 absence from his native southern Appalachians Thomas Rain Crowe returned to live alone deep in the North Carolina woods  
 This is Crowe's chronicle of that time when for four years he survived by his own hand without electricity plumbing modern  
 day transportation or regular income It is a Walden for today paced to nature's rhythms and cycles and filled with a wisdom  
 one gains only through the pursuit of a consciously simple spiritual environmentally responsible life Crowe made his home in  
 a small cabin he had helped to build years before at a restless age when he could not have imagined that the place would one  
 day call him back The cabin sat on what was once the farm of an old mountain man named Zoro Guice As we absorb Crowe's  
 sharp observations on southern Appalachian natural history we also come to know Zoro and the other singular folk who  
 showed Crowe the mountain ways that would see him through those four years Crowe writes of many things digging a root  
 cellar being a good listener gathering wood living in the moment tending a mountain garden He explores profound questions  
 on wilderness self sufficiency urban growth and ecological overload Yet we are never burdened by their weight but rather  
 enriched by his thoughtfulness and delighted by his storytelling      **Civil War and Agrarian Unrest** Enrico Dal

**Public Policies and the Misuse of Forest Resources** World Resources Institute, 1988-09-30 Six contributors explore the role of governments in accelerating the rate of forest destruction by providing direct and indirect subsidies to support what would otherwise be non commercial logging operations Without these financial incentives most timber operations in the tropics would cease In a series of country by country investigations including examples from the developed and developing worlds this book documents the government policies that are leading to the misuse of forest resources Each is written by an authority on the country and each contains descriptive analytical and empirical material on key policies and their effects The final country analysis focuses on the United States where the consequences of the subsidized timber sales by the US Forest Service from most of the national forests are discussed The book concludes with an overview of the impact of forest policies and the role of bilateral and multilateral agencies in their formulation By directing attention toward the political dimension involved in forest clearance this book will provide a clearer insight into the basic reasons why forests continue to be destroyed despite the outcry raised by conservationists
