Inside Multi Media Case Based Instruction:

Inside Multi-Media Case Based Instruction Roger C. Schank, 2012-11-12 The fourth in the Inside series this volume includes four theses completed under the editor's direction at the Institute for the Learning Sciences at Northwestern University. This series bridges the gap between Schank's books introducing for a popular audience the theories behind his work in artificial intelligence AI and the many articles and books written by Schank and other AI researchers for their colleagues and students. The series will be of interest to graduate students in AI and professionals in other academic fields who seek the retraining necessary to join the AI effort or to understand it at the professional level. This volume elaborates the Case Based Teaching Architecture. A central tenet of this architecture is the importance of acquiring cases and being able to retrieve and use those cases to solve new problems. The theses address the problems of building case bases indexing large amounts of data contained within those case bases and retrieving information on a need to know basis. They also reflect the work of researchers at the Institute to design tools that enable software programs to be built more effectively and efficiently.

Inside Multi-media Case Based Instruction Roger C. Schank, 1998 This book elaborates the artificial intelligence theories behind the Case Based Teaching Architecture developed at the Institute for the Learning Sciences. The book is for anyone who wants a technical discussion but who is not a trained AI researcher. Multimedia Technologies Mahbubur Rahman

Syed, 2008-01-01 This book offers an in depth explanation of multimedia technologies within their many specific application areas as well as presenting developing trends for the future. Psychology Applied to Teaching Jack Snowman, Robert Frederick Biehler, 2006 Scaling up excellence is the key to creating a great organisation. It's how a small enterprise expands without losing focus. It's how a brilliant new idea or plan developed by the few goes on to be adopted by the many. And in hard times and tough situations it's how pockets of smart new thinking overcome cultures of indifference or negativity. An organisation that doesn't know how to scale up what is best within it won't achieve long term success. Bestselling author Robert Sutton and his Stanford colleague Huggy Rao have devoted nearly a decade to uncovering what it takes to create and spread outstanding performance and in *Scaling Up Excellence* they share the fruits of their research. Drawing on case studies that range from Silicon Valley enterprises to non profit organisations they provide crucial insights into corporate cultures both good and bad and offer a road map for establishing and stimulating excellence. In the process they show how to use premortems when making big decisions about change. They reveal why seven is so often the magic number when it comes to team size. They examine successful and unsuccessful quests for improvement in hospitals, schools and elsewhere. And they discuss when a single corporate mindset is best. Catholicism and when local variation is preferable. Buddhism. *Scaling Up Excellence* is the first management book

devoted to what is or should be a core priority for every organisation As such it is destined to become the standard bearer
