*High-Level Subject Access Tools and Techniques in Internet Cataloging* Judith Ahronheim,2024-11-15 Is your library s portal as efficient as it could be High Level Subject Access Tools and Techniques explores the potential and early development of high level subject access It examines Web tools and traditionally maintained library structures that facilitate the automated relation of resources to high level subject categories based on the descriptive metadata that already exists in traditional library records It includes a research study of high level subject browse structures as well as hands on reports of actual projects and development activities and an examination of the environment in which demand for high level subject access arises From the editor As the World Wide Web and graphic user interfaces developed in the 90s libraries began to build gateways for their online resources These gateways allowed library users to employ the browse point and click approach to resource discovery that they had come to expect from online tools Most of these interfaces amounted to little more than hand constructed lists of links Today many libraries offer access to users through a set list of broad topics sometimes called a high level browse display Methods for populating these subject categories remain crude and their maintenance requires considerable resources As a result libraries have begun to look at

ways of applying traditional techniques associated with cataloging to these new interfaces Several goals are involved in these developments Many hope to reuse data from library catalogs and thus limit maintenance burdens Others seek to apply a more standard set of tools and principles to the construction of portals to allow greater cooperation among institutions that want to interoperate with each other This pathbreaking book examines vital issues in high level subject access including subject trees and their relationship to the structure inherent in Dewey Classification emerging patterns in the development of browsing services including a hierarchy of subjects that is not based in classification a map that relates data from catalog records to the subject hierarchy and tools for extracting data from a catalog and storing it in a separate database to produce a more flexible display task based as opposed to materials based subject lists the social issues that are associated with choosing categoriesbased on the nature and activity of an institution s library users the political issues involved in selecting disciplines or topics for a browsing service And presents fascinating case studies of Columbia University s efforts to build an automatically generated browsable display based on Library of Congress Classification as it occurs in catalog records the High Level Thesaurus Project HILT in which a group of libraries archives and museums attempted to find a common method for high level subject access via portal

Challenging the notion that fashion and furniture were or are separate enterprises and distinct material aesthetic traditions this collection focuses on three material and conceptual links central to understanding the relationship between interior

design and fashion the body fabric and space The volume considers the changing visual material and spatial character

methodological challenges posed by and formal political and historiographical significance of a wide range of British

European and North American case studies since the eighteenth century The volume s eleven case studies allow the reader

to understand connecting notions behind the formation of interiors and fashionable clothing The essays combine a wide

range of significant and challenging new examples alongside powerful reversionary analyses of the various periods artists

designers and their best and significant objects Fashion Interior Design and the Contours of Modern Identity is concerned

not only with fabric but also with the body and the implications of embodiment in the practices of both design domains which

are equally invested in the comfort aesthetic pleasure extension and support of the body in different and yet seemingly

identical ways **Encyclopedia of Interior Design** Joanna Banham,1997-05 First published in 1997 Routledge is an
