**TRENDS IN LINGUISTICS** is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science **TRENDS IN LINGUISTICS** considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language **TRENDS IN LINGUISTICS** publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address

controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing History of linguistics 1996 International Conference on the History of the Language Sciences,1999

*The Emergence of Semantics in Four Linguistic Traditions* Wout Jac. van Bakkum,1997-01-01 The aim of this study is a comparative analysis of the role of semantics in the linguistic theory of four grammatical traditions Sanskrit Hebrew Greek Arabic If one compares the organization of linguistic theory in various grammatical traditions it soon turns out that there are marked differences in the way they define the place of semantics within the theory In some traditions semantics is formally excluded from linguistic theory and linguists do not express any opinion as to the relationship between syntactic and semantic analysis In other traditions the whole basis of linguistic theory is semantically orientated and syntactic features are always analysed as correlates of a semantic structure However even in those traditions in which semantics falls explicitly or implicitly outside the scope of linguistics there may be factors forcing linguists to occupy themselves with the semantic dimension of language One important factor seems to be the presence of a corpus of revealed sacred texts the necessity to formulate hermeneutic rules for the interpretation of this corpus brings semantics in through the back door **Toward a**

**Historiography of Linguistics** E. F. K. Koerner,1978 The papers brought together in the present volume represent the essence of the author's reflections on issues concerning linguistic historiography and of particular investigations in 19th and 20th century linguistic thought The papers are clustered in three sections I Towards a Historiography of Linguistics II Appraisals of Individual Scholars and III Trends and Traditions in Linguistics *And He Knew Our Language* Marcus Tomalin,2011 This ambitious and ground breaking book examines the linguistic studies produced by missionaries based on the Pacific Northwest Coast of North America and particularly Haida Gwaii during the late nineteenth and early twentieth centuries Making extensive use of unpublished archival materials the author demonstrates that the missionaries were responsible for introducing many innovative and insightful grammatical analyses Rather than merely adopting Graeco Roman models they drew extensively upon studies of non European languages and a careful exploration of their scripture translations reveal the origins of the Haida sociolect that emerged as a result of the missionary activity The complex interactions between the missionaries and anthropologists are also discussed and it is shown that the former sometimes anticipated linguistic analyses that are now incorrectly attributed to the latter Since this book draws upon recent work in theoretical linguistics religious history translation studies and anthropology it emphasises the unavoidably interdisciplinary nature of Missionary Linguistics research **The Development of Morphophonemic Theory** James Kilbury,1976-01-01

The aim of this book is to provide a concise historical survey of linguistic investigation relating to the notion of morphophonemics The study is essentially historical and thus does not offer its own theory of morphophonemics Since attention is focused on the development of morphophonemic theory contemporary work in this area is not of central concern But the study was undertaken in the hope that a better understanding of earlier work would help to clarify present day issues

**Arab Linguistics** Michael G. Carter, 1981-01-01 This volume provides an analysis of a famous medieval Arabic grammatical text al jurr miya c 1300 as commented on by a hirb n d 1570 This edition includes the original text and a translation into English as well as extensive comments and annotations with the aim of making accessible both to Arabists and non Arabists the main elements of indigenous Arabic linguistics and thereby at least partially filling a large blank in the history of linguistics

**The Mirror of Grammar** Louis G. Kelly, 2002-01-01 Much is known about the grammar of the modistae and about its eclipse this book sets out to trace its rise In the late eleventh century grammar became an analytical rather than an exegetical discipline under the impetus of the new theology Under the impetus of Arab learning the ancient sciences were reshaped according to the norms of Aristotle s Analytics and developed within a structure of speculative sciences beginning with grammar and culminating in theology Though the modistae acknowledge Aristotle Donatus Priscian and the Arab commentators their roots also lie in Augustine and Boethius and they took as much from their scholastic contemporaries as they gave them This book traces the genesis of a grammar which communicated freely with other speculative sciences shared their structures and methods and affirmed its own individuality by defining its object as the causes of language

