Mircea Gh. Negoita, 2004-10-14 We were very pleased to once again extend to the delegates and we are pleased to say our friends the warmest of welcomes to the 8 International Conference on Knowledge Based Intelligent Information and Engineering Systems at Wellington Institute of Technology in Wellington New Zealand The KES conferences attract a wide range of interest The broad focus of the conference series is the theory and applications of computational intelligence and emergent technologies Once purely a research field intelligent systems have advanced to the point where their abilities have been incorporated into many conventional application areas The quest to encapsulate human knowledge and capabilities in domains such as reasoning problem solving sensory analysis and other complex areas has been avidly pursued This is because it has been demonstrated that these abilities have definite practical applications The techniques long ago reached the point where they are being exploited to provide commercial advantages for companies and real beneficial effects on profits KES 2004 provided a valuable mechanism for delegates to obtain a profound view of the latest intelligent systems research into a range of algorithms tools and techniques KES 2004 also gave delegates the chance to come into contact with those applying intelligent systems in diverse commercial areas The combination of theory and practice represents a uniquely valuable opportunity for appreciating the full spectrum of intelligent systems activity and the state of the art Knowledge-Based Intelligent Information and Engineering Systems

Vasile Palade, 2011-04-08 2 1 Text Summarization Text summarization is the process of distilling the most important information from a source or sources to produce an abridged version for a particular user or users and task or tasks 3 Basic and classical articles in text summarization appear in Advances in automatic text summarization 3 A literature survey on information extraction and text summarization is given by Zechner 7 In general the process of automatic text summarization

is divided into three stages 1 analysis of the given text 2 summarization of the text 3 presentation of the summary in a suitable output form Titles abstracts and keywords are the most common summaries in Academic papers Usually the title the abstract and the keywords are the first second and third parts of an Academic paper respectively The title usually describes the main issue discussed in the study and the abstract presents the reader a short description of the background the study and its results A keyword is either a single word unigram e g learning or a collocation which means a group of two or more words representing an important concept e g machine learning natural language processing Retrieving collocations from text was examined by Smadja 5 and automatic extraction of collocations was examined by Kita et al 1
