## **Inside Casebased Reasoning:**

**Inside Case-Based Reasoning** Christopher K. Riesbeck, Roger C. Schank, 2013-05-13 Introducing issues in dynamic memory and case based reasoning this comprehensive volume presents extended descriptions of four major programming efforts conducted at Yale during the past several years Each descriptive chapter is followed by a companion chapter containing the micro program version of the information The authors emphasize that the only true way to learn and understand any AI program is to program it yourself To this end the book develops a deeper and richer understanding of the content through LISP programming instructions that allow the running modification and extension of the micro programs developed by the authors

**Inside Case-based Reasoning** Christopher K. Riesbeck, 1989 *Inside Case-Based Explanation* Roger C. Schank, Alex Kass, Christopher K. Riesbeck, 2014-02-24 This book is the third volume in a series that provides a hands on perspective on the evolving theories associated with Roger Schank and his students The primary focus of this volume is on constructing explanations All of the chapters relate to the problem of building computer programs that can develop hypotheses about what might have caused an observed event Because most researchers in natural language processing don't really want to work on inference memory and learning issues most of their sample text fragments are chosen carefully to de-emphasize the need for non-text related reasoning The ability to come up with hypotheses about what is really going on in a story is a hallmark of human intelligence The biggest difference between truly intelligent readers and less intelligent ones is the extent to which the reader can go beyond merely understanding the explicit statements being communicated Achieving a creative level of understanding means developing hypotheses about questions for which there may be no conclusively correct answer at all The focus of the lab during the period documented in this book was to work on getting a computer program to do that The volume adopts a case based approach to the construction of explanations which suggests that the main steps in the process of explaining a given anomaly are as follows Retrieve an explanation that might be relevant to the anomaly Evaluate whether the retrieved explanation makes sense when applied to the current anomaly Adapt the explanation to produce a new variant that fits better if the retrieved explanation doesn't fit the anomaly perfectly

Machine Learning and Data Mining in Pattern Recognition Petra Perner, 2003-05-15 This book constitutes the refereed proceedings of the Second International Workshop on Machine Learning and Data Mining in Pattern Recognition MLDM 2001 held in Leipzig Germany in July 2001 The 26 revised full papers presented together with two invited papers were carefully reviewed and selected for inclusion in the proceedings The papers are organized in topical sections on case based reasoning and associative memory rule induction and grammars clustering and conceptual clustering data mining on signals images and spatio-temporal data nonlinear function learning and neural net based learning learning for handwriting recognition statistical and evolutionary learning and content based image retrieval

Case-Based Learning Janet L. Kolodner, 2012-12-06 Case based reasoning means reasoning based on remembering previous experiences A reasoner using

old experiences cases might use those cases to suggest solutions to problems to point out potential problems with a solution being computed to interpret a new situation and make predictions about what might happen or to create arguments justifying some conclusion A case based reasoner solves new problems by remembering old situations and adapting their solutions It interprets new situations by remembering old similar situations and comparing and contrasting the new one to old ones to see where it fits best Case based reasoning combines reasoning with learning It spans the whole reasoning cycle A situation is experienced Old situations are used to understand it Old situations are used to solve a problem if there is one to be solved Then the new situation is inserted into memory alongside the cases it used for reasoning to be used another time The key to this reasoning method then is remembering Remembering has two parts integrating cases or experiences into memory when they happen and recalling them in appropriate situations later on The case based reasoning community calls this related set of issues the indexing problem In broad terms it means finding in memory the experience closest to a new situation In narrower terms it can be described as a two part problem assigning indexes or labels to experiences when they are put into memory that describe the situations to which they are applicable so that they can be recalled later and at recall time elaborating the new situation in enough detail so that the indexes it would have if it were in the memory are identified Case Based Learning is an edited volume of original research comprising invited contributions by leading workers This work has also been published as a special issues of MACHINE LEARNING Volume 10 No 3

