*The Politics of Postmodernism* Linda Hutcheon,2003-12-16 Working through the issue of representation in art forms from fiction to photography Linda Hutcheon sets out postmodernism s highly political challenge to the dominant ideologies of the western world

*Postmodernism and Public Policy* John B. Cobb Jr.,2012-02-01 One of America s preeminent systematic theologians John B Cobb Jr examines a range of social issues in his latest groundbreaking work Postmodernism and Public Policy Cobb uses a naturalistic postmodern perspective to make constructive proposals about a wide range of topics in the public eye Postmodernism and Public Policy shows how a postmodern Christianity can contribute positively to thinking about religious and cultural pluralism and how this can give direction to the educational enterprise It proposes ways of understanding sex gender and race that take diversity seriously without lapsing into a debilitating relativism that inhibits political action Arguing for a shift from individualism to thinking of persons in community it proposes that the world be organized from the bottom up in communities of communities and spells out what this implies for the political and economic orders and the relationship between them Cobb shows that formulations on all these topics can be coherently interconnected and he develops the implications of such thinking for some specific ethical and political issues that now trouble the United States such as abortion physician assisted suicide and homosexuality

*Chinese Metaphysics and its Problems* Chenyang Li,Franklin Perkins,2015-04-30 The first English language contributory volume on Chinese metaphysics covering all major traditions from pre Qin to the modern period

**Myths of the Self** Olav Bryant Smith,2004-01-01 Myths of the Self is a departure from the standard fare of postmodern thought In a unique and brilliant turn Smith argues that the best way of dealing with the topic of the self is a synthesis of a narrative theory of identity using Ricoeur as a source along with the constructive postmodern metaphysics of Alfred North Whitehead The resulting synthesis is a new and potentially invigorating spin on the genesis of postmodern thought

The Ethics of Creativity Brian G. Henning,2011-12-09 Foreword by Daniel A Dombrowski A central concern of nearly every environmental ethic is its desire to extend the scope of direct moral concern beyond human beings to plants nonhuman animals and the systems of which they are a part Although nearly all environmental philosophies have long since rejected modernity s conception of individuals as isolated and independent substances few have replaced this worldview with an alternative that is adequate to the organic processive world in which we find ourselves In this context Brian G Henning argues that the often overlooked work of Alfred North Whitehead has the potential to make a significant contribution to environmental ethics Additionally inspired by classical American philosophers such as William James John Dewey and Charles Sanders Pierce and environmental

philosophers such as Aldo Leopold Peter Singer Albert Schweitzer and Arne Naess Henning develops an ethical theory of which the seminal insight is called The Ethics of Creativity By systematically examining and developing a conception of individuality that is equally at home with the microscopic world of subatomic events and the macroscopic world of ecosystems The Ethics of Creativity correctly emphasizes the well being of wholes while not losing sight of the importance of the unique centers of value that constitute these wholes In this way The Ethics of Creativity has the potential to be a unique voice in contemporary moral philosophy     *Restaging the Sixties* James Martin Harding,Cindy Rosenthal,2006 A dynamic exploration of eight radical theater collectives from the 1960s and 70s and their influence on contemporary performance

**Issues and Challenges in Science Education Research** Kim Chwee Daniel Tan,Mijung Kim,2012-04-27 In contemporary society science constitutes a significant part of human life in that it impacts on how people experience and understand the world and themselves The rapid advances in science and technology newly established societal and cultural norms and values and changes in the climate and environment as well as the depletion of natural resources all greatly impact the lives of children and youths and hence their ways of learning viewing the world experiencing phenomena around them and interacting with others These changes challenge science educators to rethink the epistemology and pedagogy in science classrooms today as the practice of science education needs to be proactive and relevant to students and prepare them for life in the present and in the future Featuring contributions from highly experienced and celebrated science educators as well as research perspectives from Europe the USA Asia and Australia this book addresses theoretical and practical examples in science education that on the one hand plays a key role in our understanding of the world and yet paradoxically now acknowledges a growing number of uncertainties of knowledge about the world The material is in four sections that cover the learning and teaching of science from science literacy to multiple representations science teacher education the use of innovations and new technologies in science teaching and learning and science learning in informal settings including outdoor environmental learning activities Acknowledging the issues and challenges in science education this book hopes to generate collaborative discussions among scholars researchers and educators to develop critical and creative ways of science teaching to improve and enrich the lives of our children and youths     **Whitehead and Teilhard** Delio, Ilia,Davis, Andrew M.,2025-03-05

**Personalism Revisited** ,2021-11-08 This book presents selected addresses presented before the Personalist Discussion Group meetings held in conjunction with the annual meetings of The American Philosophical Association Eastern Division It includes the central ideas of American Personalistic Idealism developed during the twentieth century its major criticisms and recent developments by philosophers who are either Personalistic Idealists or sympathetic to the position     *Existence* Robert Cummings Neville,2014-06-05 Religion writes Robert Cummings Neville articulates existential predicaments and provides venues for ecstatic fulfillment Like its companion volumes treating ultimacy and religion Existence advances a systematic philosophical theology to address first order questions found in the array of Axial

Age religions Issues arising in the major religious traditions are explored through a complex array of philosophical approaches This second volume shows religion to be the engagement of ultimate realities common to all human beings Neville finds five problematics relative to ultimate boundary conditions of the human world the contingency of existence living under obligation the quest for wholeness engagement with others and the meaning or value in life Common to all human beings and hence religion the engagement with realities is also historically and culturally bound becoming simultaneously socially constructed religions Readers will find Neville s philosophical theology both bold and enlightening running counter to dominant intellectual trends while richly informed by a long and fruitful engagement with theology philosophy and religion East and West

