout Akdedian, Haian Dukhan, 2024-01-11

Post conflict scenarios are often proposed for Arab countries that have witnessed significant changes and civil wars Yet the plans for reconciliation transitional justice and the return of the displaced often overlook the real conditions that make these

recommendations impossible This book provides a critical analysis of current post conflict frameworks for Syria and Iraq Drawing on empirical research the book shows that reconciliation and reconstruction scenarios need to be considered alongside the realities on the ground It argues that Iraq and Syria exist in a condition of conflict transformation rather than of conflict termination because the extreme changes that accompanied these countries into war continue long after the conflicts end Furthermore the chapters highlight why experts should not seek solutions in culturalist terms and ancestral enmities or rely on the wartime status quo Rather they should look to the specific military political economic and socio cultural conditions that require different solutions A critical analysis of existing post conflict frameworks their applicability and their potential outcomes in Iraq and Syria the book is a vital contribution to post conflict studies It highlights the need for new approaches to reconstruction and peacebuilding in Arab countries and points to how they should be found

studies In writing this compelling and authoritative biography Beno t Peeters talked to over a hundred individuals who knew and worked with Derrida He is also the first person to make use of the huge personal archive built up by Derrida throughout his life and of his extensive correspondence Peeters book gives us a new and deeper understanding of the man who will perhaps be seen as the major philosopher of the second half of the twentieth century ADVANCED MANAGEMENT ACCOUNTING: MULTIPLE CHOICE QUESTIONS & ANSWERS FOLORUNSHO MEJABI,2015-12-13 Wisdom is not a product of schooling but of the lifelong attempt to acquire it Albert Einstein was quoted as saying I think the big mistake in schools is trying to teach children anything and by using fear as the basic motivation Fear of getting failing grades fear of not staying with your class etc Interest can produce learning on a scale compared to fear as a nuclear explosion to a firecracker This book presents a new learning style evident with today s students and addresses accounting industry changes as well This textbook is not written as a reference text rather it is written in another form where knowledge can be bridged and tested through questions and answers in a multiple choice format The answers to the questions are provided towards the back pages of the text The book will not in small measure assists students in preparation for their regular academic and professional exams The book basically advanced topics in Management Accounting Authoritarian Journalism Ruth Moon,2023-10-03 Journalists working in authoritarian countries contend with competing institutional logics This is particularly the case in post conflict countries where journalistic practice is simultaneously shaped by historical antagonisms global development initiatives and the authoritarian state While journalism schools and professional organizations speak a Western logic of objectivity and independence political history instills a logic of subordination and organizational business models instill a logic of financially motivated censorship As more countries move away from democratic models more and more journalists will face these seemingly irreconcilable pressures Building on months of ethnographic work Ruth Moon looks at journalistic practice in Rwanda a country where journalism has developed into a stable field in the two and a half decades since the nation s 1994 genocide At the same time its journalists facing pressure to please the State have lost confidence in themselves and readers have lost faith in local media Can the nation s news media reinvigorate itself either from within or with assistance from global journalism actors This book examines journalism practice in Rwanda to draw conclusions applicable to journalism fields everywhere Moon argues that not only is the force of globalization inadequate to shift local practice but it in fact serves to reinforce local practices and boundaries **Along the Integral Margin** Stephen Campbell,2022-08-15 In recent years anthropologists have focused on informal unfree and other nonnormative labor arrangements and labeled them as noncapitalist In Along the Integral Margin Stephen Campbell pushes back against this idea and shows that these labor arrangements are in fact important aspects of capitalist development and that the erroneous noncapitalist label contributes to obscuring current capitalist relations Through powerful intimate ethnographic narratives of the lives and struggles of residents of a squatter settlement in Myanmar Campbell challenges narrow conceptions of

capitalism and asserts that nonnormative labor is not marginal but rather centrally important to Myanmar's economic development Campbell's narrative approach brings individuals who are often marginalized in accounts of contemporary Myanmar to the forefront and raises questions about the diversity of work in capitalism University of Illinois Studies in Language and Literature ,1925 The marriage ring, a repr. from the 4th ed. of Gēniautós@ publ. in 1673, ed. with notes by F.B.M.