**Artificial Intelligence in Medicine** Michel Dojat, Elpidia Keravnou, Pedro Barahona, 2003-11-11 This book constitutes the refereed proceedings of the 9th Conference on Artificial Intelligence in Medicine in Europe AIME 2003 held in Protaras Cyprus in October 2003 The 24 revised full papers and 26 revised short papers presented together with two invited contributions were carefully reviewed and selected from 65 submissions The papers are organized in topical sections on temporal reasoning ontology and terminology image processing and simulation guidelines and clinical protocols terminology and natural language issues machine learning probabilistic networks and Bayesian models case based reasoning and decision support and data mining and knowledge discovery

**Engineering Assets and Public Infrastructures in the Age of Digitalization** Jayantha P. Liyanage, Joe Amadi-Echendu, Joseph Mathew, 2020-08-17 This proceedings of the 13th World Congress on Engineering Asset Management covers a range of topics that are timely relevant and practically important in the modern digital era towards safer cost effective efficient and secure engineered assets such as production and manufacturing plants process facilities civil structures equipment machinery and infrastructure It has compiled some pioneering work by domain experts of the global Engineering Asset Management community representing both public and private sectors The professional coverage of the book includes Asset management in Industry 4 0 Standards and models Sustainable assets and processes Life cycle perspectives Smart and safer assets Applied data science Workplace safety Asset health Advances in equipment condition monitoring Critical asset processes and Innovation strategy and entrepreneurship The breadth and depth of these state of the

art comprehensive proceedings make them an excellent resource for asset management practitioners researchers and academics as well as undergraduate and postgraduate students

#### **Case-Based Decision Support for Disaster**

**Management** Möhrle, Stella,2020-07-01 Disasters are characterized by severe disruptions of the society s functionality and adverse impacts on humans the environment and economy that cannot be coped with by society using its own resources This work presents a decision support method that identifies appropriate measures for protecting the public in the course of a nuclear accident The method particularly considers the issue of uncertainty in decision making as well as the structured integration of experience and expert knowledge

#### **Computational Network Application Tools for Performance**

**Management** Millie Pant,Tarun K. Sharma,Sebastián Basterrech,Chitresh Banerjee,2019-10-18 This book explores a range of important theoretical and practical issues in the field of computational network application tools while also presenting the latest advances and innovations using intelligent technology approaches The main focus is on detecting and diagnosing complex application performance problems so that an optimal and expected level of system service can be attained and maintained The book discusses challenging issues like enhancing system efficiency performance and assurance management and blends the concept of system modeling and optimization techniques with soft computing neural network and sensor network approaches In addition it presents certain metrics and measurements that can be translated into business value These metrics and measurements can also help to establish an empirical performance baseline for various applications which can be used to identify changes in system performance By presenting various intelligent technologies the book provides readers with compact but insightful information on several broad and rapidly growing areas in the computation network application domain The book s twenty two chapters examine and address current and future research topics in areas like neural networks soft computing nature inspired computing fuzzy logic and evolutionary computation machine learning smart security and wireless networking and cover a wide range of applications from pattern recognition and system modeling to intelligent control problems and biomedical applications The book was written to serve a broad readership including engineers computer scientists management professionals and mathematicians interested in studying tools and techniques for computational intelligence and applications for performance analysis Featuring theoretical concepts and best practices in computational network applications it will also be helpful for researchers graduate and undergraduate students with an interest in the fields of soft computing neural networks machine learning sensor networks smart security etc

**Research and Development in Intelligent Systems XVII** Alun Preece,Frans Coenen,2012-12-06 M A Bramer University of Portsmouth UK This volume comprises the refereed technical papers presented at ES2000 the Twentieth SGES International Conference on Knowledge Based Systems and Applied Artificial Intelligence held in Cambridge in December 2000 together with an invited keynote paper by Professor Austin Tate The conference was organised by SGES the British Computer Society Specialist Group on Knowledge Based Systems and Applied Artificial Intelligence The papers in this volume present new and

