*University, Court, and Slave* Alfred L. Brophy, 2016-07-18 University Court and Slave reveals long forgotten connections between pre Civil War southern universities and slavery Universities and their faculty owned people sometimes dozens of people and profited from their labor while many slaves endured physical abuse on campuses As Alfred L. Brophy shows southern universities fought the emancipation movement for economic reasons but used their writings on history philosophy and law in an attempt to justify their position and promote their institutions Indeed as the antislavery movement gained momentum southern academics and their allies in the courts became bolder in their claims Some went so far as to say that slavery was supported by natural law The combination of economic reasoning and historical precedent helped shape a southern pro slavery jurisprudence Following Lincoln s November 1860 election southern academics joined politicians judges lawyers and other leaders in arguing that their economy and society was threatened Southern jurisprudence led them to believe that any threats to slavery and property justified secession Bolstered by the courts academics took their case to the southern public and ultimately to the battlefield to defend slavery A path breaking and deeply researched history of southern universities investment in and defense of slavery University Court and Slave will fundamentally transform our understanding of the institutional foundations pro slavery thought

**Slave No More** Aline Helg, 2019-02-07 Commanding a vast historiography of slavery and emancipation Aline Helg reveals as never before how significant numbers of enslaved Africans across the entire Western Hemisphere managed to free themselves hundreds of years before the formation of white run abolitionist movements Her sweeping view of resistance and struggle covers more than three centuries from early colonization to the American and Haitian revolutions Spanish American independence and abolition in the British Caribbean Helg not only underscores the agency of those who managed to become free people of color before abolitionism took hold but also assesses in detail the specific strategies they created and utilized While recognizing the powerful forces supporting slavery Helg articulates four primary liberation strategies flight and marronage manumission by legal document military service for men in exchange for promised emancipation and revolt along with a willingness to exploit any weakness in the domination system Helg looks at such actions at both individual and community levels and in the

context of national and international political movements Bringing together the broad currents of liberal abolitionism with an original analysis of forms of manumission and marronage *Slave No More* deepens our understanding of how enslaved men women and even children contributed to the slow demise of slavery

Emmer,João Pedro Marques,2021-01-11 The past half century has produced a mass of information regarding slave resistance ranging from individual acts of disobedience to massive uprisings Many of these acts of rebellion have been studied extensively yet the ultimate goals of the insurgents remain open for discussion Recently several historians have suggested that slaves achieved their own freedom by resisting slavery which counters the predominant argument that abolitionist pressure groups parliamentarians and the governmental and anti governmental armies of the various slaveholding empires were the prime movers behind emancipation Marques one of the leading historians of slavery and abolition argues that in most cases it is impossible to establish a direct relation between slaves uprisings and the emancipation laws that would be approved in the western countries Following this presentation his arguments are taken up by a dozen of the most outstanding historians in this field In a concluding chapter Marques responds briefly to their
