In the Mirror of Memory Janet Gyatso, 1992-10-01 This book studies the diverse array of species of memory in Buddhism Contributors focus on a particular school group of texts terms or practices and identify a considerable range of types of mnemonic faculties in Buddhism Included are discussions of Buddhist teaching meditation visualization prayer commemoration of the Buddha dh rani practice the use of mnemonic lists to condense lengthy scriptures and the purported recollection of infinite previous lives that immediately preceded Sakyamuni s attainment of Buddhahood Even enlightened awareness itself is said by some Buddhist schools to consist in a mnemic engagement with reality as such The authors explore Buddhist views on mundane acts of memory such as recognizing reminding memorizing and storing data as well as special types of memory that are cultivated in religious practice One of the most striking discoveries is that perception is intimately related to certain types of memory Several essays investigate if and if so how meditative mindfulness and recollection of the past both of which can be designated by the term smṛti are connected within the Buddhist tradition The question of whether recollection of the past can be explained without violating the foundational Buddhist notions of radical impermanence and no self is addressed by several of the contributing scholars Among the primary sources for the studies in this volume are the northern and southern Abhidharma literature the M tk s P li and Mah y na s tras works of the Buddhist logicians Yog c ra materials the Tibetan Great Perfection Rdzogschen tradition and Indian and Tibetan commentarial works Affinities of Buddhist views on memory with those found in Western phenomenology semiology psychology and history of religions are considered as well

Memory and Hope Alon Goshen-Gottstein, 2018-08-08 This book tackles the core problem of how painful historical memories between diverse religious communities continue to impact even poison present day relations Its operative notion is the healing of memory developed by John Paul II Chapters explore how painful memories of yesteryear can be healed and so address some of the root causes Strategies from six different faith traditions are brought together in what is in some ways a cross religious brainstorming session that identifies tools to improve present day relations At the other pole of the conceptual axis of this book is the notion of hope If memory informs our past hope sets the horizon for our future How does the healing of memory open new horizons for the future And what is the notion of hope in each of our traditions that could lead to a common vision of good Between memory and hope this book seeks to offer a vision of healing that can serve as a resource in contemporary

interfaith relations Contributors Rahuldeep Singh Gill Alon Goshen Gottstein Maria Reis Habito Flora A Keshgegian Anantanand Rambachan Meir Sendor Muhammad Suheyl Umar and Michael von Bruck **Imaging Wisdom** Jacob N. Kinnard, 2001 On its broadest level this book contributes to an ongoing expansion of both the history of religions and Buddhist studies by focusing on what is a far too frequently ignored aspect of religious experience visual images This is a study that is intended to speak to and be relevant for not only those interested specifically in Buddhism but also scholars and students in the field of religion at large who are interested in the dialectical ways abstract abstruse and even rarified textual discourses interact with devotional practices on the ground The specific focus of this book is on the Buddhist visual practices surrounding the visual representation of a single central concept prajna or wisdom in medieval north India Prajna however was not only an intellectual state and spiritual goal to which to aspire Rather wisdom also becomes a quality to be visually represented and ritually responded to and even an active presence to be venerated in much the same manner as the Buddha himself This book explores the ways in which the production and use of artistic images involving prajna constituted a central if not the central component of Buddhist religious practice in Medieval India *Mind in the Balance* B. Alan Wallace, 2014-09-02 By establishing a dialogue in which the meditative practices of Buddhism and Christianity speak to the theories of modern philosophy and science B Alan Wallace reveals the theoretical similarities underlying these disparate disciplines and their unified approach to making sense of the objective world Wallace begins by exploring the relationship between Christian and Buddhist meditative practices He outlines a sequence of meditations the reader can undertake showing that though Buddhism and Christianity differ in their belief systems their methods of cognitive inquiry provide similar insight into the nature and origins of consciousness From this convergence Wallace then connects the approaches of contemporary cognitive science quantum mechanics and the philosophy of the mind He links Buddhist and Christian views to the provocative philosophical theories of Hilary Putnam Charles Taylor and Bas van Fraassen and he seamlessly incorporates the work of such physicists as Anton Zeilinger John Wheeler and Stephen Hawking Combining a concrete analysis of conceptions of consciousness with a guide to cultivating mindfulness and profound contemplative practice Wallace takes the scientific and intellectual mapping of the mind in exciting new directions **Dao Companion to Chinese Buddhist Philosophy** Youru Wang, Sandra A. Wawrytko, 2019-01-31 Too often Buddhism has been subjected to the Procrustean box of western thought whereby it is stretched to fit fixed categories or had essential aspects lopped off to accommodate vastly different cultural norms and aims After several generations of scholarly discussion in English speaking communities it is time to move to the next hermeneutical stage Buddhist philosophy must be liberated from the confines of a quasi religious stereotype and judged on its own merits Hence this work will approach Chinese Buddhism as a philosophical tradition in its own right not as an historical after thought nor as an occasion for comparative discussions that assume the west alone sets the standards for or is the origin of philosophy and its methodologies Viewed within their own context Chinese Buddhist

