In Search Of Reality:

In Search of Reality O. N. Krishnan, 2004 Comparative analysis of the philosophical systems of the Upanisads Advaita Vedanta and various schools of Buddhism **In Search of Reality** B. D'Espagnat, 2012-12-06 When I take up a new book I always read its conclusions first For I have discovered that even difficult books have conclusions that are easy to read and that give a first idea of their content Of course I expect my readers to do this also Indeed the present book offers them an opportunity for generalizing the method After having gone over chapter 14 they should preferably look through chapters 5 2 13 and 10 or at least some of these in this or in other orders before engaging into any thorough reading The point is that at appropriate places in other chapters the reader will find proofs and as we all know all the proofs that are worth something are unavoidably ponderous Of course it is good to have them but again the most suitable procedure not to lose interest in their development is I think to first provisionally grant their conclusions in order to see where they lead us to Then to study the proofs once we have been convinced that the goal is worth some effort This is the reason why I suggest that at least chapters 4 and 11 should on a first reading be skipped at any rate by the poets The problem a new approach of which is described in chapter 4 did not come to light at least in its present form before 1964 The first experimental investigations bearing on it date back from the seventies **In Search of Reality** J. E. Williams, 1925 **Realms: in Search of Reality** Allen L. Scarbrough, 2010-03-14 Realms is a book of ten essays on the nature of reality examining the issues that have perplexed mankind since the dawn of civilization In Search of Divine Reality Lothar Schäfer, 1997-08-01 The message of modern physics is that physical reality has at its frontiers all the aspects of a transcendent order At the foundation of things elementary particles can exert instantaneous long distance influences on each other can be meaningfully said to have mind like properties and can exist in states which are as Heisenberg wrote not quite real but between the idea of a thing and a real thing Thus just as dead atoms form living organisms and stupid molecules form intelligent brains metaphysical entities form physical reality This remarkable book clearly explains the concepts of quantum physics in order to show how science and spirituality are not separate *Arrow Of Time And Reality: In Search Of A Conciliation* Anne Magnon, 1997-12-04 What is Reality What is the role of human consciousness in the shaping of such a concept These questions are as old as mankind and gave rise to the MIND MATTER dualism which preoccupied so many physicists Schrödinger Wigner etc This book considers the problem within the realm of contemporary physics and shows that it could be related to that of ultimate entities The author develops the viewpoint according to which human thinking activities are fruit of the Cosmos and of its combinatorial activity Ultimate entities the bricks out of which our universe is made could be hidden as a primordial alphabet in the foundations of the pyramid of increasing complexity which seems to unfold as a language and to culminate in the emergence of organized and thinking structures This is analyzed in the context of cosmological screening and horizons an expression of our lack of access to totality where macroscopic and microscopic can mingle where a unification of interactions and a

matching of available arrows of time can take place This context is also that of quantum evaporation of particle antiparticle like entities which triggers entropy increase and of the overlap between General Relativity and Quantum Mechanics The problem of an global origin of the cruising and evanescent Now is considered A creative principle reminiscent of the biological mitosis is also presented which is the generator of the event through breaking of temporal symmetry In this perspective time flow is an emergent concept Creation of the World is declined priority on the concept of coming into existence Participant to the origin of the World all possibly virtual processes are able to culminate into the phenomenon of consciousness and Self Awareness
