Knowledge Systems Design Advances In Computer Science Series:

Knowledge Systems Design John K. Debenham, 1989 This is a book about the design of knowledge based systems of prime interest to those organizations with a commitment to building up large integrated corporate knowledge bases It is principally written for those who have an interest in building expert systems and deductive database systems Debenham's method is to represent and analyze knowledge in a way that is independent of any particular expert system shell or computer language This method extends from initial knowledge acquisition to knowledge base implementation and knowledge base maintenance The text is illustrated with examples expressed in logic programming a procedure adopted because it is both simple and widely understood comparative with other knowledge languages While this book is not intended to be a complete account of expert systems or deductive databases it will enable the knowledge processing specialist to do a better and more systematic job

ECOOP '87. European Conference on Object-Oriented Programming Jean Bezivin, Jean-Marie Hullot, Pierre Cointe, Henry Lieberman, 2007-03-06 In October 1983 an informal meeting was organized in Le Cap d'Agde with the help of the BIGRE bulletin Sixty people turned out to hear more than ten presentations on object oriented programming More important was their unanimous demand for other more structured encounters So about one year later the Object group was created by AFCET A second workshop was organized in Brest and again one year later in Paris each time showing increased attendance and interest The success of these meetings and the fact that similar activities were taking place in other European countries especially Great Britain and Germany led to the idea of an annual European Conference providing a forum for theorists and practitioners interested in the object oriented programming paradigm It is impossible to acknowledge here all the people and organizations that welcomed with great enthusiasm the birth of the ECOOP conference and contributed to its organization More than a hundred submissions were received and the program committee had the unpleasant task of turning down many valuable contributions We hope however that the selection of papers for ECOOP 87 emphasizes the fundamental issues and problems of object oriented programming and will point toward interesting future research directions

Advanced Educational Technologies for Mathematics and Science David Ferguson, 1993-06-14 This book is the outgrowth of a NATO Advanced Research Workshop held in Milton Keynes United Kingdom in the summer of 1990 The workshop brought together about 30 world leaders in the use of advanced technologies in the teaching of mathematics and science Many of these participants commented that the workshop was one of the more productive and exciting workshops that they had attended It was not uncommon to see participants engaged in informal discussion far into the evenings and early mornings long after formal sessions had ended It is my hope that this book captures the substance and excitement of many of the ideas that were presented at the workshop Indeed the process by which this book has come about has given every opportunity for the best thinking to get reflected here Participants wrote papers prior to the workshop After the workshop participants revised the papers at least once In a few instances three versions of papers were written Some participants could not resist the urge to incorporate descriptions of some of the newer developments in their projects The papers in this book demonstrate how technology is impacting our view of what should be taught what can be taught and how we should go about teaching in the various disciplines As such they offer great insight into the central issues of teaching and learning in a wide range of disciplines and across many grade levels ranging from elementary school through undergraduate college education **Integrating Advanced Technology into Technology Education** Michael Hacker, Anthony

Gordon, Marc de Vries, 2012-12-06 Technology is a dynamic field in which new developments take place continuously Education traditionally lacks behind the latest developments in this subject area Therefore it is necessary to consider updating education regularly The NATO Advanced Research Workshop Integrating Advanced Technology into Technology Education discussed necessary changes in technology education caused by new developments in technology It was held in Eindhoven The Netherlands October 9 12 1990 Our impression is that there was a fruitful interaction between educationalists policy makers and industrialists These groups all have their own way of approaching technology education

and the conference gave them an opportunity for sharing ideas that come from these various approaches The participants felt that the issue of integrating advanced technology into technology education was quite relevant There was a high degree of commitment in presentations and discussions This led to the formulation of a number of recommendations to people in NATO countries who are involved in technology education We as organizers appreciate the contributions of many people to this conference NATO for financing it Dr Thomas Liao in particular for stimulating both NATO and us to realize it the presenters for setting the scene for discussions all participants for sharing ideas and perspectives and finally Springer Verlag for publishing the proceedings April 1991 Michael Hacker Anthony Gordon Marc de Vries Introduction From the main theme of the conference Integrating Advanced Technology into Technology Education we distilled six questions 1 *Computerworld*, 1978-10-30 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network Computerworld, 1978-01-23 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network