philosophers have much to contribute to a wide range of philosophical concerns including metaphysics epistemology ethics philosophy of language philosophy of mind and philosophy of religion even though Western divisions of philosophy may not exhaust the rich contents of Chinese Buddhist philosophy Language in the Buddhist Tantra of Japan Richard K. Payne,2018-08-09 Language in the Buddhist Tantra of Japan dismantles the preconception that Buddhism is a religion of mystical silence arguing that language is in fact central to the Buddhist tradition By examining the use of extraordinary language evocations calling on the power of the Buddha in Japanese Buddhist Tantra Richard K Payne shows that such language was not simply cultural baggage carried by Buddhist practitioners from South to East Asia Rather such language was a key element in the propagation of new forms of belief and practice In contrast to Western approaches to the philosophy of language which are grounded in viewing language as a form of communication this book argues that it is the Indian and East Asian philosophies of language that shed light on the use of language in meditative and ritual practices in Japan It also illuminates why language was conceived as an effective means of progress on the path from delusion to awakening

Lopez, Jr., 2016-11-22 The Heart Sutra is perhaps the most famous Buddhist text traditionally regarded as a potent expression of emptiness and of the Buddha's perfect wisdom This brief seemingly simple work was the subject of more commentaries in Asia than any other sutra In Elaborations on Emptiness Donald Lopez explores for the first time the

elaborate philosophical and ritual uses of the Heart Sutra in India Tibet and the West Included here are full translations of the eight extant Indian commentaries Interspersed with the translations are six essays that examine the unusual roles the Heart Sutra has played it has been used as a mantra an exorcism text a tantric meditation guide and as the material for comparative philosophy Taken together the translations and essays that form *Elaborations on Emptiness* demonstrate why commentary is as central to modern scholarship on Buddhism as it was for ancient Buddhists Lopez reveals unexpected points of instability and contradiction in the Heart Sutra which in the end turns out to be the most malleable of texts where the logic of commentary serves as a tool of both tradition and transgression

Meditation and Culture Halvor

Eifring, 2015-09-24 Behind the stereotype of a solitary meditator closing his eyes to the world meditation always takes place in close interaction with the surrounding culture *Meditation and Culture: The Interplay of Practice and Context* explores cases in which the relation between meditative practice and cultural context is particularly complex The internationally renowned contributors discuss practices that travel from one culture to another or are surrounded by competing cultures They explore cultures that bring together competing practices or that are themselves mosaics of elements of different origins They seek to answer the question What is the relationship between meditation and culture The effects of meditation may arise from its symbolic value within larger webs of cultural meaning as in the contextual view that still dominates cultural and religious studies They may also be psychobiological responses to the practice itself the cultural context merely acting as a catalyst for processes originating in the body and mind of the practitioner *Meditation and Culture* gives no single definitive explanation but taken together the different viewpoints presented point to the complexity of the relationship
