Hackett,2011-08-15 *Franchising Hospitality Services* Conrad Lashley,Alison Morrison,2007-06-07 Franchising in the Hospitality Industry provides an overview of the issues debates and challenges associated with business franchising In two parts this text firstly looks at the issues from both an academic and practitioner perspective The second part looks more closely at service sector groups in the hospitality industry such as hotels leisure and catering using national and international examples and illustrations These demonstrate how the theories and debates discussed in the first part are tackled in real life situations Examples used are from well known companies such as McDonalds Baskin Robbins Burger King Choice Hotels Holiday Inn Domino Pizza Pierre Victoire amongst others *FCC Record* United States. Federal Trade Commission,1936 **The Corporate Paradox** Alan Felstead,2024-10-02 First published in 1993 The Corporate Paradox is the first major in depth study of the franchise relationship and how it functions While past debates have focused on the question What do bosses do we are now being asked Who really is the boss Since the late 1970s the emergence of franchising arrangements has been a major part of the wider process of change taking place in the nature of modern business organization The names of franchise companies are familiar to most people Coca Cola McDonalds Pepsi cola Body Shop to name but a few But how many people realize that each such outlet is a separate legal entity owned by a local franchisee Franchising remains at best little understood In this book Alan Felstead explores who controls what why and how setting his discussion within the context of the many current changes affecting traditional contractual bonds between employers and employees producers and buyers owners and managers This is a must read for students of management organizational studies marketing industrial sociology and commercial law The Organizational Contract Stefan Grundmann,Fabrizio Cafaggi,2016-02-17 This book introduces and develops the paradigm of the organisational contract in European contract law Suggesting that a more radical distinction should be made between contracts which regulate single or spot exchanges and contracts that organize complex economic activities without creating a new legal entity the book argues that this distinction goes beyond that between spot and relational contracts because it focuses on the organizational dimension of contracting

and its governance features Divided into six parts the volume brings together a group of internationally renowned experts to examine the structure of long term contractual cooperation networks of contracts knowledge exchange in long term contractual cooperation remedies and specific governance rules in long term relationships and the move towards legislation The book will be of value to academics and researchers in the areas of private law economic theory and sociology of law and organizational theory It will also be a useful resource for practitioners working in international contract law and international business transaction law
