Walvoord,Zachary J. Hayes,Clark H. Pinnock,2010-08-10 Most contemporary Christians acknowledge the doctrine of hell but they d rather not think about how God punishes the wicked The authors of Four Views on Hell meet this subject head on with different views on what the Scriptures say Is hell to be understood literally as a place of eternal smoke and flames Or are such images simply metaphors for a real but different form of punishment Is there such a thing as conditional immortality in which God annihilates the souls of the wicked rather than punishing them endlessly Is there a Purgatory and if so how does it fit into the picture The interactive Counterpoints forum allows the reader to see the four views on hell literal metaphorical conditional and purgatorial in interaction with each other Each view in turn is presented critiqued and defended This evenhanded approach is ideal for comparing and contrasting views in order to form a personal conclusion about one of Christianity s key doctrines The Counterpoints series provides a forum for comparison and critique of different views on issues important to Christians Counterpoints books address two categories Church Life and Bible and Theology Complete your library with other books in the Counterpoints series     The Right to Die Anne Wallace Sharp,Robert Taylor,2009-04-03 Doctor assisted suicide is legal in Oregon Washington Colorado California Washington D C and Vermont As of January 2016 991 patients have died by taking legally backed drugs under supervision in Oregon according to CNN This timely edition examines issues surrounding the right to die The book takes a critical look at topics such as euthanasia assisted suicide the refusal of medical treatment and life sustaining treatment     Eccentricity in Anthropology Stephen R. **The Oxford Handbook of Eschatology** Jerry L. Walls, Professor of Philosophy of Religion, Asbury Theological Seminary, 2007-10-31. Eschatology is the study of the last things: death, judgment, the afterlife, and the end of the world. Through centuries of Christian thought, from the early Church fathers through the Middle Ages and the Reformation, these issues were of the utmost importance. In other religions, too, eschatological concerns were central. After the Enlightenment, though, many religious thinkers began to downplay the importance of eschatology, which, in light of rationalism, came to be seen as something of an embarrassment. The twentieth century, however, saw the rise of phenomena that placed eschatology back at the forefront of religious thought. From the rapid expansion of fundamentalist forms of Christianity, with their focus on the end times, to the proliferation of apocalyptic new religious movements, to the recent and very public debates about suicide, martyrdom, and paradise in Islam, interest in eschatology is once again on the rise. In addition to its popular resurgence in recent years, some of the world's most important theologians have returned eschatology to its former position of prominence. The Oxford Handbook of Eschatology will provide an important critical survey of this diverse body of thought and practice from a variety of perspectives: biblical, historical, theological, philosophical, and cultural. This volume will be the primary resource for students, scholars, and others interested in questions of our ultimate existence.

*Diverse and Creative Voices* Dieumeme Noelliste, Sung Wook Chung, 2015-04-20. As the twentieth century passed its midpoint and was rushing toward its end, a growing number of Majority World theologians came to realize that they could, in fact, do theology in their own contexts for the benefit of their own people. Thus, from the 1960s onward, theologians in the global South have embarked on a form of theological construction that has sometimes been described as contextual reflection or contextualized theology. This volume is motivated by the conviction that these efforts have resulted in theological work that is also beneficial for Christians in other parts of the world. The editors have invited Majority World theologians to share their reflections on several themes of Christian faith from their own sociohistorical perspectives, but with an unswerving commitment to the authority of Scripture. It is hoped that these fresh reflections will help Christians in the West engage and benefit from the perspectives of fellow believers in the global South.

The Tale of Sinuhe and Other Ancient Egyptian Poems, 1940-1640 BC, 1998. This anthology contains all the substantial surviving works from the golden age of Ancient Egyptian fictional literature, c. 1940-1640 B.C. Composed by an anonymous author in the form

of a funerary autobiography the Tale tells how the courtier Sinuhe flees Egypt at the death of his king His adventures bring wealth and happiness but his failure to find meaningful life abroad is only redeemed by the new king's sympathy and he finally returns to the security of his homeland Other works from the Middle Kingdom include a poetic dialogue between a man and his soul on the problem of suffering and death a teaching about the nature of wisdom which is bitterly spoken by the ghost of the assassinated King Amenemhat I and a series of light hearted tales of wonder from the court of the builder of the Great Pyramid

**Jacket Existence: what it is and what we think it is** Victor Senchenko, 2017-01-31 Existence what it is and what we think it is engages logic and rational to expose and explain the defects of human opinions and beliefs that came into existence from human imagination rather than any precise irrefutable knowledge including that of knowing exactly what makes humans human and knowing why everything that physically surrounds them on Earth and beyond always behaves within the states of physical reality and never any unreality Yet despite the seemingly overall human acceptance that physical existence on Earth and beyond constitutes physical reality even the slightest examination of human notions and beliefs including those accepted by science shows just how much these notions and beliefs endorse and uphold physical unreality The reason for such widespread acceptance of unreality amongst humans is due to their preference to believe the lies of those who advocate for their own selfish reasons that everything is possible and that the security of all humanity can be assured by means of belief in intangible entities of gods multi dimensions and time It may appear improbable that the intentions of Existence what it is and what we think it is to dismantle any of the erroneous notions and self deceptions has much chance of success considering how ingrained these beliefs are in human self awareness Still it is possible that the disclosures and explanations provided in the book may lead some readers to realize that the future of mankind depends not on the usual attitudes of selfish wants and desires but on unrestricted understanding of physical reality with all its limitations which can teach humanity to carefully manage not just its future existence but that of all other inhabitants on Earth in its care
