Investigates a knowledge based way of programming and systems construction **Knowledge-Based Process Planning for Construction and Manufacturing** Carlos Zozaya-Gorostiza, 2012-12-02 Knowledge Based Process Planning for Construction and Manufacturing describes a knowledge based system architecture that is used to develop process planning systems called PLANEX This book explains that PLANEX is a domain independent knowledge based process planning system architecture Starting from a description of the physical artifact to be constructed or manufactured PLANEX generates the set of activities used to create the artifact These activities with their required resources are linked into a process planning network which can be used in project scheduling or management This text also reviews the concepts requirements and resulting architecture of PLANEX including detailed descriptions of applications of the system in construction and manufacturing This publication is recommended to engineers architects and specialists interested in construction and manufacturing process planning Knowledge-based Software Engineering Tatjana Welzer, Shuichiro Yamamoto, Ivan Rozman, 2002 Annotation The book captures the latest developments in the areas of knowledge engineering and software engineering Particular emphasis is placed upon applying knowledge based methods to software engineering problems The Conference from which the papers are coming originated in order to provide a forum in which the latest developments in the field of knowledge based software engineering could be discussed Although initially targeting scientists from Japan the CIS countries and countries in Central and Eastern Europe the authors come from many countries throughout the world JCKBSE 2002 continues with this tradition and is anticipating even wider international participation Furthermore the scope of the conference as indicated by its topics has been updated to reflect the recent development in all the three covered areas i e knowledge engineering software engineering and knowledge based software engineering Project Management for Construction Chris Hendrickson, Tung Au, 1989 **Capture and Reuse of Project Knowledge in Construction** Hai Chen Tan, Chimay J. Anumba, Patricia M. Carrillo, Dino Bouchlaghem, John Kamara, Chika Udejaja, 2010-02-01 Capture and Reuse of Project Knowledge in Construction An organisation s competitive advantage lies in the knowledge of its employees and the organisation s ability to harness that knowledge to meet business objectives Knowledge management is recognised in the construction industry as a potential tool for providing organisational benefits but for a number of reasons particularly the project based nature of construction where teams are transient multidisciplinary and often from different organisations implementation has been only marginally successful Capture and Reuse of Project Knowledge in Construction describes a methodology for the live capture of reusable project knowledge that reflects both the organisational and human dimensions of knowledge capture and reuse as well as exploiting the benefits of technology This methodology was developed in response

to the shortcomings of current practices in managing project knowledge the benefits offered by capturing and sharing knowledge immediately after it is generated and the organisational benefit of reusing knowledge within a project based environment Written for all practitioners in project based industries who have struggled with the capture and reuse of knowledge on their projects it will also be of interest to students and researchers in construction management and allied disciplines
