Danto, 1998 Sculpture in the Age of Doubt Thomas McEvelley, 1999-08 Framed in a lucid discussion of the intellectual issues surrounding the postmodern movement the essays in this book re examine the course of twentieth century art through the work of twenty five major sculptors McEvelley masterfully traces the evolution of modern sculpture from the readymades of Marcel Duchamp to the anti painting statements of the 1960s to the spiritualism and conceptualism of the 1980s and 1990s This is a groundbreaking work in the field of art criticism and a fundamental text for anyone interested in the history of current art and culture Allworth Press an imprint of Skyhorse Publishing publishes a broad range of books on the visual and performing arts with emphasis on the business of art Our titles cover subjects such as graphic design theater branding fine art photography interior design writing acting film how to start careers business and legal forms business practices and more While we don't aspire to publish a New York Times bestseller or a national bestseller we are deeply committed to quality books that help creative professionals succeed and thrive We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers Francesc Torres; 2) the head of the dragon (anthology). J.G. Hanhardt, 1991 **Approaches to Metaphony in the Languages of Italy** Francesc Torres-Tamarit, Kathrin Linke, Marc van Oostendorp, 2016-06-06 This volume presents current work on a topic in Romance linguistics that still informs linguistic theory to this day metaphony in the languages of Italy Papers discuss fundamental research topics such as phonological opacity in the light of chain shifts post tonic harmony and consonant transparency the role of morphosyntax in the typology of metaphony the explanatory adequacy of feature based versus element based analyses and the locus of metaphony in grammar Other chapters present new experimental data thus building a more accurate empirical foundation for the study of metaphony We envision the volume to become a reference book not only for an updated descriptive survey of metaphonic patterns in Italy but also a thorough discussion of the challenges that metaphony poses for different morpho phonological theories The book bridges the gap between descriptive works and theoretical thinking in the study of metaphony Necropolitics Francisco Ferrandiz, Antonius C. G. M. Robben, 2015-07-24 This remarkable book demonstrates through in depth case studies from ten countries around the world how the forensic exhumation of mass graves is inextricably intertwined with grassroots initiatives national political developments international human rights advocacy and transnational claims of transitional justice **Tank** Patrick Wright, 2003 The history of the tank and its contributions throughout history **Dreams of Waking** Vincent Barletta, Mark L. Bajus, Cici Malik, 2013-03-22 In this anthology Vincent Barletta Mark L. Bajus and Cici Malik treat the Iberian lyric in the late Middle Ages and early modernity as a deeply multilingual transnational genre that needs to break away from the old essentialist ideas about language geography and identity in order to be understood properly More and more scholars and students are recognizing the limitations of single

language nationalist and period bound canons and are looking for different ways to approach the study of literature The Iberian Peninsula is an excellent site for this approach where the history and politics of the region along with its creative literature need to be read and studied together with the way the works were composed by poets and eventually consumed by readers With a generous selection of more than one hundred poems from thirty three poets *Dreams of Waking* is unique in its coverage of the three main languages Catalan Portuguese and Spanish and lyrical styles employed by peninsular poets It contains new translations of canonical poems but also translations of many poems that have never before been edited or translated Brief headnotes provide essential details of the poets lives and a general introduction by the volume editors shows how the poems and languages fruitfully intersect With helpful annotations to the poetry as well as a selected bibliography containing the most important editions and translations from all three of the main Iberian languages this volume will be an indispensable tool for both specialists and students in comparative literature

Culture in Camouflage Patrick

Deer, 2009-03-26 *Culture in Camouflage* aims to remap the history of British war culture by insisting on the centrality and importance of the literature of the Second World War The book offers the first comprehensive account of the emergence of modern war culture arguing that its exceptional forms and temporalities force us to reappraise British cultural modernity The book explores how writers like Ford Madox Ford Siegfried Sassoon Wilfred Owen T E Lawrence Winston Churchill Elizabeth Bowen Virginia Woolf James Hanley Rex Warner Alexander Baron Keith Douglas Henry Green and Graham Greene contested the dominant narratives of war projected by an enormously powerful and persuasive mass media and culture industry Patrick Deer reads war literature as one element in an expanded cultural field which also includes popular culture and mass communications the productions of war planners and military historians projections of new technologies of violence the fantasies and theories of strategists and the material culture of total war Modern war cultures Deer contends are defined by their drive to normalize conflict and war making by their struggle to colonize the entire wartime cultural field and by their claim to monopolize representations and interpretation of the conflict But the mobilization of cultural formations during wartime reveals at times glaringly the constitutive contradictions at the heart of modern ideas of culture The Great War failed to produce a popular war culture on the home front producing instead an extraordinary literature of protest yet the strategists struggled to regain their oversight over both the enemy across no man s land and the minds and bodies of their own mass conscript armies The interwar years saw a massive effort to make strategic fantasies a reality if the technology of imperial air power or mobile armoured warfare did not yet exist culture could be mobilized to shore up the ramshackle war machine During World War Two a fully fledged British war culture emerged triumphant in time of national crisis offering the vision of a fully mobilized island fortress a loyal empire and a modernized war machine ready to wage a futuristic war of space and movement This was the struggle that British World War Two writers confronted with extraordinary courage and creativity