*Environmental Ethics* David R. Keller,2010-03-15 Through a series of multidisciplinary readings *Environmental Ethics The Big Questions* contextualizes environmental ethics within the history of Western intellectual tradition and traces the development of theory since the 1970s Includes an extended introduction that provides an historical and thematic introduction to the field of environmental ethics Features a selection of brief original essays on why to study environmental ethics by leaders in the field Contextualizes environmental ethics within the history of the Western intellectual tradition by exploring anthropocentric human centered and nonanthropocentric precedents Offers an interdisciplinary approach to the field by featuring seminal work from eminent philosophers biologists ecologists historians economists sociologists anthropologists nature writers business writers and others Designed to be used with a web site which contains a continuously updated archive of case studies *environmentalethics info*

*Mind, Value, and Cosmos* Andrew M. Davis,2020-10-14 *Mind Value and Cosmos* On the Relational Nature of Ultimacy is an investigation into the nature of ultimacy and explanation particularly as it relates to the status of and relationship among Mind Value and the Cosmos It draws its stimulus from longstanding axianoetic convictions as to the ultimate status of Mind and Value in the western tradition of philosophical theology and chiefly from the influential modern proposals of A N Whitehead Keith Ward and John Leslie What emerges is a relational theory of ultimacy wherein Mind and Value Possibility and Actuality God and the World are revealed as ultimate only in virtue of their relationality The ultimacy of relationality what Whitehead calls mutual immanence uniquely illuminates enduring mysteries surrounding any and all existence necessary divine existence the nature of the possible and the world as actual As such it casts fresh light upon the whence and why of God the World and their ultimate presuppositions

**Living and Value** Frederick Ferre,2001-06-07 Based on an ecologically inspired worldview defends ethics against skepticism and irrationalism

**New Media and Learning in the 21st Century** Tzu-Bin Lin,Victor Chen,Ching Sing Chai,2015-02-25 This volume brings together conceptualizations and empirical studies that explore the socio cultural dimension of new media and its implications on learning in the 21st century classroom The authors articulate their vision of new media enhanced learning at a global level The high level concept is then re examined for different degrees of contextualization and localization for example how a specific form of new media e reader changes specific activities in

different cultures In addition studies based in Singapore classrooms provide insights as to how these concepts are being transformed and implemented by a co constructive effort on the part of researchers teachers and students Singapore classrooms offer a unique environment to study the theory practice nexus in that they are high achieving implicitly grounded in the eastern cultural values and well equipped with ICT infrastructure While these studies are arguably the state of the art exemplars that synergize socio cultural and technological affordances of the current learning environments they also serve as improvable ideas for further innovations The interplay between theory and practice lends support to the reciprocal improvements for both This book contributes to the continuing debate in the field and will lead to better learning environments in the 21st century

Whitehead's Philosophy Janusz A. Polanowski, Donald W. Sherburne, 2012-02-01 This volume explores the range of Alfred North Whitehead's philosophy and his relevance to contemporary philosophical traditions While philosophers and theologians with only a passing acquaintance with Whitehead might think that his philosophy is unconnected to our Western philosophical tradition the contributors prove that nothing could be further from the truth The most respected scholars in the field George Allan Lisa Bellantoni John B Cobb Jr Frederick Ferr David L Hall William S Hamrick Robert Cummings Neville Janusz A Polanowski Patrick Shade and Donald W Sherburne illustrate points of connection between Whitehead's ideas to the following Descartes the so called Father of Modern Philosophy classical American thought several contemporary American thinkers including Richard Rorty and Alasdair MacIntyre aspects of European philosophy and current reflections upon the environment and technology

**The Virtue of Nonviolence** Nicholas F. Gier, 2004-01-01 A study in comparative virtue ethics

*Higher Education in the Making* George Allan, 2012-02-01 George Allan argues that the so called culture wars in higher education are the result of the dogmatic and unyielding certainty that both canonists and anti canonists bring to any discussion of how best to organize an undergraduate curriculum He then proposes a middle way Drawing from William James John Dewey and Alfred North Whitehead he contrasts the absolutist claims of both canonists and anti canonists with a fallibilist approach and argues for a more pragmatic canon that is normative and always in need of renovation A wide variety of voices are heard in Allan's conversation about the nature and meaning of an education canon including philosophers Aristotle Descartes Arthur Lovejoy Hannah Arendt Spengler Emerson Lyotard and Rorty Contemporary voices include Eva Brann Charles Anderson Francis Oakley Martha Nussbaum Gerald Graff Henry Louis Gates Jr and Bill Readings

*The Legacy of Hans Jonas* Hava Tirosh-Samuelson, Christian Wiese, 2008-08-31 Hans Jonas 1903 1993 was one of the most creative and original Jewish thinkers of the twentieth century This volume offers a retrospective of Jonas's life and works by bringing together historians of modern Germany Judaica scholars philosophers bioethicists and environmentalists to reflect on the meaning of his legacy today From a historian of religions who wrote a path breaking monograph on Gnosticism Jonas turned to the philosophy of nature extending his existential philosophy and phenomenological analysis to include all forms of life Unique among twentieth century Jewish philosophers Jonas argued for

the possibility of a genuinely symbiotic relationship between humanity and nature which he believed had been suppressed by modern technology Jonas spoke against the human domination of nature on the basis of Jewish sources especially the Bible and Lurianic Kabbalah and he was among the first to define the ethical challenges that modern technology poses to humanity