**200 Years of Syntax** Giorgio Graffi, 2001 This book argues convincingly against the widespread opinion that very few syntactic studies were carried out before the 1950s Relying on the detailed analysis of a large amount of original sources it shows that syntactic matters were in fact carefully investigated throughout both the 19th century and during the first half of the 20th century Moreover it illustrates how the enormous development of syntactic research in the last fifty years has already condemned even several recent ideas and analyses to oblivion and deeply influenced current research programs The wealth of research undertaken over the last two centuries is presented here in a systematic way taking as its starting point the relationship of syntax with psychology throughout this period The critical ideas expressed in the text are based on a detailed illustration of the different syntactic models and analyses rather than on the polemics between the different schools

*The Study of Language in 17th-Century England* Vivian Salmon, 1988-01-01 This volume brings together a number of papers by Vivian Salmon previously published in various journals and collections that are unfamiliar and perhaps even inaccessible to historians of the study of language The central theme of the volume is the study of language in England in the 17th century Papers in the first section treat aspects of the history of language teaching The second section consists of three articles on the history of grammatical theory The papers in the third and final section deal with the search for the universal language

Linguistic Historiography E. F. K. Koerner, 1999-01-01 The present volume brings together the author's most recent thinking on the tasks and methods of linguistic historiography and his critical assessment of the legacy of a number of major 20th century scholars Some of the chapters are revisions of previously published articles which together with new materials have been welded into a coherent volume

*English Historical Linguistics and Philology in Japan* Jacek Fisiak, Akio Oizumi, 2011-07-22 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing

Modern Biblical Criticism as a Tool of Statecraft (1700-1900) Scott Hahn, Jeffrey L. Morrow, 2020-04-27 Modern biblical scholarship is often presented as analogous to the hard and natural sciences its histories present the developmental stages as quasi scientific discoveries That image of Bible scholars as neutral scientists in pursuit of truth has persisted for too long Modern Biblical Criticism as a Tool of Statecraft 1700 1900 by Scott W Hahn and Jeffrey L Morrow examines the lesser known history

of the development of modern biblical scholarship in the eighteenth and nineteenth centuries This volume seeks partially to fulfill Pope Benedict XVI's request for a thorough critique of modern biblical criticism by exploring the eighteenth and nineteenth century roots of modern biblical scholarship situating those scholarly developments in their historical philosophical theological and political contexts Picking up where Scott W Hahn and Benjamin Wiker's *Politicizing the Bible: The Roots of Historical Criticism and the Secularization of Scripture 1300-1700* left off Hahn and Morrow show how biblical scholarship continued along a secularizing trajectory as it found a home in the newly developing Enlightenment universities where it received government funding *Modern Biblical Criticism as a Tool of Statecraft 1700-1900* makes clear why the discipline of modern biblical studies is often so hostile to religious and faith commitments today *The Races of Europe* Richard McMahon, 2016-11-15 This book explores a vital but neglected chapter in the histories of nationalism racism and science It is the first comprehensive study of the transnational scientific community that in the nineteenth and early twentieth centuries attempted to classify Europe's biological races Anthropological race classifiers produced parallel geographies histories and hierarchies of European peoples that were crucial to the creation of national identities and to the overtly political race discourses of eugenics and popular racist ideologues They lent nationalism the invaluable prestige of natural science and traced the histories conflicts and relationships of national races back into prehistory Racial national character stereotypes meanwhile supported competing political ideologies The book examines the interplay between class gender and national identity narratives and the tensions and interactions between the scientific and political agendas of classifiers Within the elaborate transnational networks of scientific communities for example they had to reconcile competing national narratives **Declinatio** Daniel J. Taylor, 1974-01-01 Marcus Terentius Varro 116-27 B.C. was one of the most prolific writers in antiquity However of his *De Lingua Latina* only six of 25 books have survived and these are neither complete nor free of textual corruption This study is an attempt to provide an adequate consistent and comprehensive account of the linguistic theory with which Varro operated insofar as it can be recovered from the remains of *De Lingua Latina*
