In The Shadows Of The Sun:

Engaging with Contemporary Challenges through Science Education Research Olivia Levrini, Giulia Tasquier, Tamer G. Amin, Laura Branchetti, Mariana Levin, 2021-09-24 This book starts with the premise that beauty can be an engine of transformation and authentic engagement in an increasingly complex world. It presents an organized picture of highlights from the 13th European Science Education Research Association Conference ESERA 2019 held in Bologna, Italy. The collection includes contributions that discuss contemporary issues such as climate change, multiculturalism, and the flourishing of new interdisciplinary areas of investigation including the application of cognitive neuroscience, artificial intelligence, and digital humanities to science education research. It also highlights learners' difficulties engaging with socio-scientific issues in a digital and post-truth era. The volume demonstrates that deepening our understanding is the preferred way to address these challenges and that science education has a key role to play in this effort. In particular, the book advances the argument that the deep and novel character of these challenges requires a collective search for new narratives and languages, an expanding knowledge base, and new theoretical perspectives and methods of research. The book provides a contemporary picture of science education research and looks to the theoretical and practical societal challenges of the future.

Now they're on a mission to find Fin's missing mother, but before they can blink, Fin's people have found him, and they're not as friendly as he'd hoped. In fact, they're after a powerful wish orb that could resurrect the debilitating Iron Tide and end the world as we know it. Without their captain Coll and wizard friend Ardent to guide them, are Marrill and Fin brave enough to take on the magic and evil of the Pirate Stream on their own?
