During the Renaissance state society and man emerged from their medi val condition and assumed a new aspect which we call modern Modern History therefore we date from the period of the approximate completion of this evolutionary process that is from the end of the fifteenth century The agents and events which contributed most largely to this transformation of Europe are here briefly enumerated The Revival of Learning First in Italy and later in the countries of the north men began to interest themselves in the long forgotten literature and art of Greece and Rome By patient labor they excavated as it were the buried culture of antiquity and added it to their meagre medi val stock About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Merriman,2019      An Introduction to the History of Modern Europe Archibald Weir,2015-06-02 Excerpt from An Introduction to the History of Modern Europe The purpose of this volume is to view in their logical connection the chief groups of events which formed the groundwork of European history in the nineteenth century Though historical in form the book does not pretend to be a history but aims only at presenting such a preliminary view of the immediate antecedents of modern civilization as will supply a sufficient basis for a comprehensive study of our age To effect this object it has been necessary to abandon the usual artifice of bringing all history under the head of politics and to distribute the subject in the following manner The introductory chapter endeavours to indicate as summarily as possible the evils of the monarchico feudal system in the eighteenth century and the ideas of reform which were generated by the contemporary intellectual movement The second chapter reviews the work of the chief reforming monarchs and ministers in order to exhibit the actual state of Europe in the latter part of the century and to draw attention to the fact that monarchy by its good offices obtained over men s minds considerable influence which survived the Revolution and has played a prominent part in subsequent political history The same chapter however shows how monarchy failed to meet all the urgent wants of the time and the next chapter gives an account of the causes which precipitated the Revolution About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do
