A New Model of the Universe P.D. Ouspensky,2023-01-29 In A New Model of the Universe written in 1914 and now published for the first time in French P D Ouspensky describes his own quest for a form of truth concerning questions as fundamental as the place of man in the universe the unknown the invisible world starting from the idea always that true civilization only exists in esotericism and that modern Western civilization suffers from a profound barbarism due to the absence of esoteric thought Calling on Christianity Judaism Eastern philosophies the symbolism of the Tarot experimental mysticism the study of dreams hypnotism yoga but also the sciences and in particular ancient physics and modern the author attempts to answer the following questions what form does the world have Is the world a chaos or a system Does the universe exist by accident or was it created according to a plan A new model of the Universe responds to a growing need in late 20th century man to question his origins and the meaning of his existence by having recourse to ancient beliefs and traditions

Aspects of Human Evolution Rudolf Steiner,J. Leonard Benson,1987-02-01 How to Keep Your Soul Alive after Twenty Seven This could have been the title of this book The author shows that the natural development of the soul stops at around the age of twenty seven After that nothing happens for our inner being unless we learn to make it happen Part of the tragic nature of our time is that more and more people allow their soul life to die at twenty seven so that the remainder of their life becomes a kind of mummification Rudolf Steiner explains how by exerting our thinking and feeling we can keep our soul alive and growing This is ultimately the only way we can make this incarnation a satisfactory one Through such effort we can continue to develop inwardly until a very advanced age each year becoming richer and more interesting than the one before Here is a book that gives real meaning to the idea that we live in a state of becoming

Human Forms Ian Duncan, 2024-12-17 A major rethinking of the European novel and its relationship to early evolutionary science The 120 years between Henry Fielding's Tom Jones 1749 and George Eliot's Middlemarch 1871 marked both the rise of the novel and the shift from the presumption of a stable universal human nature to one that changes over time In Human Forms Ian Duncan reorients our understanding of the novel's formation during its cultural ascendancy arguing that fiction produced new knowledge in a period characterized by the interplay between literary and scientific discourses even as the two were separating into distinct domains Duncan focuses on several crisis points the contentious formation of a natural history of the human species in the late Enlightenment the emergence of new genres such as the Romantic bildungsroman historical novels by Walter Scott and Victor Hugo that confronted the dissolution of the idea of a fixed human nature Charles Dickens's transformist aesthetic and its challenge to Victorian realism and George Eliot's reckoning with the nineteenth century revolutions in the human and natural sciences Modeling the modern scientific conception of a developmental human nature the novel became a major experimental instrument for managing the new set of divisions between nature and history individual and species human and biological life that replaced the ancient schism between animal body and immortal soul The first book to explore the interaction of European fiction with the natural history of man from the late Enlightenment through the mid Victorian era Human Forms sets a new standard for work on natural history and the novel