innovative developments in the field divided into sections on learning case based reasoning knowledge representation knowledge engineering and belief acquisition and planning The refereed papers begin with a paper entitled A Resource Limited Artificial Immune System for Data Analysis which describes a machine learning algorithm inspired by the natural immune system This paper was judged to be the best refereed technical paper submitted to the conference The considerable growth in interest in machine learning in recent years is well reflected in the content of the next three sections which comprise four papers on case based reasoning and nine papers on other areas of machine learning The remaining papers are devoted to knowledge engineering knowledge representation belief acquisition and planning and include papers on such important emerging topics as knowledge reuse and representing the content of complex multimedia documents on the web This is the seventeenth volume in the Research and Development series The Application Stream papers are published as a companion volume under the title Applications and Innovations in Intelligent Systems VIII Advances in Applied Artificial Intelligence Moonis Ali, Richard Dapoigny, 2006-06-27 This book constitutes the refereed proceedings of the 19th International Conference on Industrial and Engineering Applications of Artificial Intelligence and Expert Systems IEA AIE 2006 held in Annecy France June 2006 The book presents 134 revised full papers together with 3 invited contributions organized in topical sections on multi agent systems decision support genetic algorithms data mining and knowledge discovery fuzzy logic knowledge engineering machine learning speech recognition systems for real life applications and more

Computational Intelligence in Healthcare 4 Isabelle Bichindaritz, Sachin Vaidya, Ashlesha Jain, 2010-10-05 Computational Intelligence is comparatively a new field but it has made a tremendous progress in virtually every discipline right from engineering science business management aviation to healthcare Computational intelligence already has a solid track record of applications to healthcare of which this book is a continuation We would like to refer the reader to the excellent previous volumes in this series on computational intelligence in healthcare 1 3 This book is aimed at providing the most recent advances and state of the art in the practical applications of computational intelligence paradigms in healthcare It includes nineteen chapters on using various computational intelligence methods in healthcare such as intelligent agents and case based reasoning A number of fielded applications and case studies are presented Highlighted are in particular novel computational approaches to the semantic management of health information such as in the Web 2.0 mobile agents such as in portable devices learning agents capable of adapting to diverse clinical settings through case based reasoning and statistical approaches in computational intelligence This book is targeted towards scientists application engineers professors health professionals professors and students Background information on computational intelligence has been provided whenever necessary to facilitate the comprehension of a broad audience including healthcare practitioners *Advanced Computational Intelligence Paradigms in Healthcare - 1* Hiroyuki Yoshida, Ashlesha Jain, Ajita Ichalkaranje, Nikhil Ichalkaranje, 2007-04-27 This book presents some of the most recent research results on the applications of computational

intelligence in healthcare The contents include information model for management of clinical content state based model for management of type II diabetes case based reasoning in medicine assessing the quality of care in AI environment electronic medical record to examine physician decisions multi agent systems for the management of community healthcare assistive wheelchair navigation and more

**Research and Development in Intelligent Systems XVI** Ann Macintosh, Frans Coenen, 2012-12-06 This volume contains the refereed technical papers presented at ES99 the Nineteenth SGES International Conference on Knowledge Based Systems and Applied Artificial Intelligence held in Cambridge in December 1999 The papers in this volume present new and innovative developments in the field divided into sections on knowledge engineering knowledge discovery case based reasoning learning and knowledge representation and refinement This is the sixteenth volume in the Research and Development series The series is essential reading for those who wish to keep up to date with developments in this important field The Application Stream papers are published as a companion volume under the title Applications and Innovations in Intelligent Systems VII

*Studies in Legal Logic* Jaap Hage, 2006-03-30 *Studies in Legal Logic* is a collection of nine interrelated papers about the logic epistemology and ontology of law All of the papers were written after the publication of the author's Reasoning with Rules and supplement the issues addressed therein Some of the papers are new others have been revised substantially after the publication of their original versions The emphasis is on analysis not on logical technicalities *Studies in Legal Logic* contains chapters about the nature of norms the role of coherence in the law the nature of defeasibility the role of dialectics in law and artificial intelligence the statics and dynamics of the law and the consistency of rules Moreover it contains a new simplified and yet more powerful version of Reason based Logic and extensive examples of how it can be used for the analysis of legal reasoning The examples deal with legal theory construction case based reasoning and judicial proof
