The Oxford Handbook of the History of Physics Jed Z. Buchwald, Robert Fox, 2013-10-10 The Oxford Handbook of the History of Physics brings together cutting edge writing by more than twenty leading authorities on the history of physics from the seventeenth century to the present day By presenting a wide diversity of studies in a single volume it provides authoritative introductions to scholarly contributions that have tended to be dispersed in journals and books not easily accessible to the general reader While the core thread remains the theories and experimental practices of

physics the Handbook contains chapters on other dimensions that have their place in any rounded history These include the role of lecturing and textbooks in the communication of knowledge the contribution of instrument makers and instrument making companies in providing for the needs of both research and lecture demonstrations and the growing importance of the many interfaces between academic physics industry and the military *The Worldmakers* Ayesha

Ramachandran,2015-10-13 In this beautifully conceived book Ayesha Ramachandran reconstructs the imaginative struggles of early modern artists philosophers and writers to make sense of something that we take for granted the world imagined as a whole Once a new exciting and frightening concept the world was transformed in the sixteenth and seventeenth centuries But how could one envision something that no one had ever seen in its totality *The Worldmakers* moves beyond histories of globalization to explore how the world itself variously understood as an object of inquiry a comprehensive category and a system of order was self consciously shaped by human agents Gathering an international cast of characters from Dutch cartographers and French philosophers to Portuguese and English poets Ramachandran describes a history of firsts the first world atlas the first global epic the first modern attempt to develop a systematic natural philosophy all part of an effort by early modern thinkers to capture the world on the page *Improving Secondary Science Teaching* John Parkinson,2004 John Parkinson encourages teachers to reflect on their current teaching practice and guides them to improving their teaching and consequently their pupils learning *Revisionist Histories* Marnie Hughes-Warrington,2013-07-18 Revision and revisionism are generally seen as standard parts of historical practice yet they are underexplored within the growing literature on historiography In this accessibly written volume Marnie Hughes Warrington discusses this paucity of work on revision in history theory and raises ethical questions about linear models and spatial metaphors that have been used to explain it *Revisionist Histories* emphasises the role of the authors and audiences of histories alike as the writers and rewriters of history Through study of digital environments graphic novels and reader annotated texts this book shows that the sides of history cannot be disentangled from one another and that they are subject to flux and even destruction over time Incorporating diverse and controversial case studies including the French Revolution Holocaust Denial and European settlers contact with Native Americans and Indigenous Australians *Revisionist Histories* offers both a detailed account of the development of revisionism and a new more spatial vision of historiography An essential text for students of historiography

The Mapmakers John Noble Wilford,2001-12-04 In his classic text two time Pulitzer Prize winner John Noble Wilford recounts the history of cartography from antiquity to the space age They are among the world s great pioneers and adventurers the mapmakers who for centuries have been expanding our knowledge of who and where we are and where we want to go From the surprisingly accurate silk maps prepared by Chinese cartographers in the second century B C to medieval mapmakers who believed they had fixed the location of paradise through to the expeditions of Columbus and Magellan John Noble Wilford chronicles the exploits of the great pioneers of mapmaking Wilford brings the story up to the

present day as he shows the impact of new technologies that make it possible for cartographers to go where no one has been before from the deepest reaches of the universe where astronomers are mapping time as well as space to the inside of the human brain These modern day mapmakers join the many earlier adventurers including ancient Greek stargazers Renaissance seafarers and the explorers who mapped the American West whose achievements shape this dramatic story of human inventiveness and limitless curiosity **Whitaker's Books in Print** ,1998 **Every Life is a Story** Fred H.

The American Soul Jacob Needleman,2003-06-02 Looking at the lives of America s founders including Washington Jefferson and Franklin scholar and bestselling author Jacob Needleman explores their core of inner beliefs their religious and spiritual sensibilities and their individual conception of the purpose of life The founders Needleman argues conceived of an inner democracy a continual pursuit of wisdom and self improvement that would undergird the outer democracy in which we live today Any understanding of America as a nation of spiritual values will in the years ahead require Needleman s work as a point of reference **The Rise and Decline of England's Watchmaking Industry, 1550-1930** Alun C. Davies,2022-04-11 This

survey of the rise and decline of English watchmaking fills a gap in the historiography of British industry Clerkenwell in London was supplied with rough movements from Prescot 200 miles away in Lancashire Smaller watchmaking hubs later emerged in Coventry Liverpool and Birmingham The English industry led European watchmaking in the late eighteenth century in output and its lucrative export markets extended to the Ottoman Empire and China It also made marine chronometers the most complex of hand crafted pre industrial mechanisms crucially important to the later hegemony of Britain s navy and merchant marine Although Britain was the workshop of the world its watchmaking industry declined Why

First because cheap Swiss watches were smuggled into British markets Later in the era of Free Trade they were joined by machine made watches from factories in America enabled by the successful application to watch production of the American system in Waltham Massachusetts after 1858 The Swiss watch industry adapted itself appropriately expanded and reasserted its lead in the world s markets English watchmaking did not its trajectory foreshadowed and was later followed by other once prominent British industries Clerkenwell retained its pre industrial production methods Other modernization attempts in Britain had limited success or failed
