Ordering the World in the Eighteenth Century Frank O'Gorman, Diana Donald, 2005-12-14 The Eighteenth century is often represented applying Tom Paine's phrase as The Age of Reason an age when progressive ideals triumphed over autocracy and obscurantism and when notions of order and balance shaped consciousness in every sphere of human knowledge Yet the debates which surrounded the development of Eighteenth century thought were always open to troubling doubts Was nature itself truly an ordered entity as Newton had argued or was it a mass of chaotic randomly moving atoms as some materialist thinkers believed This book explores the tensions and conflicts in these debates through a series of interdisciplinary essays from leading international scholars each challenging the idea that the Eighteenth century was an age of order , **The Age of Reason** Frank E. Manuel, 2019-06-30 The period between the Peace of Utrecht and the French

Revolution is brought into focus in this essay Professor Manuel deals with the age of the philosophes and the enlightened despots when belief in man's ability to achieve a good society through reason was in its first hopeful flower. The powerful pressures of that time are evaluated: the rapidly increasing population, the phenomenal growth of cities and industries, the greater facility of travel and transportation. The modern nation state as exemplified in France, England, the Hapsburg Empire, Prussia, and Russia was growing strong and centralized. The relations of these states to one another are discussed.

Jesus in an Age of Enlightenment Jonathan C. P. Birch, 2019-07-18 This book explores the religious concerns of Enlightenment thinkers from Thomas Hobbes to Thomas Jefferson. Using an innovative method, the study illuminates the intellectual history of the age through interpretations of Jesus between c. 1650 and c. 1826. The book demonstrates the persistence of theology in modern philosophy and the projects of social reform and amelioration associated with the Enlightenment. At the core of many of these projects was a robust moral theological realism, sometimes manifest in a natural law ethic but always associated with Jesus and a commitment to the sovereign goodness of God. This ethical orientation in Enlightenment discourse is found in a range of different metaphysical and political identities: dualist and monist, progressive and radical, which intersect with earlier heretical tendencies in Christian thought: Arianism, Pelagianism, and Marcionism. This intellectual matrix helped to produce the discourses of irenic toleration which are a legacy of the Enlightenment at its best.

Domingos Vandelli: Natural History and Enlightened Utilitarianism Lucas Onorato Braga, 2025-03-06 This work reconstructs the intellectual and professional trajectory of Domingos Vandelli who played a fundamental role at the University of Coimbra, directed the Royal Cabinet of Natural History and the Ajuda Botanical Garden, and was among the founding members of the Royal Academy of Sciences of Lisbon. Through the collection of scattered information from documents and fragments of sources, Lucas Braga sought to rediscover as far as the documentation allowed the man behind the naturalist, the young man who left his homeland in pursuit of the dream of accomplishing something greater, the scholar who even though he was not a disciple of Linnaeus became his most prominent correspondent, the professor who trained numerous naturalists who worked for the court exploring the various Portuguese domains and their secrets, the man who chose Portugal as his home where he started a family and raised his three children. Undoubtedly, when we hear the name Vandelli, there is a clear association with the image of the great naturalist he undoubtedly was, but not only that. The reader holds in their hands the opportunity to discover not only Vandelli's professional trajectory but also the numerous circumstances that led him to make certain decisions and adopt specific strategies in an environment where he earned respect and recognition despite later efforts to erase his legacy. Structured in three chapters that cover different stages of Vandelli's life, this work follows his education in the Italian Peninsula, his role as a professor, his direction of scientific institutions, and his membership in the Royal Academy of Sciences of Lisbon.

Conceptualizing the World Helge Jordheim, Erling Sandmo, 2018-12-17 What is and what was the world? Though often treated as interchangeable with the ongoing and inexorable progress of globalization, concepts of world, globe, or earth

instead suggest something limited and absolute This innovative and interdisciplinary volume concerns itself with this central paradox that the complex heterogeneous and purportedly transhistorical dynamics of globalization have given rise to the idea and reality of a finite and thus vulnerable world Through studies of illuminating historical moments that range from antiquity to the era of Google Earth each contribution helps to trace the emergence of the world in multitudinous representations practices and human experiences
