Greer, Gordon I. **Print** ,1984 McCalla, 2013-06-29 This book is the result of a NATO sponsored workshop entitled Student Modelling The Key to Individualized Knowledge Based Instruction which was held May 4 8 1991 at Ste Adele Quebec Canada The workshop was co directed by Gordon McCalla and Jim Greer of the ARIES Laboratory at the University of Saskatchewan The workshop focused on the problem of student modelling in intelligent tutoring systems An intelligent tutoring system ITS is a computer program that is aimed at providing knowledgeable individualized instruction in a one on one interaction with a learner In order to individualize this interaction the ITS must keep track of many aspects of the leamer how much and what he or she has leamed to date what leaming styles seem to be successful for the student and what seem to be less successful what deeper mental models the student may have motivational and affective dimensions impacting the leamer and so ono Student modelling is the problem of keeping track of all of these aspects of a leamer's learning Science Probe 8 Iean Knowing What Students Know National Research Council, Division of Behavioral and Social Sciences and Bullard, 1985 Education, Center for Education, Board on Testing and Assessment, Committee on the Foundations of Assessment, 2001-10-27 Education is a hot topic From the stage of presidential debates to tonight s dinner table it is an issue that most Americans are deeply concerned about While there are many strategies for improving the educational process we need a way to find out what works and what doesn t work as well Educational assessment seeks to determine just how well students are learning and is an integral part of our quest for improved education The nation is pinning greater expectations on educational assessment than ever before We look to these assessment tools when documenting whether students and institutions are truly meeting education goals But we must stop and ask a crucial question What kind of assessment is most effective At a time when traditional testing is subject to increasing criticism research suggests that new exciting approaches to assessment may be on the horizon Advances in the sciences of how people learn and how to measure such learning offer the hope of developing new kinds of assessments assessments that help students succeed in school by making as clear as possible the nature of their accomplishments and the progress of their learning Knowing What Students Know essentially explains how expanding knowledge in the scientific fields of human learning and educational measurement can form the foundations of an improved approach to assessment These advances suggest ways that the targets of assessment what students know and how well they know it as well as the methods used to make inferences about student learning can be made more valid and

instructionally useful Principles for designing and using these new kinds of assessments are presented and examples are used to illustrate the principles Implications for policy practice and research are also explored With the promise of a productive research based approach to assessment of student learning Knowing What Students Know will be important to education administrators assessment designers teachers and teacher educators and education advocates Science in the Secondary School Jane Butler Kahle,1979 Encyclopaedia of Teaching of Science: Modern methods of Catalog of Copyright Entries Library of Congress.
