Dey,2011-04-07 This book explores the relationship between the city of Rome and the Aurelian Wall during the six centuries following its construction in the 270s AD a period when the city changed and contracted almost beyond recognition as it evolved from imperial capital

into the spiritual center of Western Christendom The Wall became the single most prominent feature in the urban landscape a dominating presence which came bodily to incarnate the political legal administrative and religious boundaries of urbs Roma even as it reshaped both the physical contours of the city as a whole and the mental geographies of Rome that prevailed at home and throughout the known world With the passage of time the circuit took on a life of its own as the embodiment of Rome s past greatness a cultural and architectural legacy that dwarfed the quotidian realities of the post imperial city as much as it shaped them

Artificial Culture Tama Leaver,2011-12-22 Artificial Culture is an examination of the articulation construction and representation of the artificial in contemporary popular cultural texts especially science fiction films and novels The book argues that today we live in an artificial culture due to the deep and inextricable relationship between people our bodies and technology at large While the artificial is often imagined as outside of the natural order and thus also beyond the realm of humanity paradoxically artificial concepts are simultaneously produced and constructed by human ideas and labor The artificial can thus act as a boundary point against which we as a culture can measure what it means to be human Science fiction feature films and novels and other related media frequently and provocatively deploy ideas of the artificial in ways which the lines between people our

bodies spaces and culture more broadly blur and at times dissolve Building on the rich foundational work on the figures of the cyborg and posthuman this book situates the artificial in similar terms but from a nevertheless distinctly different viewpoint After examining ideas of the artificial as deployed in film novels and other digital contexts this study concludes that we are now part of an artificial culture entailing a matrix which rather than separating minds and bodies or humanity and the digital reinforces the symbiotic connection between identities bodies and technologies **The Commentators' Al**
