Thomas, 2002-03-22 This title analyzes contemporary trends and tools that affect how information is created stored discovered and used in a progressive technological environment It presents a framework for librarians to tailor their services and resources in house expertise and organizational identities to provide an efficient and effective community of learning for their evolving clientele **Research Within the Disciplines** Peggy Keeran, 2007 Research lies at the heart of all academic disciplines Research Within the Disciplines Foundations for Reference and Library Instruction is an expansion of that concept The book provides an overview of research practices and literacy standards in the various disciplines humanities music social sciences business government publications engineering and sciences to help shape library instruction and reference assistance Conceived and developed by the reference librarians at the University of Denver the book grew out of team discussions about teaching research and writing within the disciplines The book s main objective is to provide a degree of orientation toward conducting research within specific disciplines and across others The volume includes separate chapters on the broad disciplines covered in undergraduate education as well as concluding chapters addressing interdisciplinary research and the role of instruction as a means of developing effective researchers The continued necessity of understanding the foundations of research whether within the physical library or via the electronic environment remains an underlying concern and the advice put forth by this team of practicing academic librarians is an important step to achieving this goal Libr@ries Cushla Kapitzke, Bertram C. Bruce, 2013-02-01 This volume is the first to examine the social cultural and political implications of the shift from the traditional forms and functions of print based libraries to the delivery of online information in educational contexts Libr@ries are conceptualized as physical places virtual spaces communities of literate practice and discourses of information work Despite the centrality of libraries in literacy and learning the study of libraries has remained isolated within the disciplinary boundaries of information and library science since its inception in the early twentieth century The aim of this book is to problematize and thereby mainstream this field of intellectual endeavor and inquiry Collectively the contributors interrogate the presuppositions of current library practice seek to understand how library as place and library as space blend together in ways that may be both contradictory and complementary and envision new modes of information access and new multimodal literacies enabled by

Shock Ty Adams, Steve Smith, 2015-09-04 In the spirit of Alvin Toffler's acclaimed works peering into the future of the technological society Communication Shock is a concise history of communication technologies and an exploration of the possible social and human impacts of nanotechnology on the ecology of human communication As we become increasingly more networked with communication technologies we must come to understand and confront the social impact of these changes More importantly we must wisely choose in embracing or rejecting these technologies and exploring how we might do both by striking an appropriate balance Grounded in communication theory and praxis Communication Shock brings some objectivity to the discussion of technology maps its development and encourages a rational conversation about its potential problems and promise It challenges readers to reach their own conclusions about the future imagined and unimaginable about the fundamental values in conflict and how one might choose to embrace or contest them to maintain individual autonomy in the face of increasingly ubiquitous marketing and technological change Present and emerging communications technologies hold the promise for a bold new future but they also have their inherent risks and drawbacks Communication shock is the human response conscious or unconscious wherein the individual chooses to resist the growing pervasiveness of technology in his or her life by seeking ways to reduce or redirect new technologies or to reject the addition of such technologies altogether Here is a framework for understanding the potential of the evolving technologies determining which are essential and which are distractions from the life that one believes to be meaningful and making informed choices for the life one wishes to live **Digital Library Programs for Libraries and Archives** Aaron D. Purcell, 2016-06-17 Planning and managing a self contained digitization project is one thing but how do you transition to a digital library program Or better yet how do you start a program from scratch In this book Purcell a well respected expert in both archives and digital libraries

combines theory and best practices with practical application showing how to approach digital projects as an ongoing effort. He not only guides librarians and archivists in transitioning from project level initiatives to a sustainable program but also provides clear step by step instructions for building a digital library program from the bottom up even for organizations with limited staff. Approachable and easy to follow, this book traces the historical growth of digital libraries and the importance of those digital foundations, summarizes current technological challenges that affect the planning of digital libraries and how librarians and archivists are adapting to the changing information landscape, uses examples to lay out the core priorities of leading successful digital programs, covers the essentials of getting started from vision and mission building to identifying resources and partnerships, emphasizes the importance of digitizing original unique materials found in library and archives collections and suggests approaches to the selection process, addresses metadata and key technical standards, discusses management and daily operations including assessment, enhancement, sustainability and long term preservation planning, provides guidance for marketing, promotion and outreach plus how to take into account such considerations as access points, intended audiences and educational and instructional components and includes exercises designed to help readers define their own digital projects and create a real world digital program plan. Equally valuable for LIS students just learning about the digital landscape, information professionals taking their first steps to create digital content and organizations who already have well established digital credentials. Purcell's book outlines methods applicable and scalable to many different types and sizes of libraries and archives.
