Learning Maya 7 Marc-André Guindon, 2005
Publication, 1991 *Designing Critical and Creative Learning with Indigenous Youth* Donna DeGennaro, 2017-04-13
Designing Critical and Creative Learning with Indigenous Youth: A Personal Journey traces the events leading to the creation of Unlocking Silent Histories (USH) and outlines the program's foundational and methodological principles. The book opens with an explanation of the author's struggles with the theory-practice tension, a conflict that has inhibited the widespread adoption and actualization of socially just learning engagements. She then offers her rationale for taking a leave from academia to concentrate fully on developing a critical pedagogy-informed learning design facilitated by combining community-connected inquiry with video ethnography. The substance of the text focuses on the identified foundational and methodological principles explained through first-hand accounts of USH's year-one participants. These youth-centered chapters assist in presenting an argument for employing culturally responsive and socially just educational engagements. At the same time, the chapters illustrate how drawing on youth voice can more broadly contribute to bridging theory and practice in communities that are often disconnected from the larger educational discourse. The author does not intend to provide a scripted implementation process within USH or of education in general. Rather, she uses first-hand youth accounts in this cultural context to give the reader a lived experience of how a youth-directed emergent learning path materializes when employing a model that draws on local knowledge and invites youth voice.

Lee, Roy Pea, Maxine McKinney de Royston, 2020-05-01 Edited by a diverse group of expert collaborators, the *Handbook of the Cultural Foundations of Learning* is a landmark volume that brings together cutting-edge research examining learning as entailing inherently cultural processes. Conceptualizing culture as both a set of social

practices and connected to learner identities the chapters synthesize contemporary research in elaborating a new vision of the cultural nature of learning moving beyond summary to reshape the field toward studies that situate culture in the learning sciences alongside equity of educational processes and outcomes With the recent increased focus on culture and equity within the educational research community this volume presents a comprehensive innovative treatment of what has become one of the field's most timely and relevant topics The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license Funded by The Spencer Foundation
