governments introduced kindergartens and infant schools to give children a head start in life. These programs hinged on new visions of childhood that originated in England and Europe but what happened when they were exported to the colonies. This book unwinds the tangled threads of this history from early infant schools in England to three Commonwealth countries: Canada, Australia, and New Zealand, where systems of educating young children were transplanted but adapted to suit local ideas, politics, and populations. This unique comparative approach to the history of early childhood education provides fresh insight into how to reconcile educational theory and practice in an increasingly global world.

Kindergarten Narratives on Froebelian Education Helen May, Kristen Nawrotzki, Larry Prochner, 2016-11-03. *Kindergarten Narratives on Froebelian Education* showcases the latest scholarship and historical understandings concerning the casting of the kindergarten idea abroad across cultures, continents, and centuries. Each chapter reveals previously unknown narratives of intrepid endeavour, political pragmatism, and pedagogical innovation that collectively provide insight into the transformation of Froebel's ideas on early education into a global phenomenon. Across global contexts, each chapter presents a case study of the ideas scattering abroad, illustrative of the movement of ideas, curricula, and pedagogical change in effect, taking the kindergarten beyond the geographies and pedagogies of its German beginnings and borders. Chapters draw on historical examples of Froebelian education from The Netherlands, New Zealand, Japan, Sweden, the UK, and the USA. In the journal *History of Education* in 2006, Froebelian history scholar Professor Kevin J. Brehony (1948-2013) lamented the relative neglect of the history of early years education. At the same time, there was a heightened global social and political interest in educating the young child. In this book, an international team of contributors respond to Brehony's suggestion that historical perspectives can play a role in current debates and suggest ways historical narratives might inform policies and practices in twenty-first century early childhood education care settings and contexts. Reconnecting past lessons and insights with present and future concerns for early education, young children, and their place in society, this important collection also includes an historical timeline charting the spread of Froebelian education ideas and kindergartens across the world.
